OVER AND OVER AGAIN.

Over and over again, No matter which way I turn, always find in the Book of Life some lessons I have to learn. I must grind out the golden grain; I must work at my task with a resolute will over and over again. I cannot measure the need of even the tiniest flower. I check the flow of the golden sands that run through a single hour; but the morning dew must fall. And the sun and summer rain must do their part and perform it all over and over again. The brook through the meadow flows, and over and over again. The ponderous millwheel goes; once doing will not suffice. Though doing be not in vain, and a blessing falling us once or twice may come if we try again. —Selected.

WASHINGTON LETTER.

Washington, D. C., Sept. 8.—Since my last letter great activity has manifested itself at the Congressional headquarters of the Democratic party in this city. Instead of leaving here and joining the National Committee in New York city, as was contemplated a month ago, it has been decided that the most of the effort for the recovery of Congress to the Democratic party will be made here. In the suite of rooms at the Riggs House is a large diagram on which are marked the close districts in the different States which are to be earnestly contested prior to Nov. 8.

Congressman Cowherd will make weekly visits to the home of the Democratic National Committee in the Century Building, opposite the Waldorf-Astoria in New York, where will be expended during these weeks not less than \$2,000,000, and probably nearer \$3,000,000, in making the American people acquainted with Judge Parker and acquiescent in the principles of the platform upon which he stands. In the rooms in the Century Building the chief man whose word is law for the time being is not Taggart or Sheehan or Murphy, or Delancy Niell, but it is August Belmont. It is he who stands at the wheel and directs all movements. He raised the money that paid the cost of the St. Louis convention, and he is financing the national campaign. He is a thorough, prudent, sagacious man, at once conservative and bold, who will pay out no money until he knows just what it is for. His first effort will be to convince New York sure for Parker. New York has not always been indispensable. Her vote was not cast for George Washington when he was elected in 1789, the State not having passed an electoral law. North Carolina and Rhode Island did not vote that year either, because they had not adopted the Constitution.

Two editions of the Democratic campaign book will soon be issued. The first will appear next week. The proofs have been revised and corrected. The first edition will make about one hundred printed pages, and will be in larger type and better paper than the Republican text-book. The second edition will contain the letters of acceptance and discussions of the tariff and wage questions. Senator Paris Gibson was in town yesterday and he reports that there is no trouble out West. In Montana Senator Clark's son threatened to run for Congress and if he does so will produce a financial element which added to his personal popularity will be very likely to elect him and

carry the State for Parker. It is believed that a very heavy Democratic vote will be cast in the cities if the Clarks become personally interested. Then there are troublesome times fore-shadowed in Colorado and Washington while Nevada is confidently set in the Democratic column.

Very little money will come out of the Democratic campaign in an effort to even reduce the Republican majority in Pennsylvania. But Democratic leaders there are determined to diminish the names on the assessors' lists and it is asserted that every fictitious name on the list is known to Democratic workers and that the assessors will be asked to strike these names off under threats of arrest and prosecution.

In many wards in Philadelphia assessors have been more discreet than usual because of the presence of detectives and in some instances they have refused to pad the lists in obedience to orders from Republican leaders declaring that they would not take the chances.

One of the most notable gatherings the United States has ever known is that of the eight International Geographic Congress which meets to-day in this city. It is true that very few of the universities or colleges of this country maintain chairs of geography though geographical instruction is in the curriculum of almost every institution for higher education in Europe. But geographical science has made a wonderful advance on this continent and the assembly of the Congress here is doubtless a recognition of that fact. The most prominent Americans in connection with the Congress are W. J. McGee Chief of Anthropology at the World's Fair, Grove K. Gilbert and Henry Gannett, of this city and Prof. Wm. M. Davis of Harvard. It will be a moveable Congress holding its sessions from city to city throughout the United States and Mexico.

An interesting incident which will attract the attention of this Congress is the discovery this summer of a great mass of masonry on Capitol Hill, within 300 feet of the Capitol itself indicating the existence of a buried city quite known to archaeology. The discovery has been made by the extensive excavations on the site of the new palace to be erected for the offices of the members of Congress. This site has been covered with buildings erected on virgin soil since the beginning of the 17th century, yet now far below the foundations of these houses have been unearthed fragments of other edifices unknown to history or tradition. As the North American Indians did not build cities of masonry the question arises whether there was a people upon the Potomac coeval with the Aztecs and Toltecs and if so what was their name and station age and race.

It is called mimic war—this marching and countermarching of battalions and brigades across a hundred square mile of Virginia this week; but it is hoped that something more important than diversion will result from the expenditure of the million and a half of money appropriated to the maneuvers by Congress. Thirty thousand men are there and their officers are trying to solve the problem of handling large bodies of soldiers over the diversified surface of an actual battle-field. The Browns and Blues have doubtless indulged in some complicated movements in the effort to force each other in different directions without any display of force. The Blues, numbering 15,000 under General Fred Grant marched from the Potomac westward against the Browns of 15,000 under General Franklin Bell operating in the Shenandoah Valley. They have precipitated themselves upon each other and cut each other up fearfully like the angels in Paradise Lost, that annihilated each other without the slightest damage.

Up to date in this third battle of Bull Run, the Browns have held the Blues at bay. It is said that they employed the same tactics which made Stonewall Jackson successful and famous. But Gen. Grant, who is in his father's shoes, and possesses many of his characteristics, may yet be able to stem the tide of war and claim a technical victory. The visiting militia from the Northern States express themselves as delighted with the cool nights, and satisfied with the sleeping and eating arrangements.

A-STITCH IN TIME. This old adage applies to disease as well as to dress. One dose of Rydale's Elixir will arrest a cold or an attack of Pneumonia or LaGrippe and prevent their development. Keep a bottle of Rydale's Elixir in the house, so the "stitch" can be taken in "time." Chas. Fetzner.

SUFFERED MANY YEARS WITH A COMPLICATION OF FEMALE DISEASES.

Two Robust Women Who Owe Their Restored Health and Usefulness to Pe-ru-na.

Mrs. J. E. Finn.

Miss Ruth Emerson.

MRS. J. E. FINN, 82 East High St., Buffalo, N. Y., writes: The Peruna Medicine Co., Columbus, O.: Gentlemen: "A few years ago I had to give up social life entirely, as my health was completely broken down. The doctor advised a complete change and rest for a year. As this was out of the question for a time, I began to look around for other means of restoring my health. "I had often heard of Peruna as an excellent tonic, so I bought a bottle to see what it would do for me, and it certainly took hold of my system and rejuvenated me, and in less than two months I was in perfect health, and now when I feel worn out or tired a dose or two of Peruna is all that I need."—Mrs. J. E. Finn.

Pelvic catarrh is a phrase coined by Dr. Hartman, covering all that large class of diseases that used to be known as female weakness. The lower portion of the abdomen is called by anatomists the pelvis. The organs contained in this portion of the body are known as the pelvic organs. There are several of them, very delicate and very subject to catarrh. Few women escape entirely

Thankful Women Who Have Been Cured by Dr. Hartman's Free Treatment.

Miss Ruth Emerson, 72 Syracuse St., Buffalo, N. Y., writes: "I suffered for two years with irregular and painful menstruation, and Peruna cured me within six weeks. I cannot tell you how grateful I feel. Any agency which brings health and strength to the afflicted is always a welcome friend, and to-day the market is so filled with useless and injurious medicines that it is a pleasure to know of so reliable a remedy as you place before the public." Miss Ruth Emerson.

catarrh of these organs. While each case presents some minor difference as to detail, they are all in reality alike. Peruna does not relieve these cases by temporarily mitigating some symptom, but by a removal of the cause. Many a woman can testify that local treatment does not permanently cure. A large multitude of women are constantly going from doctor to doctor to receive local treatment, with little or no result.

In Peruna these women find a prompt and permanent cure. Imitations of Pe-ru-na. Peruna has come to be recognized as the greatest remedy for catarrh in the world. At first competitors tried to deny this and insisted that their remedies were just as good. This was found to be impossible, however, and now imitations are springing up everywhere.

To successfully palm off an imitation of Peruna even for a short time is sure to be a money-making scheme, but no one who has ever taken Peruna can be fooled on these imitations. No conscientious druggist would sell one of them. Every purchaser should look carefully at each package of Peruna he buys, to be sure that he is getting only genuine Peruna. Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

STATE NORMAL OPENS SEPT. 29.

President Charles D. McIver, of the State Normal and Industrial College, in an interview to-day said: "The State Normal will begin its thirteenth year on the 29th of this month. Its enrollment last year was 537 and the enrollment this year will exceed that number. The new dormitory is now nearing completion and the three other dormitory buildings will accommodate 420 boarders. Forty or fifty students will board in the private homes near the college and the local patronage is usually between 75 and 100.

"The faculty will be strengthened this year by the return of Dr. Dixie Lee Bryant, who has just returned from her three-year leave of absence in Germany with the degree of Ph. D. won by a year's study at Heidelberg, and two years study in the Varian university in Erlangen. "Prof. T. Gilbert Pearson, who with an assistant, has had the senior and freshman science work during Dr. Bryant's absence, will continue with the college, he and Dr. Bryant dividing the work heretofore done by one of them and an assistant.

"Dr. Anna M. Gove, for seven years resident physician and for the past two years engaged in general practice at Yonkers, N. Y., will return as resident physician of the college. "A number of former graduates will return for such additions as is necessary to secure the A. B. or S. B. degree and among the students for special work will be several graduates of other institutions for women.

"A young man who graduates in course I or IV can spend an additional year at the Normal College and take her degree or she can enter the University of North Carolina and in one year earn the degree. "Application for a dmission to the college have come from Pennsylvania,

South Carolina, Florida and Alabama, but as a large number of North Carolina applicants could not be admitted, it has been necessary to exclude all applicants from other States."—Greensboro Record.

WHISKEY MEDICINES.

The temperance press is emphasizing the danger to the home in the use of "medicines" which are loaded with whiskey or alcohol. In this respect, as well as in their remarkable character of their cures, Dr. Pierce's medicines differ from other preparations. Dr. Pierce's Golden Medical Discovery and "Favorite Prescription" contain no alcohol, whiskey or other intoxicant, and are equally free from opium, cocaine and other narcotics. Every family should have a copy of the People's Common Sense Medical Adviser, sent absolutely free, on receipt of stamps to pay expense of mailing only. Send 21 one-cent stamps for the book in plain paper covers, or 31 stamps for cloth binding. Address Dr. R. V. Pierce, Buffalo, N. Y.

THE WINSTON FAIR.

A letter from Winston tells us that the people there are making extensive preparations for the Big Fair, which opens Oct. 4. Winston has the reputation of doing things on a big scale, and if reports are true they will outdo themselves this year. The management has engaged two bands of music, and arranged for some of the most entertaining free attractions ever seen in the South. The Midway this year will cover acres of ground. The country people are thoroughly interested, and will be on the grounds by the thousands. Excursion rates on all roads. The young men of the city are arranging for a series of dances and receptions. All who can do so should attend the Big Winston Fair.

TO OUR FRIENDS AND PATRONS.

We want to say that we have been grinding your wheat during the bad crop years and found it hard to give satisfaction on account of the quality of the wheat, but we have a fine quality of wheat this year, and we guarantee perfect satisfaction for every bushel of wheat ground at our mill that weighs 60 pounds or we will pay \$1.00 per bushel for it. We weigh every bushel of wheat we grind, and give 38 pounds of nice flour and 14 pounds of bran and shorts. If a farmer heaps his half bushel in measuring his wheat and brings it to us and it weighs 65 pounds to the bushel, he gets flour and bran out of the additional five pounds of wheat, same as he does the 60 pounds. We don't do like some mills, claim to give 44 to 45 pounds of flour to the bushel of wheat, and they don't do it either, unless they have over 60 pounds of wheat to the bushel to start with. You weigh your wheat before you carry it to other mills and weigh it when you bring it to us and you will see where you get the best results. If a miller has only 60 pounds of wheat to the bushel to start with and takes out his toll and gives 44 or 45 pounds of flour to the 60 pounds of wheat, he gives you 5 or 7 pounds that don't belong to you, but does belong to the man that goes to the mill ahead of you, and it is not right to give one customer a better turnout than another. Thanking you for past favors, we beg to remain, Respectfully yours, J. H. WALKER & CO. Reidsville, N. C., Aug. 2, 1904.

ON THE WING.

Sept. 10, 1904. Editor Weekly—I am again out on my usual trip. Since fodder has been mostly pulled, corn shows to be good where it has had a chance. It don't look now that the country will have to beg bread nor get it from the Western markets. That looks like farming. Tobacco in this light land section has been mostly cut and cured. The cures are good and there will be a fine lot of nice tobacco on the markets this season. Oats are looking well where they have come up and I see some preparation for wheat. The country seems to be brightening in the hope that farming will be a more profitable business than it has been for several years.

There was quite a serious murder case in the northern part of Orange county on last Friday evening. The particulars, so far as I could learn them, are as follows: It appears that Tom Harner's wife and J. N. Harner, her father-in-law, had had some words and he whipped her; she swore out a warrant against him, and Deputy Sheriff Joe Nichols went to arrest J. N. Harner. He resisted arrest and Nichols went and got a Mr. Breane to aid him. On their return they found Harner in the woods; he still resisted arrest and when Nichols attempted to arrest him Harner shot him through the muscle of the left arm, severing the main artery. Mr. A. J. Tilley and two other men took Nichols on a wagon to carry him home, but he died before reaching there. Harner is yet at large. He said to be a very dangerous man. In 1876 he killed a Mr. Logan Clayton to death, and I heard that he boasted when he went to shoot Sheriff Nichols that he had killed one man and he would kill another.

The above information was given me by Mr. A. J. Tilley and I am satisfied it is correct. Respectfully, L. H. HARDY. At Roxboro.—A report here says that Harner has been arrested. H.

HOW TO SECURE A VIGOROUS BODY AND MIND.

Health of body and mind depend upon the health of the stomach. The brain, the blood, the nerves, the lungs, in fact, every organ of the body depend upon the stomach for sustenance. The stomach's power to digest and assimilate food measures the strength of body and mind. If you are below the normal in strength and flesh Rydale's Stomach Tablets will help you out of your trouble. They insure perfect digestion and assimilation and these secure health of body and mind. Rydale's Stomach Tablets cure the worst forms of stomach trouble. Trial size, 25 cts. Family size, 50 cts. The large size contains 2 1/2 times the quantity of the trial size. Chas. Fetzner.

THE Wachovia Loan & Trust Co., of Winston, N. C.

In addition to doing a general Banking and Savings Business, also acts as

Trustee, Guardian of Orphan Children and Administrators of Estates.

It makes a Special Business of this line of work, and with an experience of eleven years, a thorough knowledge of the duties incident to the handling of estates, and the absolute immunity from loss which is guaranteed by its

Large Capital.

It is much better prepared to serve the public in the capacities mentioned than individuals who do not possess these qualifications. It has a

Paid in capital of \$600,000 And total assets of \$3,445,451.19

Ayer's Hair Vigor

Sometimes the hair is not properly nourished. It suffers for food, starves. Then it falls out, turns prematurely gray. Ayer's Hair Vigor is a hair food. It feeds, nourishes. The hair stops falling, grows long and heavy, and all dandruff disappears.

My hair was coming out terribly. I was almost blind to comb it. But Ayer's Hair Vigor promptly stopped the falling, and also restored the natural color."—Miss E. G. K. Ward, Lansing, N. J.

For Poor Hair
