The bill is so written that no white man, whether or not he can read or write, will be disfranchised provided he has a legal right to will not effect the white voter and which is as follows:

Every person presenting himself for registration shall be able to read and write any section of the constitution in the English language and before he shall be entitled to vote he shall have paid on or before the first day of May of the year in which he proposes to vote his poll tax for sided and no lineal descendant of full-fledged Republicans." any such person shall be denied the cember 1, 1908.
