SALISBURY, N. C., JULY 9, 1901.

NOT PROGRESSIVE.

The SUN yesterday stated that the aldermen, through a committee appointed to look after the matter, had decided to discontinue opening up new streets. The cause for this decision was given that the cost of such streets on the basis of the prices asked by property owners would cost \$10,000, hence it was deemed best to stop the work. We said, too, that it was stated that many property owners had put an excessive value on their lots through which it was proposed to run the streets.

This is a regrettable fact and is a condition that ought not prevail. At a time when Salisbury is building up and progressing the citizens should do all they can to push forward the interest of the town. In placing too high a value on property the citizens certainly are standing in their own light from a business and financial view.

The extension of the streets would increase the value of other property along the extended street belonging to the parties selling, besides adding largely to the town, and the citizens are making a mistake in asking too much for their property.

It is to be hoped that property owners will see their error by offering their lots at reduced prices and that the aldermen will reconsider the matter and proceed in opening up streets again.

It is estimated that Americans \$500,000,000 annually on their Summer vacations.

The Atlanta Journal mentions the painful fact that "no sooner does an Ohio Republican convention throw a bouquet to the negroes than a mob of Ohioans go out and try to throw a rope over a few of them."

Dog owners in Tarrytown, N. Y., are beginning to complain because an ordinance just passed provides that "Any owner of a dog found at large without being muzzled will be subjected to a fine of \$10."

About the worst case of ingratitude on record is reported from Chicago. A dog saved a boy from drowning by dragging him from the lake, but in doing so skinned his ankle a little, and the boy's mother had the police kill the dog for biting him.

The Asheville Citizen reports that Secretary Wilson is deeply concerned over the denuding of the forests and is earnestly in favor of the Appalachian Park. He thinks "the entire mountain range, for a distance of at least 150 miles and 50 miles in width, should be placed under government supervision. The secretary and party are now at Mt. Mitchell. His visit to Western North Carolina will produce some very beneficial results.

The discovery of fuel oil in Texas in such large quantities, is having a perceptible effect upon the price of coal in that section. Referring to this matter, the St. Louis Republic says: "For instance, one railroad that furnishes coal to Mobile has reduced the price from \$1.75 to \$1.10 a ton. New Orleans has had the price of Alabama coal reduced 60 and 65 cents a ton by the competition of Texas oil. Every point in the South where Texas oil has gone has received reductions in the price of coal. These figures verify the bright prophecies that were made when the gushers were discovered. Just what may be ultimately expected, the change that has taken place in California predicts. California railroads used 2,000,000 tons of soft coal last year, costing about \$10,000,000. All the roads are now equipping their engines with oil burners. Estimates fix the number of barrels of oil that will be required at 7,000,000 costing \$5,000,000."

Never Lose Their Religion. "It has been too much the habit of the majority of the good people of Philadelphia," observes the Philadelphia Record, "to put aside personal responsibility for the fostering corruption of our political management and find refuge against the sting of conscience in their stanch Republicanism and the high aims and achievements of the grand old party."

Near Douglas, Ga., Jake Devoss, a negro laborer was working a team of mules yesterday. The mules balked and the negro flew into a rage. He went to the house, got a Winchester rifle and shot both mules dead. Devoss' wife expostulated with him, and he turned the rifle upon her, inflicting a wound which may prove fatal. James McKinnon, who owned the mules, and his brother, Charles, attracted by the shooting, started for the scene. The infuriated negro saw them coming and began shooting at them. Charles McKinnon was instantly killed and James McKinnon was so badly wounded that he will probably die. Then Devoss escaped to the swamps. The county authorities were notified and started in pursuit of the murderer with bloodhounds. More bloodshed is looked for.
