

PERUNA Summer Colds Weaken

They are even more dangerous than winter colds, for they hang on so long that they become chronic catarrh. Heat and dust aggravate them, cause the infected surface to spread, and fill the body with systemic catarrh. Neglect costs health and energy.

PERUNA EXPELS CATARRH

It does more—it builds up the weakened system, regulates the digestion, removes the inflammation, overcomes the poisons of catarrh, and invigorates all over. Forty-four years of success proves its great value, of which thousands gladly testify.

Accept the verdict of two generations yourself. Don't be swayed by prejudice, when your health is at stake. Take Peruna and get well. Liquid or tablet form, whichever is the more convenient.

The Peruna Company, Columbus, Ohio

PHYSICAL TRAINING TEACHERS IN DEMAND

Young Men and Women about to be graduated from High School should consider this beautiful, useful, dignified and profitable profession.

By recent legislation Physical Training is made obligatory in every school in New York and New Jersey. Penn., North and South Carolina have bills pending.

Send for Catalog of the only school of physical education chartered by the University of the State of New York. (Under the Regents)

THE SAVAGE SCHOOL FOR PHYSICAL EDUCATION

310 West 107th Street, New York City

UNIVERSITY HOLDS COMMENCEMENT SOON

The State University Will Hold its 122 Commencement June 3-6—Governor Bickett Will Be Present and Secretaries Baker and Daniels Also.

Chapel Hill, May 28.—The University of North Carolina will hold its 122nd commencement on June 3-6, 1917. The plans provide for a great patriotic celebration on the last day, June 6, with Hon. Thomas W. Bickett, Governor of North Carolina, and Secretary of War, Newton D. Baker and Secretary of the Navy, Josephus Daniels as the chief speakers on the program. Secretary Baker will make the commencement address, while Governor Bickett will deliver the diplomas to the seniors still left in college and Secretary Daniels will conduct the exercises in presenting diplomats to those seniors who have already enlisted in some form of military service. Half of the class belongs to the latter group, most of them having entered Fort Oglethorpe camp some weeks ago.

Dr. Walter W. Moore, of the Theological Seminary, Richmond, Va., will preach the baccalaureate sermon on Sunday, June 3, while Rev. W. D. Moss of Chapel Hill will conduct the vespers services in the evening. Monday will be given over to the senior class, and the usual class day exercises will be held. In the morning the oratorical contest for the Mangum Medal will be the chief event. The Literary Societies will hold their anniversary meetings on Monday night.

Many classes will hold reunions this year, and it is expected that these gatherings will be large, in spite of war conditions. The sixty year class—1857—will hold a reunion which will be one of the features of commencement. The class of '67 will also be on hand. The classes of 1897 and 1902 are planning reunions on a big scale, and the old South Building will be turned over to 1902. Tuesday is set aside as Alumni Day. General Julian S. Carr will preside over these exercises. The usual alumni luncheon will be held. Commencement will be devoid of the usual social features, however, with the exception of the class reunions. President Edward K. Graham will speak to the alumni on "The Alumni and the University; Review of the Year 1916-17."

President Graham is inviting the people of the state to attend the commencement exercises and help make them a great patriotic event for North Carolina. The messages that the Secretary of War and the Secretary of the Navy will bring are sure to be important at a time like this.

The University is seeking to ascertain from all students what their plans are for the summer with the desire of placing them, if possible, where they may be of most direct service to the government. The students who are under military age or have fallen below the standard of military fitness have been asked to give the following information in order that persons or firms in need of labor may be assisted: (1) Name, age, class, summer address; (2) Previous training in productive labor; (3) Do you expect to be occupied this summer; (4) Do you expect to return to the university in 1917-18? (5) If not, how do you expect to be occupied next year? (6) Are you willing to undertake during the summer some form of productive work that directly or indirectly promotes the interests of humanity in the present war?

DEATH TOLL FROM THE SUNDAY STORM MOUNTS.

Nashville, Tenn., May 29.—Seventeen are known to be dead in Tennessee as a result of Sunday's storm. Seventy in Kentucky.

Paducah, Ky., May 29.—According to apparently reliable reports the death list in the four Kentucky counties affected by the storm of Sunday will probably exceed 70. Sixty-seven are known to be dead, from official reports last night, and it appeared that probably this number would be increased when the complete checking of losses in the outlying districts had been made.

Continues to Mount in Alabama.—Birmingham, Ala., May 29.—The death toll of Sunday night's storm continues to mount as more details come in from various counties and as the injured succumb in the local hospitals. Fifty lives are now known to have been lost and the wounded list is above 206, of which a half dozen or more are perhaps fatally injured.

Funeral Day in Illinois.—Maton, Ill., May 29.—Maton and Charleston buried many victims of Saturday's tornado today. Throughout the day streets and roads to the cemeteries were dotted with funeral processions. All were buried privately, it being planned to hold public memorial day exercises in each community tomorrow.

HENRY MORGENTHAU AT RALEIGH.

Former United States Ambassador to Turkey Delivers Address to Graduates at N. C. State College of Agriculture & Engineering.

(By Associated Press.)

Raleigh, May 29.—Henry Morgenthau, former United States ambassador to Turkey and treasurer of the Democratic National Committee during the recent campaign, was the principal speaker at the commencement exercises of the North Carolina State College of Agriculture and Engineering. Mr. Morgenthau selected as the theme of his address the plea that graduates do not be content to be mere nobody and in concluding declared it was better for man to live a few years of usefulness than decades of idleness.

Seventy-two seniors of the college graduated but only about half of this number were present, the remainder being at the officers training camp at Fort Oglethorpe, Ga.

LITTLETON YOUNG MAN KILLED BY LIGHTNING.

Littleton, May 28.—Will Riggan, a promising young man living near Aurelian Springs rose early Sunday morning, and seeing a cloud arising went to a nearby field to get his coat, which contained some value papers. As he was passing under a tree the lightning struck the tree and killed him instantly.

Not returning as soon as his father thought he ought to, he went out to look for him, and was horrified to find him lifeless under the tree, his body badly burned. He leaves his father and mother and two brothers.

AMERICAN FETES IN FRANCE.

Under Official Auspices to Celebrate U. S. Entry Into War.

Fontainebleau, France, May 28.—The first of a series of Franco-American fetes, which will be held in various regions of France with the double object of celebrating America's entry into the war and benefiting crippled French soldiers, was held here yesterday. The fete, which was held under the auspices of the prefect of the department of Seine-et-Marne, senators and deputies from the department and the local authorities, attracted 20,000 persons and realized a large sum for the disabled soldiers.

After the celebration American Ambassador Sharp reviewed a parade of a thousand school children who carried American flags and who sang the American and French national songs.

A woman can have a lot more fun planning a trip with her husband than he will ever let her have in taking it.

A RAGE RIOT IN EAST ST. LOUIS

Mob of Two Thousand Went Through the Negro Quarters and Shot One, Beat Many.

DROVE NEGROES ACROSS INTO MISSOURI CITY

Infantry Called Out and Strikers Run Amuck After Negroes Brought in to Take Place.

East St. Louis, Ill., May 29.—A mob of perhaps two thousand people went through the negro quarters last night, shot one and injured others. A score of negroes were beaten into unconsciousness and they were driven across the river into St. Louis, Missouri early today.

The assault began when it was reported that a white woman had been insulted by a negro. A white man held up after the committee from the Central Trade Union had called on the city council and made a protest against the importation of any more negroes from Southern states into St. Louis. Shots were fired at frequent intervals but only one is known to have been hit. He fled to St. Louis and was later found in an unconscious condition with wound in the head and three ribs broken. All negroes were searched and where they had arms they were beaten unconsciously.

The negroes were given refuge in the county jail and at midnight it was estimated that 2000 persons surrounded the jail and threatened to storm it. The mob was dissuaded and made a rush into the business section of the city and all saloons were searched. Several negro saloons were wrecked and the police closed all saloons. The riot call brought out all of the police force, but the mob went unchecked.

The sixth infantry company was put under arms, but took no active part in the situation.

Many men have been idle on account of strike and it is estimated that eight thousand negroes have been brought here for the South to take the place of these strikers. The men began to disperse shortly after midnight and at 3 o'clock the city was quiet. Further outbreaks are feared by the police if the negroes attempt to take the place of the striking workmen.

Mayor Mollman today directed that the sale of fire arms and ammunition be stopped until all danger of rioting has passed. The mayor said 6,000 negroes had come to East St. Louis within the past six weeks. He also asked the railways to discontinue hauling them from the South and said he would request employees not to attempt further importation of blacks. The city is quiet today.

To prevent further rioting Governor Lowden today ordered four companies of the Illinois National Guard to the scene of the trouble.

SHIP BUILDING BEING REVIVED

Evidence That the Industry Will Be Rejuvenated Along the North Carolina Coast.

TWO LARGE CONCERNS GET A CHARTER AT RALEIGH

Elizabeth City Ship Building Concern Chartered to Build and Handle Ships.

(By Associated Press.)

Raleigh, May 29.—Charters for two business enterprises for the eastern portion of this state were issued today by the Secretary of State with a capital stock of \$350,000.

The Elizabeth City Ship Yards Company, of Elizabeth City, is chartered with a capital of \$100,000 and will engage in ship building and repairing and will conduct a general marine business.

The organization of this concern is taken as indicating activity along the coast of North Carolina of shipbuilding which is general throughout the nation at this time, and that ship building is to be revived along the North Carolina coast.

The other concern chartered was the Southern Land and Timber Company, of Kinston. This concern proposes to deal in land and mortgages and other properties. It has a capital stock of permitted of \$250,000 and \$200,000 of this is paid in.

Washington, May 29.—Men who claim exemption from the army draft on next Tuesday will be required to make full explanation later why they should not be called, according to an announcement today by Provo-Marshal Crowder. Public authority will determine the exemption in each case and the exemption in each case will be based on the second explanation which will be more full than the brief explanation made on Tuesday.

All married men who believe they belong to the class which may be exempt will make the required registration and the explanation later.

All men between the ages of 21 and 30 inclusive, must register regardless of their claims to exemption, unless they are already in service as soldier, sailor or officer.

Men past 31 years of age should not try to register because they will be refused and such action will only tend to confuse the system.

ENGLAND STAKES LAST DOLLAR ON DEMOCRACY.

"And if Democracy Fails, Britain and Her Possessions Will Be Bankrupt," Balfour Declares.

Ottawa, May 28.—Arthur James Balfour, British minister of foreign affairs and head of the mission sent to America, in an address late today before the two houses of the Canadian parliament, declared that the British empire had "staked its last dollar on democracy," and that if democracy fails, England and her possessions will be bankrupt indeed, Mr. Balfour adds, however, that he knew democracy would not fail.

"I know the democracies of the old world and the new will come out of this struggle, not merely triumphant and strengthened in their own inner life, more firmly convinced that the path of freedom is the only path to national greatness," asserted Mr. Balfour.

Mr. Balfour charged that "autocracy, entrenched in the central powers, precipitated the war to gain domination of the world. Democracies near and far, he added, aligned themselves in the battle to resist autocracy.

Premier Borden, in introducing Mr. Balfour paid a tribute to the United States.

EMPEROR CHARLES, REFORMER

Copenhagen, May 27.—The Austrian parliament's meeting this week signifies a shift from the dictatorship, whereby the country has been ruled during the war, to a form of constitutional government. The young emperor in this, as in the electoral reform crisis in Hungary, seems determined to make an attempt at rule with the consent of the governed in place of the autocratic system symbolized in the names of Count Tisza and Baron Burian.

It is an open question, however, whether these indications of his good will and his personal appeals for harmonious co-operation will be enough to reconcile the warring nationalist factions and unite the Poles, Germans, Bohemians, Serbs and others efficient for productive work in the Reichsrath.

WAR-TIME SUGGESTIONS.

Raleigh, May 28.—There are several ways of considerably increasing food and feed crops at this season of the year without much added labor by way of preparation and soil cultivation of crops. The following suggestions are given by the Demonstration Division to help out in the matter:

1. Lima beans (butter beans) may be planted along the garden fence and other fences, in corners and out-of-the-way places, with the addition of considerable beans, without much extra labor.
2. On good rich land cornfield beans may be planted between hills of corn, this obviating the necessity of staking them by allowing them to climb the cornstalks. Practically no extra cultivation will be needed.
3. A few more rows of snap beans should be added. They may be kept green in earthen jars by covering them with a brine made in proportion of 1 3-4 pound of salt to 1 gallon of water. Many should also be dried and kept for winter use.
4. Field peas may also be planted between the hills of corn and make good yields and good nutritious food. No other cultivation will be needed than that given the corn.
5. Farmers who have stubble land where grain is now growing should make arrangements to plant several acres in one or more of the several desirable varieties of commercial fertilizer with not over 1 per cent of nitrogen will increase the yield very much.
6. Suth stubble land is also almost ideal for sweet potatoes. The stubble and grass turned under help to keep the land mellow and will help to hold moisture. Potatoes should be a very profitable crop under present conditions. The seed are not high in price and then the slips have made vines and the vines can be cut for further propagation. It usually pays to apply a goodly amount of fertilizer to potatoes.
7. And last, but not least, do not fail to plant one or more acres to Velvet beans—that great soil renovator and producer of humus and nitrogen. These beans may be planted among the corn like peas, etc. If labor is scarce in the fall the hogs may be turned in, and may even be allowed to harvest the corn. Very little attention need be given them when in a field of soybeans or Velvet beans planted with corn.

REGISTER AND THEN EXPLAIN

This is the Announcement of the Rule for Tuesday's Resignation for the New Army Draft.

MEN 21 TO 30 INCLUSIVE REGISTER REGARDLESS

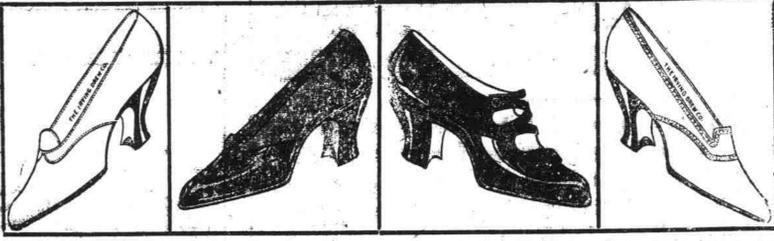

If They Claim Exemption They Must Later Make Full Explanation of Their Reasons.

"SHOE STORE AHEAD"

"HIGH GRADE REPAIRING"

CUBAN PRESIDENT VETOES SHIP BILL.

Say That the Shipping Industry is Without Many Good Shippers and That Bill Would Hurt the Trade—Bill Was Inspired by Ambitious Navigators.

(Correspondence Associated Press.)

Havana, Cuba, May 28.—President Menocal has vetoed a bill recently passed by the Cuban congress, which provided that no ship under Cuban registry should be cleared from any port of the republic unless the captain was a native or naturalized Cuban citizen.

In vetoing the bill President Menocal stated this country is without a sufficient number of experienced navigators to have such a law on its statute books, and that to put such a law in operation would work serious injury upon the republic's small merchant marine and probably would result in compelling owners of the several large ships now sailing under the Cuban flag to transfer their registry to some other nation.

The measure is said to have been inspired by ambitious Cubans who have been studying marine engineering, in the hope that they might be able to become commanders of the several interned German ships, recently seized by the Cuban government when diplomatic relations were broken off with that government.

Mother Has Earned This Comfort and Convenience

You would not knowingly deny the mother in your home any comfort or convenience that you are able to provide.

Then why have you overlooked the biggest improvement of all—good light? The one modern farm convenience that will lighten her labors—and add to her happiness and pleasure each day of her life.

Pilot-Carbide Lighting and Cooking Plants

have totally changed the old-fashioned methods of house and barn lighting and cooking in the country home.

300,000 "mothers" in farm homes all over the country today are enjoying these benefits:

Fine bright lights in every room. Safe lights, no matches needed. Convenient lights which eliminate all the disagreeable labor of caring for old-fashioned lamps and lanterns—

A gas cook stove in the kitchen—as convenient as gas stoves used for cooking in practically every city home in the world. Like city gas it does away with the bother and work of handling coal, wood and ashes. You have a fire that is always ready—lighted instantly and which can be controlled to a degree by turning the valve up or down—

A self-heating flat iron—always hot. A convenience that cuts the work of ironing day in half—enabling you to do better work in quicker time and in greater comfort. No hot stove—no roasting kitchen—the heat is all in the iron.

The PILOT is bringing all these comforts and conveniences to "mothers" in other country homes.

Consider your women folks. They are the ones that have to spend half their days in the grime of filling, cleaning and carrying lamps about the house—in slaving away their life and health over hot, cranky stoves.

Ask the "mother in your home" how much this beautiful, clean, always-ready light—a real gas stove and gas iron—will mean to her.

Ask yourself if she has not earned this comfort and convenience—when you consider its low cost—a thousand times over.

Then send for our illustrated catalogs and descriptive booklets giving all the facts. Do this today.
