### NO FUN TO BE A CZAR

Bill Nye's Dissertation on Some Discomforts of Royalty.

Greater Privileges Which American Citizens Enjoy.

If anything could reconcile the average American boy to the fact that he is not a Czar, says Bill Nye in the New York World, it would be the late story of Mr. Strakosch to the effect that His Imperial Majesty once, when Czarowitch played a French obligato to the song given by Mme. Nilsson, and that years after, when he had become a fullblown Czar, the orchestra affected him to tears for it brought back the memory of that blessed time when he did not have to put on a sheet-iron overcoat to go out and get the morning paper.

Happy indeed was this great man with his French horn and his portfolio as Czarowitch, living from hand to mouth, than in after years as a thirtysecond degree Czar with a mighty Empire under his thumb and a fractious bomb under his throne.

Greatness brings with it newspaper criticism, loss of appetite, languor, cold feet and death. And even in death a great man does not stand much of a chance. Relic-hunters come and try to break into his grave and carry fragments of his system away to remember him by, and the historian criticises him to his heart's content.

For this reason we ought to appreciate a country where we need not be great if we would rather not. A Czar really has no alternative. When he dis covers that he is a Czarowitch he knows that it is good-by, John, as the Russians have it. Here the rules are less severe. A man may escape greatness for years and years. He may be President of the United States to-day and promoting pullets to-morrow.

The utmost latitude is given to an American. He can not only abstain from being great, but after he has been great, our people will excuse a man and allow him to insert himself into obscurity again in case he feels more comfortable that way. But the Czar hand

chance. He really has no fun at a As soon as he discovers that his lineage is high he is open to criticism, and cannot do anything undignified.

A Czar who would play shortstop in a picked nine, or go about the country delivering a humorous lecture, would be ostracized. Many a long, hot summer day he has to stand on a big red throne and reign, while mediocre men go fishing. Just as he thinks he is alone, and takes off his hot, ermine-trimmed robes, thinking he will sit in his shirt sleeves and play a few strains on his French horn, a courtier comes in and, making a low abeisance, states that he has a ukase which ought to be issued in time to catch the 2 o'clock mail.

Then it is disagreeable for a man to be a Czar and suddenly find himself the parent of a grand duke whom he don't exactly feel at liberty to spank! No man really wants to spank a grand duke, no matter how little he is. As Americans, we do not fully appreciate the blessings of freedom which are denied to a Czar. Czarinas also have a pretty hard row to hoe, to use an Americanism. They have to meet all the social demands that are made upon them and entertain neighboring potentates, see that they have hot water and clean towels in their rooms while visiting at their houses, and show them the best places to trade while in the city. They also have to have general oversight of the children, so that their distracted country will not run short of a mon-

It is no uncommon thing for a Czarina to say to a visiting dynasty: "Excuse me a moment, Your Royal Altitoodleum; His Nibs the Grand Duke has just informed me that Her Eminence the Grand Duchess, his sister, has got a Lima bean up her nose.

### The Telautograph.

A wonderful account of the telauto graph of Flisha Gray, the electrician, is brought from Paris. The principle of the device is analogous to that of the telephone, and consists, briefly, of a plaque on which is laid the paper for writing the message. As the writing is done, the plaque vibrates under the pressure of the instrument used, which may be a pen, a pencil, or any other pointed article, and a similar i strument at the other end of the line acting synchronously, reproduces exactly what is written at the station of transmission, so that not only the words of the telegram but the reproduced writing of the sender will be put into the hands of the receiver. The advantages are so apparent that it is hardly necessary to name them. The telautograph is nearly finished, and it remains to be seen whether it will, in actual use, prove equal to the claims its inventor makes for it .- Detroit Free Press.

## Disillusioned.

"No, Mamie," said a fair-haired girl with an air of tender melancholy." "I shall never love him again. It is all

"How can you say so, Gertie? He is ror ag, rich, loves you devotedly, and my such a beautiful, long, silken, heavy mustache---

"His mustache! O. don't speak of it, I implore you! I saw him once, Mamie, just after he had taken a drink of buttermilk!"

And the two friends shuddered and sat close together, looking silently into the fire, while their shadows danced fitfully on the wall and the wind moaned dismally through the ghostly trees on the outside ... [Chicago Tribune.

#### A Remarkable Flock of Sheep.

Mr. L. J. Jenkins, Dresden, Germany, in treating upon the merits of the Saxbelow the ocean level and where canals on Merino Sheep, writes, in the American Agriculturist:

"Perhaps the most remarkable flock of Merino sheep in the world is to be found plentifully than in England. Irish cows at Leutewitz, near Meissen, in Germany. are generally good milkers, though they | Here have been bred for four generations have not heen developed as a distinct of men the descendants of the famous breed. In our own country we find that importations of Spanish Merinos to where dairying continues long it must Saxony in 1765 and 1778. Like all other true Merinos, these were in the running brooks, where succulent food beginning small and hardy animals, is given through as large a part of the yielding a small quantity of very fine year as possible. Without doubt the wool, but having no great value as mutincreasing use of ensilage as Winter ton. Now they average in weight: feed of cows will in time have an apprerams, two hundred and twenty to two ciable effect in breeding a race that will hundred and sixty-five pounds, and be better milkers than could have been ewes, one hundred and forty-five to one hundred and seventy-five pounds; and the unwashed wool: from rams, seventeen to twenty-three pounds, and from ewes, thirteen to fifteen pounds. In the mutton, the fat is well mingled with the muscle, and not accumulated in intural Society, last winter, states that edible masses, and its quality is now regarded as approaching the Southdown. The unsurpassed fineness of the Saxon

fleeces is recognized everywhere. "These results have been accomplished through a firm purpose, persistently carried forward during a period of eighty years. Although soil and climate have favored the development of these sheep, the chief success is due to the intelligence and persistence with which the original plan has been followed. Neither was ascribed to the potash, Pyrethrum the present proprietors, nor the generis recommended as the best remedy, ations before them, have ever allowed any other interest to interfere with the purpose which from the beginning they had set before themselves, viz., to breed the perfect sheep and to obtain in every animal the largest possible quantity of wool upon a frame easily fatcosting fifty cents, was enough to cover | tened."

Remarkable Tree Culture. Ex-Mayor Harrison writes to the Chicago Mail from Japan, as follows: The skill of these people in tree culture is even more surprising than that shown in flori-culture. The latter is not so novel to the average American. He has seen at home the little wild rose worked up into the huge and perfect jacqueminot. He has enjoyed the delicious odor of the rose peony transformed from the rank-smelling, oldfashioned plant, and is ready to comprehend any monstrous metamorphosis among flowers. But when he sees here an old pine tree with guarled and bent branches, its whole appearance the exact counterpart of the ancient monarch of the mountain side-when he same throughout the year, and as good sees this old looking, perfectly healthy as any to be found in market. Now and thrifty fir, 100, 200, and even this extra five cents is all profit, and and 400 years old, growhe is entitled to it. Nor is that all the ing in a flower pot four feet profit, for when once a customer is obtwo feet wide, tained it is usually for a whole season, not two feet deep, he hardly knows and a market thus opened for other whether he be most interested in the produce. In this way much time is skill evinced or amused by the grosaved in marketing, and middlemen tesqueness of the idea which suggested entirely dispensed with. It brings him the thing. Such a tree as this I have in the cash and thus enables him to buy seen. Its whole height was not five where he can get the most for his money, feet, and its gnarled branches did not which is another profit he reaps. It is cover an area of eight feet. I asked always best for a farmer to establish a its age, and was answered 450 years. reputation for selling a good article in Near by were dozens of smaller ones in order to get his full share of the profit pottery vases, perfect in form-some or anything he has to sell. Another round and bright as the denizens of the thing, a farmer, in order to make ready rich bottom land. Others, queer looksale of any kind of produce direct to ing, odd old lilliputians, that made one the customer, should establish a reputhink he was viewing an old ancestor of tation for honest dealings, i. c., never centuries ago hanging from a rocky representing an article to be a little crag; that he was looking at it through better than it really is, for confidence the reversed lenses of a powerful field once lost is never regained .-- [Baltimore glass. I ask: "How old is that?" "It was planted by my father fifty-

two years ago." The Length of Roots.

> "And that?" "My grandfather put it in the pot

eventy years back." "And this other here that looks as if it had been watered from the fresh-

water tank in Noah's ark?" "Ah, that is a beauty-and is the pride of my garden. It was transplanted when no taller than my little finger by my great-great-great-great grandfather, nearly 200 years ago. He diminished rings of manure. The bad spat upon its roots. He is a good d advice founded on this wrong view is now, and his soul sits among its are branches every day and blesses his children." And the good man folded his hands and looked as if he felt that the spirit of his ancestor, now one of his household gods, heard his pious words.

Iowa lawyer --- Nothing.

Lady-Why, how cheap! [I always thought it took piles of money. that roots generally extend to a distance Lawyer--- Money? Oh! it will cost you just \$200 counsel's fees. I thought you were asking about the cause. Chicago ciety, Professor T. J. Burrill mentions Ledger.

#### Chinese in Mexico.

The establishment at Acapulco of a Chinese commercial house to supply Mexico with Chinese and Japanese goods, is in the direction of a revival of the ancient direct trade which is supposed to have once existed between Mexico and Eastern Asia. The Mexican Financier, unlike our hoodlums here, is not disposed to meet the enterprise by howling out that the "Chinese must go." It anticipates the building up of a profitable trade in some lines. "Oriental fabrics, lacquer work, fans, etc.," it says, "could probably be easily introduced here at prices which must be considerably lower than these now charged for similar goods. Payment could be made directly n Mexican dollars."

#### Queer State of Things.

A curious complication has arisen in consequence of the murder of the Woolfolk family by Tom Woolfolk, near Ma-con, Ga., which was one of the most revolting tragedies of this generation. The murderer now lies in jail under sentence of death, and he has been approached by the heirs of both his murdered father and mother. No one but the condemned man knows the particulars of the crime. If he killed his father first, his mother's heirs will come into the property; but if his mother died first, his two surviving sisters and himself succeed to the property. A full confession from this monster is expected before his execution, in order to clear up this point.

#### Sensible Views.

Elbridge T. Gerry, president of the New York Society for the Prevention of Cruelty to Children, has sent to the New York state factory inspectors some sug-gestions for amending the child labor laws. He recommends that no child under 18 years of age be employed in a factory without previous medical examination; that no child under 16 shall be employed in factories where there is risk of injury in the nature of the employment, or where there are no fire escapes.

Ir appears that about 17,000,000 tons of coal per year is the amount yielded by the chief coal districts of Great Britain-Newcastle, South Wales and the Clyde country-and assuming this to represent the average annual consumption for many years to come, it is estimated that the British mines will not be exhausted in less than 600 to 800 years.

It is grass that will redeem and enrich the South. Good meadows and pastures mean good stock, good stock means icher farms, all together mean diversified farming, with home-raised mules. meat, corn, hay and truck, and cotton as a surplus. - Southern Farm.

THERE are nearly 1,000 women in Iowa who own farms, and give them their personal attention. Only eighteen of these farms are mortgaged.

A Thing of Reauty.

Hood's Household Calendar for 1888, as usual, leads all others in beauty and style. The most taking feature about it, because it is unique in Calendars, is that it is cut-out, as if by hand, and the bright, healthy face of a handsome young girl, with a wealth of brown hair, contrasts beautifully with her blue bonnet and strings. The head is a marvel of color printing, the flesh tints being as naturel as life. The pad is also printed in colors, with a special design for every month, and there is condensed upon it a large amount of valuable information; indeed, it has so many points of excellence that it must be seen to be appreciated.

Copies may be obtained at the drug stores, or by sending six cen s in stamps to C. I. Hood & Co., Lowell, Mass.

Cedar chips (wetted), placed in the nest setting hens will drive out lice.

The Correct Time.

There are very few men who do not pride themselves on always having the correct time; and wonderful and delicate mechanisms are devised to enable them to do so. But the more delicate a chronometer is made, the more subject it becomes to derangement, and unless it be kept always perfectly clean, it soon loses its usefulness. What wonder, then, that the human machine—so much more delicate and intricate than any work of Man—should require to be kept thoroughly cleansed. The liver is the main-spring of this complex structure and on the impurities left in the blood by a disordered liver, depend most of the ills that flesh is heir io. Even consumption (which is lung-borofula), is traceable to the imperfect action of this organ. Kitney diseases, skin diseases, sick headache, heart disease, dropsy, and a long catalogue of grave maladies have their origin in a torpid or sluggish liver. Dr. Pierce's Golden Medical Discovery, by establishing a healthy, normal action of the liver, acts as a cure and preventive of these diseases, The Correct Time.

Consumption Surely Cured. To the Editor:—Please inform your readers that I have a positive remedy for the above named disease. By its timely use thousands of hopeless cases have been permanently cured. I shall be glad to send two bottles of my remedy FRUE to any of your readers who have consumption if they will send me their Express and P. O. address. Respectfully,

humors, from a common Blotch, or Eruption, to the worst Scrofula. Salt-rheum, "Fever-sores," Scaly or Rough Skin, in short, all diseases caused by bad blood, are conquered by this powerful, purifying, and invigorating medicine. Great Eating Ulcers rapidly heal under its benign influ-

A medicine possessing the power to cure such inveterate blood and skin diseases as the following testimonial portrays, must certainly be credited with possessing properties capable of curing any and all skin and blood diseases, for none are more obstinate or difficult of cure than Salt-rheum. WORLD'S DISPENSARY MEDICAL ASSOCIA-TION, 663 Main Street, Buffalo, N. Y.:

RHEUMATISM.

Gentlemen—For several years I have felt it to be my duty to give to you the facts in rela-tion to the complete cure of a most aggra-vated case of salt-rheum, by the use of your "Golden Medical Discovery." An elderly lady relative of mine had been a great sufferer from salt-rheum for upwards of forty years. The disease was most distressing in her hands, causing the skin to crack open on the inside of the fingers at the joints and between the fingers. She was colliged to protect the raw places by means of adhesive plasters, salves, ointments and bandages, and during the winter months had to have her hands dressed daily. The pain was quite severe at times and her general health was badly affected, paving the way for other diseases to creep in. Catarrh and rheumatism caused a great deal of suffering in addition to the salt-rheum. She had used faithfully, and with the most commendable perseverance, all the remedies prescribed by her physicians, but without obtaining relief. She afterwards began treating herself by drinking teas made from blood-purifying roots and herbs. She continued this for several years but derived no benefit. Finally, about ten years ago, I chanced to read one of Dr. Pierce's small pamphlets setting forth the merits of his 'Golden Medical Discovery' and other medicines. The name struck

my fancy, and seeing that it was essentially a blood-purifier, I immediately recommended it to the old lady who had been so long a sufferer from salt-rheum. She commenced taking it at once, and took one bottle, but seemed to be no better. Hewever, I realized that it would take time for any medicine to effect a change for the better, and encouraged her to continue. She then purchased a half-a-dozen bottles, and before these had all been used she began to notice an improvement. After taking about a dozen bottles she was entirely cured. Her hands were perfectly well and as smooth and healthy as a child's. Her general health was also greatly improved; the rheumatism entirely left her, and the catarrh was almost cured, so that it ceased to be much annoyance. She has enjoyed excellent health from that day to this, and has had no return of either salt-rheum or rheumatism. The 'Discovery' seems to have entirely eradicated the salt-rheum from her system. She is now over eighty years old, and very healthy for one of such extreme age.

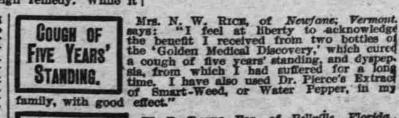

She is now over eighty years or, and extreme age.

I have written this letter, of which you can make any use you see fit, hoping that some sufferer from salt-rheum might chance to read it and obtain relief by using your 'Golden Medical Discovery'—for 'Golden' it is in its curative properties, and as much above the multitude of nostrums and so-called 'patent medicines,' so zealously flaunted before the public, as gold is above the baser metals.

Respectfully yours,

F. W. Wheeler, 182 21st St."

CONSUMPTION, WEAK LUNGS, SPITTING OF BLOOD. GOLDEN MEDICAL DISCOVERY cures Consumption (which is Scrofula of the Lungs), by its wonderful blood-purifying, invigorating and nutritive properties. For Weak

be put back where I was."

Discovery \$1.00, Six Hottles for \$5.00; by Bruggists. WORLD'S DISPENSARY MEDICAL ASSOCIATION, Propr's, No. 663 Mair St., BUFFALO, N. Y.
