What week so shocking to behold as the wreck of a diss lute man-the vigor of life exhausted, and yet the first steps in an hon rable career not taken -in himself a lazor-house of disease: dead, but by a heatherish custom of society, not baried! Rogues have had the initial letter of their title burnt into the palms of their hands; even for murder, Cain was only branded on the forche d; but over the whole person of the debauchee or the inebriate, the brack him with stigma and opprobium! How she loosens all his joints, sends tremors along his muscles, and bend forward his frame, as if to bring him upon all-fours with kindred brutes, or to degrade him to the reptile's crawling! How she disfigures his countenance, as if intent upon obliterating all traces of her own image. so that she may swear she never made him! The Norse Legends.

The legends of the Norse have a power and beauty quite their own .-There is a strength and majesty in them that one hardly finds in the graceful ful and vigorous imagination shines itated. Men will rave at the pin back through them, with a rugged beauty born rather of force than of delicacy. The wild, roving life of the Viking, sword always in hand, storms above and around, and the restless, wandering sea surging beneath; a perpetual struggle of conflict and tempest devel-

oped a deep, stern poetry in him, and

touched his troubled life with "the light

that never was on sea or land." The Norse had grand elements of character, with all their rapacity and cruelty. They stormed through life, scorned ease and luxury, and loving nothing so much as the surge of the sea and the fierce excitement of battle. Sometimes one finds in these legends and stores a profound, poetic meaning expressed with the most perfect beauty and grace. An old Norse King sat in his great hall one night, when the tempest was roaring and whirling without The great fire threw its glow far out into the dark recesses of the hall, all the brighter for the storm and darkness around. While the king talked with his counsellors before the fire, a bird flew in and passed over them, and out again at the great open window.

"Such," said the king, "is the Me of man; out of the darkness into the light, and then lost in the blackness and storm

Yes, sire," answered an old courtfully or tenderly told . It has a pa and sweetness as delicate as any fancy born under a Grecian or Italian sky.

Her i reast abdomen, legs, and arms and hands were shockinly burned, and after a few hours she died. She was ent's about five years old, and, as she lingered between Heyven and earth a. tittle while, she asked her mother to lieby the leed with her and, when this repart was granted, she said: "Sing to the Landson Jesus little Lamb.
