

For President, 1900:

Hon. W. J. Bryan, Of Nebraska.

The editor is too unwell this morning to prepare editorial matter. His space is given to the article on dairying, taken from the Wilmington Star. The INDEX has called attention to this important subject before. No place in the State is better adapted to this industry than the vicinity of Salisbury. It will prove more remunerative than any other farming operation. What adds to the wealth of the country adds to the wealth of the city. Let our readers agitate the question.

The Dairy Industry.

There is a growing interest in the South in the dairy industry, although it can yet hardly be called an industry in this section. It has progressed far enough, however, to merit the attention of the farmers' association.

same policy that has been adopted by the Central, and will endeavor to extend the interest in dairying over the entire length of its territory, which embraces about eight of the Southern States.

"After this came a very timely talk by Dr. Nelson P. Hinkley, one of the most distinguished veterinary surgeons in the United States, who pointed out the danger to Georgia cattle from Texas fever, and the means by which the disease is to be stamped out.

The fact that was also brought out, in an address by Mr. J. M. Kimbrough of the Experiment station, that is throwing away the corn stalks of each crop, the farmers of Georgia waste annually a product worth, at the least calculation, \$1,500,000. In other words, they are throwing away about forty per cent. of the corn crop. Here is going to waste a product as big as that of the lumber and naval stores industry of this State in which millions of dollars are invested. Mr. Kimbrough also showed by the tests of actual experience at the experiment stations of Louisiana, Georgia and other States, that shredded corn is worth more, pound for pound, than cotton seed hulls, and more than timothy hay which is brought in immense quantities from the west.

So it appears that Georgia is throwing away more than \$1,500,000 worth of good forage, while she pays an enormous sum for hay shipped from the west. Ten years ago farmers laughed at the idea that corn stalks would make good hay, but this position is now taken by all well posted men.

It was also shown that the dairy industry, wherever persistently followed, has redeemed the farm from the bondage and debts of all cotton systems, and Mr. Wing, the able and enthusiastic dairyman of the Georgia Experiment station, declares that this industry will yet be the means of paying off mortgages on Georgia farms. He answered that it will eventually give the State a product worth more in dollars and cents than that of the cotton.

much more care of cattle and much more expense in caring for them. And yet the bulk of the butter sold in our southern cities and towns, and nearly all the best of it, comes from these and other western and northern states, when the reverse ought to be the case, and may be yet when our people begin to realize what there is in this industry, the advantages they enjoy in following it, and take hold of it in earnest.

There are eleven million cows in the United States furnishing milk for the dairies to make butter, cheese, etc., and with all that we have oleomargarine and other imitations of butter, because there is demand enough for it to make those imitations salable and profitable. There is always a demand for good butter and at prices that pay the maker. Every pound of good butter made in the south for some years to come could find ready and profitable market in our own cities and towns without sending it far from home.—Wilmington Star.

Story of a Slave.

To be bound hand and foot for years by the chains of disease is the worst form of slavery. George D. Williams, of Manchester, Mich., tells how such a slave was made free. He says: "My wife has been so helpless for five years that she could not turn over in bed alone. After using two bottles of Electric Bitters, she is wonderfully improved and able to do her own work." This supreme remedy for female diseases quickly cures nervousness, sleeplessness, melancholy, headache, backache, fainting and dizzy spells. Full strength working medicine is a god sent down from heaven.

will soon be adopted in every Southern State.—Raleigh News and Observer.

Prevented a Tragedy.

Timely information given Mrs. George Long, of New Straitsville, Ohio, prevented a dreadful tragedy and saved two lives. A frightful cough had long kept her awake every night. She had tried many remedies and doctors but steadily grew worse until urged to try Dr. King's New Discovery. One bottle wholly cured her, and she writes this marvelous medicine also cured Mr. Long of a severe attack of Pneumonia. Such cures are positive proof of the matchless merit of this grand remedy for curing all throat, chest and lung troubles. Only 50c and \$1.00. Every bottle guaranteed. Trial bottles free at Theo. F. Klutz & Co's. drug store.

AT WHITLOCK & RAINEY, LEADING .SHOE DEALRES.. SALISBURY, N. C.

FREE! FREE!

BEAUTIFUL SEMI-PORCELAIN WARE.

"A housewife's delight—A nicely arranged table."

Leading Clothiers.

Salisbury, N.C.

Good News to the Ladies

Of Salisbury or any other town, you can have your andirons and fenders, etc., rebrassened, lagged and made as good as new, lasts just as long. The Lacquer prevents the brass from turning dark. It is true you can have your brass cleaned at home though it will not look nice at all, and will in a short time turn dark.

BURNISHING

Cannot be done without machinery. The Finger & Anthony Plating Factory have the machinery, and will do the work at a very small cost. Give them a trial and see what they can do. They will sell you new silver ware of their own make very cheap, and guarantee same to be first-class, or they will replace your old silver at half what new cost—guaranteed to be as good. Yours to please.

FINGER & ANTHONY,
