Salisbury Boys At the University.

The high standing in class of our boys at Chapel Hill, this year, should be a source of pride and gratification to the citizens of our town; for they received the very highest honors in their classes. North Carolina College Gets \$300.

It will be remembered that Mrs. Catherine Keesler, of this county, died in Iredell several months ago. There were certain mysteries about her death which caused suspicion of poisoning. There were also complications about her will that invited litigation.

The suspicions of poisoning were displaced and now the will has been amicably disposed of.

Mrs. Keesler bequeathed a share of her estate to the North Carolina college at Mt. Pleasant. A compromise which has been effected gives the college three hundred dollars.

The City Fathers Meet.

The other business transacted was of no special importance to the public.

Dr. Murdoch will be President; Mr. Pike, of New York, will be one of the Directors. A subscriber in Massachusetts has been named as another Director, but his name has been withheld until his acceptance of the office has been obtained. More specific information will be given by the President to those who propose to subscribe.

What Can Be Seen.

The first thing that catches the eyes of the hundreds of visitors to the new Southern shops when they pass the little clump of woods just this side of the railroad grounds are the great slate roofs of those massive iron buildings. Then we see a regular network of teams, carts, wagons, plows and large iron scoops each drawn by two mules, all busy as bees, grading off more ground. The nearer we get the larger the buildings look, until we come right at them and then we see three enormous iron and steel buildings, all built on the same plan. Just this side of these is the round house, also built of iron, and having a capacity of holding 15 engines at once, and out in front of this is the pit for the turntable.

The work of laying piping from the river to the shops will soon begin, and also we will see a large force of hands at work erecting the big iron bridge over the Yadkin river for the double tract between Salisbury and Greensboro.

It is indeed interesting to watch the different departments of the work that is going on, and it is with pride that our people look at the work that the Southern railway is doing among us, and we believe the time is near at hand when Salisbury will be the greatest railroad center between Washington City and Atlanta, Ga.
