NO. 99.

STORE ENTERED.

Thief at A. W. Northern's—Watch and Other Things Stolen.

A thief broke into the store of Mr. A. W. Northern, near the city limits, early yesterday morning. The robber entered the building by the front door. He had stolen a hatchet from Mr. J. P. Trexler's blacksmith shop, with which he battered his way into the store.

A watch and other articles of merchandise were taken. The show case was carried out on the sidewalk and thrown down and some of the goods were scattered about the room.

Neither of the family heard the noise made by the rascal, but it is thought the robbery was committed about 2 o'clock in the morning. Mrs. Northern thinks the theft was committed by a negro man, but she has no certain clue.

STEALING BRASS.

A Habit Which Is Growing In This Community.

The small boy of color is getting very much in the habit of stealing brass and his white neighbor is not altogether faultless in this particular.

Recently an engineer, after oiling his engine on the Southern yard, found that several caps from oil cups were missing. He found a little negro and grabbed him by the coat. The boy run out of this garment, however, and escaped. In the coat pockets three caps were found.

Another engine was robbed of caps and these were found after they had been sold.

ECHOS FROM GRAND RALLY.

Mr. Vanderford Complimented—Mr. Aycock Proud of Reception.

The big rally and speech of yesterday are the chief topic of conversation to day. Many say the speech was the finest they ever heard.

H. E. C. Bryant wrote the *Charlotte Observer* from Salisbury: "Mr. Aycock is proud of the reception he was tendered here to-day. There were more ladies out to hear him here than anywhere he has been yet. The fact that the preachers and the women of the State are so deeply interested in the speakings is a good omen."

"As Col. John R. Morris left the speaker's stand to-day, after Mr. Aycock had concluded, he remarked to some man whom he did not know that the peroration of the speech was the finest he had ever heard. The fellow said: "Which one?" That was eloquent and just praise. The whole speech was fine."

A number of pictures of the parade were taken. Several good views of the pretty truck of the firemen were secured. There were about twenty little girls on this float, chaperoned by Miss Reid Carter, who rode on the rear, while Miss Susie Capps rode in front and handled the ribbons. Master Ray Glover was on the float with his little bicycle.

MR. VANDERFORD THANKED.

I wish to publicly express my thanks to Mr. T. H. Vanderford for his valuable services in arranging and assisting in the execution of all the details connected with the great rally here yesterday. Every Democrat who witnessed this magnificent demonstration could but feel a pride in the fact that he had membership in an organization composed of three-fourths of the white population of Rowan county and it was due to Mr. Vanderford's tireless activity that such a demonstration was made possible.

A BAD EXPLOSION.

A Salisbury Piston Head Bursts and Injures Four Charlotte Men.

The Salisbury Ice Company has recently had some trouble with a piston rod which had become bent where it enters the head. The piece was sent to the Mecklenburg Iron Works, at Charlotte, to be straightened. The head on all the rods was a piece of iron weighing over three hundred pounds and measuring six inches thick and sixteen inches in diameter. This was heated yesterday so the rod could be gotten out. After it was taken from the furnace and put on the ground there was a tremendous explosion and the large iron head flew to pieces and scattered all over the shop. The accident resulted in the serious injury to C. M. Bell, a machinist; W. W. Severs, a blacksmith; Arthur Frazier, a striker and the blacksmith's helper, and slight injury to Peter Crawford, a colored yard hand.

The *Observer* says: "Severs had his left leg broken between the knee and ankle, his right leg slightly cut and one finger was broken. His shoes were cut to pieces. Arthur Frazier had a compound fracture of his right leg between the knee and ankle, and was also cut on the face and head. Peter Crawford, who was standing a few feet from the forge, was slightly burned on the face and arms. Mr. Bell was the worst hurt of the four men. He was standing by a pulley lathe, 12 feet to the left of the rod, when the accident occurred. A large piece of the piston head, curved in shape, struck his left leg just below his hip. The iron penetrated the flesh to and past the bone, laying open the flesh and muscles in a jagged, ghastly wound. The piston rod was used in the ammonia pump and it is thought the ammonia gases that had seeped into the iron, expanded under the heat and that this caused the explosion. The iron works will soon have another piston ready for the ice company. In the meantime, however, the factory continues to run and supply its patrons with ice."

There will be public speaking to-night at Barger's school house in Providence township. Mr. R. Lee Wright will speak. There will also be a speaking at Ellis' school house in Franklin township Saturday night. Mr. R. Lee Wright and others will address the meeting and organize a white supremacy club.
