

COME AT LAST!

THE RIGHT PRICES ON HARDWARE.

We are daily receiving our large stock of Hardware, Chattanooga & Dixie Plows, Double and Single Plow Stocks, the celebrated Stuebli and Tennessee Wagons, Threshing Machines and Horse Powers, Osborne and Champion Mowing Machines, Folding Reapers and Self Binders, the celebrated Thomas Hay Rakes, Telegraph Straw Cutters, Barbed Fence Wire, Grain and Wagon Material, Paints and Oils for Painting Houses, Corn Shellers, Buggy Drills.

We carry one of the Largest Stock of Buggies in the State and have bought 150 more that will be here in a few days. We have learned from experience that a real good buggy will sell for a small sum much better than a cheap grade will sell for a small sum, and we have now made arrangements which enable us to sell one of the best Buggies in existence at about the same price as cheap grades.

Our aim is to down the high prices on all kinds of Farming Implements, Hardware Buggies and Wagons, and give the good old farmers who support us all a showing. TO THE GOLD MINERS.

We carry a full stock of Atlas, Giant Powder, Black Powder, Fuse, Caps, Steel &c., and will guarantee prices as cheap as anywhere in the State. We pay freight on all Powder to the nearest railroad station.

LADIES DEPARTMENT.

A NOVEL WITHIN ITSELF.

THE CELEBRATED

DAVIS SEWING MACHINE,

The Lightest Running Sewing Machine Made

Does all kinds of work without any hand. There has been \$50 reward offered to any machine that will follow the Davis through its variety of work without bursting. Other agents will tell you they can do anything on their machines the Davis can do. Why don't they take in this reward, why can't they do it.

We invite all to call and see our stock through and see how ready we always are to give you low prices.

SMITH & RITCHIE,
SALISBURY, N. C.

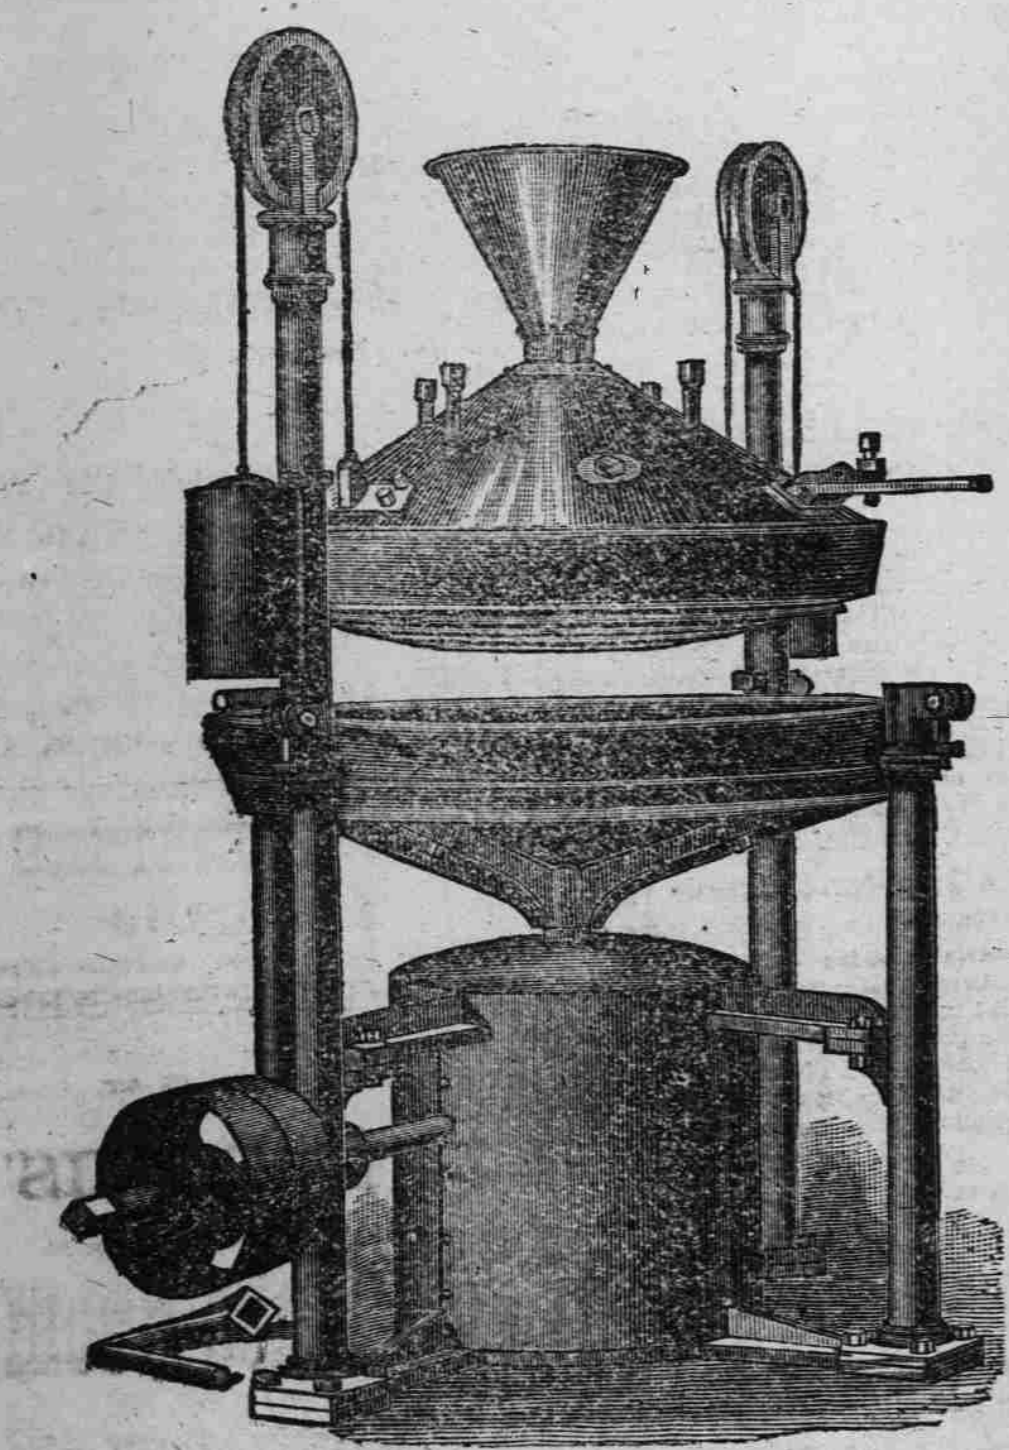

AMALGAMATOR

THAT SAVES ALL THE FREE GOLD, AT A COST OF NOT OVER 25 CTS. PER TON.

This Amalgamator is an invention whereby the pulverized pulp or sand is forced to come in contact with quicksilver in motion. Long explanations are useless. For facts, prices, etc., address,

R. EAMES, JR. & CO.,
Agents for North Carolina and Georgia,
SALISBURY, N. C.

Long explanations are useless. For facts, prices, etc., address,

DESCRIPTION.

The ore to be treated passes by means of an automatic feed through the hopper to the stationary disk, the bottom of which is covered with a series of broken riffles. Directly beneath this disk is a revolving pan containing a reservoir of quicksilver. The bottom of the revolving pan, upon bottom of which the quicksilver spreads and forms a wall round the periphery. A very thin stream of water suffices to moisten the sand or ore it falls through the hopper into the center of the pan, where it is forced backwards and forwards between and under the riffles; by this process the gold is freed from the sand or quartz by difference in specific gravity, and so brightens that it will immediately amalgamate in coming in contact with the mercury, itself kept bright by the action of the riffles. Any particles not taken up on the surface of the pan are caught by the wall of quicksilver formed around the periphery by centrifugal force.

FARMER'S COLUMN.

You may think you cannot write well enough for publications, but little facts about crops, prices, granges and agricultural interests generally can be jotted down as you would talk them to a neighbor, and when edited for print they will be very interesting to farmers in other localities.

The problem of farming consists in making the soil increasingly fertile. Manure is the farmers' savings bank, and if more of them would have large heaps of it every spring to spread upon their lands, instead of money at interest, they would prosper better in the end.

Every cord of wood used and converted into ashes is so much fertilizer that may be used on the land. Not only do ashes contain potash but also phosphoric acid and lime. If ashes be used freely it only requires some kind of nitrogenous fertilizer to be added to the soil to enable the farmer to grow large crops.

Wherever a farmer appreciates that his team is one of the heaviest items in his expenses, and must be kept at work every day when work is possible, he has a fair chance of success. But if he imagines that team help costs little, because he grows a large part or perhaps all of his food, his failure is only a question of time.

A remark made by Adam Smith is peculiarly fitting here: "To prohibit a great people from making all they can out of every part of their own produce, or from employing their stock that they may consider industry in the way most advantageous to themselves, is a manifest violation of the most sacred rights of mankind."

Weeds multiply very rapidly. The number of seed each plant is capable of producing is estimated as follows: Dandelion, 12,000; shepherd's purse, 37,000; pepper grass, 15,000; white thistle, 7,000; common thistle, 65,000; chamomile, 16,000; rag weed, 5,000; butter weed, 5,000; butter weed, 5,000; purslane, 388,000; plantain, 44,000; and burdock 43,000.

A certain farmer of Hart county, talking about his cotton crop, told us that his preacher's patch was the best cotton he had. "Where is your preacher's patch located?" we asked. "Right in the center of the field." Why did you put it in the center of the field? "So that the Lord couldn't send rain on the preacher's patch without raining on mine."—Savannah News.

Small industries will pay. It makes very little difference what kind of industry it is. If any man will raise 100 bushels of fine peaches ripening at different periods of the fruit season, he will be surprised how much cash he would realize; if another man would bring to market 1,000 half grown chickens he could get therefor \$200 or \$250, and very nearly all this would be profit. A countryman might easily burn him a bed of charcoal, and send it to the city, and sell it from door to door for prices that would realize to him a very handsome profit.

OUR STATE.—The simplest and most effective remedy for these destructive pests, which eat the plants off just beneath the surface of the soil, is to apply a solution of saltpetre around each hill close to the plants. The proportion of saltpetre necessary is a tablespoonful to a gallon of water. The quantity usually recommended is only a tablespoonful to a pail of water, but there is not the slightest danger of injuring the plants by making the solution as strong as recommended. On the contrary, it seems to promote their growth. There is no doubt that cornfields might be protected from the ravages of this greedy pest by applying the above remedy. With a barrel of the solution at each end of the cornfield, and a couple of good-sized watering pots, the labor of applying is not nearly as great as it would appear at first thought.

Our State debt need trouble the conscience of no Democratic voter. It is one of the scars left by the gilded bugs that swarmed into the State under Republican misrule. It represents no honest obligation. It is simply a stigma sought to be placed on the Commonwealth by a disreputable band of rogues and desperadoes. Those who suffer here to thank the party of great moral ideas for their losses.—Wilmington Messenger.

New industries are being started, and new business combinations are being formed on every hand, and it is to the interest of our people to give a hearty, wholesome support to this new impulse, and if any wrecker, or combination of wreckers do appear, treat them as public enemies. Honesty, industry and confidence are requisites to business success. Let them be the watchwords of our people.—Goldboro Argus.

Among the arrivals last week at Castle Garden was Botho Freiherr von Ebenstein, who came by the steamer Thingvalla from Stettin. He told the interpreter that he was a Prussian count and formerly held a commission in the Prussian army, but meeting with adverse circumstances was compelled to surrender his commission. He had but \$18 in his possession and was going to a small town in North Carolina, where he proposes to engage in farming.

A father in New York shook his little boy severely as a punishment for some bad conduct, and the shaking superinduced meningitis, which caused the death of the child. Parents cannot be too careful in chastising their children. There is only one really safe place upon which to administer timely and reasonable punishment to a child.—Nashville Banner.

Parents, remember the above remarks. They are bottom facts.

ITEMS OF NEWS.

The whole length of mail routes in operation in the United States amounts to 375,000 miles.

In 1600 cotton was first brought to England from Cyprus and Smyrna and made into fustians, dimities, etc.

From the May salary of a New York city school teacher who receives \$700 a year there was deducted one cent because she had one day been tardy two minutes.

Six thousand three hundred and forty-one buildings were destroyed when Moscow was fired in 1812 to prevent the French from enjoying the ancient Muscovite capital.

America does not have all the enterprisers. An Amsterdam doctor cheerfully advertises, "I will pay one-half of the funeral expenses in cases where I am not successful."

Col. P. H. Winston, who was appointed by President Arthur, Register of the land office at Lewiston, Idaho, and who resigned some weeks ago, has returned to Winston and will resume the practice of law.

The venerable Cassius M. Clay, of Kentucky, dismisses the question of woman suffrage in this way: "If woman agrees with her husband the suffrage is useless, and if she does not her suffrage is fatal to the family."

A tree, called the umbrella tree, of Japan, now growing in a yard at Tallahassee Fla., though only three years old, has leaves on it that measure twenty-one inches by sixteen. It is umbrella shaped, and makes a shelter that is impervious to sunshine or rain.

Senator Vest, of Missouri, who was in New York undergoing treatment for his eyes is quoted as saying in regard to the captured Confederate flags that he is in favor of presenting them to "Sherman, Fokker and Fairchild to cover their nakedness in progressive ideas in statesmanship."

The schooner Dora from Ounaulaska, which arrived at San Francisco last week, brings news that the volcano, Akantoco, on the Island Akontan, one of the Aleutian group, is in a state of eruption. The natives state that the eruptions have been almost constant since the middle of May.

The New York Times says, on the authority of Capt. D. V. Johnson U. S. N., who commanded the river fleet in 1864, that Gen. Tuttle, who was then in command at Vicksburg, was party to a scheme to rob a loyal planter of \$100,000 worth of cotton. He is the man who caused the recent trouble at St. Louis over the President's proposed visit.

The United States add about \$800,000,000 to its wealth yearly. In the last six months it has spent \$84,000,000 on railroads and \$150,000,000 on buildings in its big cities, and companies organized in the South alone call for \$161,000,000. Taking the country together, this year it will salt down in investments, whose return cannot be immediate, considerably more than its savings.

Max Weil is the richest Jew in New York, his figure being estimated at \$8,000,000. Following him are forty other millionaires of the same race. The Hebrew capital in the Cotton Exchange is over \$6,000,000, and of city real estate they hold at least \$100,000,000. As estimates of the annual transactions of the wholesale trade of New York done by Hebrews put the figures at \$262,000,000.

Our State debt need trouble the conscience of no Democratic voter. It is one of the scars left by the gilded bugs that swarmed into the State under Republican misrule. It represents no honest obligation. It is simply a stigma sought to be placed on the Commonwealth by a disreputable band of rogues and desperadoes. Those who suffer here to thank the party of great moral ideas for their losses.—Wilmington Messenger.

Ex-Congressman Reid's Troubles Ended.

Ex-Congressman Reid's Troubles Ended. Raleigh Correspondence Richmond Dispatch. Your correspondent learned to-day from a most reliable source that the financial affairs of James W. Reid, ex-Congressman from the Fifth district, have all been satisfactorily settled. His brother, Rev. Frank L. Reid, of this city, has been untiring in his efforts to accomplish this end, and has succeeded very much to the gratification of the many friends of the family. Ex-Congressman Reid will now locate in one of the large cities and will begin life anew. He has fine talents, and his friends hope that he may rise to the eminence to which they entitle him. It will be practically beginning life anew.

If the South grew rich and powerful by means of her agriculture with slave labor, can she not grow faster now with free labor, which is far cheaper? Our soil and climate give almost a monopoly in the product of king cotton, besides suiting all cereals as well. We can raise \$40 worth of cotton per acre, while the great West which has grown rich by her farming mainly, can raise only about \$15 per acre. Can we not then compete with Ohio, Indiana and Illinois? What the South needs is the same diligence and intelligence in her agricultural pursuit that those States have. If the South is ever to again become very wealthy (and she can far excel her anti-bellum days) she must be so by her agriculture mainly.—Selma News.

Wisdom of Little Folks.

It was a Sunday-school exhibition and the superintendent was showing off the results of his labors. During the exercises he asked the children who could tell him anything about Peter. No one answered. The question was repeated several times, till finally a little girl held up her hand.

"Well, my dear," said the superintendent, "that's right. I am glad to see there is one little girl who will put these larger boys and girls to shame."

The little girl came forward to the platform, and was told to tell the audience what she knew of Peter.

She put her finger in her mouth, and looking very smiling, said:

"Peter, Peter, pumpkin eater, Had a wife and couldn't keep her, Put her in a pumpkin shell, And there he kept her very well."

FACETIE.

Why is the letter "g" like the sun? Because it is the centre of light.

If you make a speech be sure that your speech is out before the audience is.

It rains alike on the just and the unjust—on the just mainly, because the unjust have borrowed their umbrellas.

He asked her for her hand and got her paw—by the coat-collar, and he was gone where the wood-worm whinneth.

A clergyman said that he addressed his congregation of ladies and gentlemen as brethren, because the brethren embraced the ladies.

He drank his beer and laid down a vest-button for a sixpence; the waiter handed it back, saying he had no small change, being out of shirt-buttons.

J. Billings, philosopher, remarks that "the road to ruin is always kept in good repair." Yes, and might have added that the devil always gives "special rates" to all that patronize his road.

Not a long time ago Bridget read in the newspaper of an old woman who had died at the age of a hundred and six. "Maybe I'm as old as that meself," said she. "Indeed, I can't remember the time when I wasn't alive."

A young man residing in Keen Kissed his sweetheart behind a large screen He made too much noise And was heard by some boys, Who informed the girl's pa—which was mean.

A little boy about four years old, lately during a heavy thunderstorm, saw a broad flash, lighting up all the sky. "Oh, mamma! mamma!" sobbed the little fellow, "God's house is all on fire! Will he be burned up in it?" But a few moments after, hearing the rain pouring in torrents, he ran to her, crying, exultantly: "Mamma! mamma! God has turned on his hose. Now his house won't burn up."

What True Merit Will Do.

The unprecedented sale of *Boschee's German Syrup* within a few years, has astonished the world. It is without doubt the safest and best remedy ever discovered for the speedy and effectual cure of Coughs, Colds and the severest Lung troubles. It acts on an entirely different principle from the usual prescriptions given by Physicians, as it does not dry up a Cough and leave the disease still in the system, but on the contrary removes the cause of the trouble, heals the parts affected and leaves them in a purely healthy condition. A bottle kept in the house for use when the diseases make their appearance, will save doctor's bills and a long spell of serious illness. A trial will convince you of these facts. It is positively sold by all druggists and general dealers in the land. Price, 75 cts., large bottles.

Davidson—Dec. 5, one week.

It is often said that many a dog is treated royally, whereas many a child is neglected and runs about covered with filthy rags. The editor of the Epoch has heard of a lady who kept her dog in the shaded room in the house and fanned it all day when the thermometer was up in the nineties; and now comes the information from Pennsylvania that an old lady died there and would \$1500, "the interest of which is to be applied to support her dog."

WHAT AILS YOU?

Do you feel dull, languid, low-spirited, lifeless, and indigestible miserable? Mentally and physically experience a sense of fulness or bloating after eating or "grogginess," or emptiness of stomach in the morning, tongue coated with a bad taste in mouth, irregular appetite, dizziness, headache, blurred eyesight, "floating specks" before the eyes, nervous prostration or exhaustion, irritability of temper, hot flushes, alternating with chilly sensations, sharp, biting, transient pains here and there, cold feet, drowsiness after meals, wakefulness, or disturbed and unrefreshing sleep, constant, indescribable feeling of dread, or of impending calamity?

If you have all, or any considerable number of these symptoms, you are suffering from the most common of American maladies—Bilious Dyspepsia, or Turpid Liver, associated with Dyspepsia, or Indigestion. The more complicated your disease has become, the greater the number and diversity of symptoms. No matter what state it has reached, Dr. Pierce's Golden Medical Discovery will subdue it. It takes according to directions for a reasonable length of time. If not a complete cure is effected, it is a sign that the lungs, skin diseases, heart disease, Rheumatism, Kidney Disease, or other grave maladies are quite able to set in and sooner or later, induce a fatal termination.

Dr. Pierce's Golden Medical Discovery acts powerfully upon the Liver, and through that great blood-purifying organ, cleanses the system of all blood-taints and impurities, from whatever cause arising. It is equally efficacious in acting upon the kidneys and other excretory organs, cleansing, strengthening, and healing their diseased action, and restoring to them their natural vigor and strength. It promotes digestion and nutrition, thereby building up both flesh and strength, in material disease. This wonderful medicine has gained great celebrity in curing Fever and Ague, Cholera, Dysentery, Dumb Ague, and kindred diseases.

Dr. Pierce's Golden Medical Discovery CURES ALL HUMORS, from a common Blotch, or Eruption, to the worst Scrofula, Salt-rheum, "Fever-sores," Sores or Rashes of Skin, in short, all diseases caused by bad blood are conquered by this powerful purifying and invigorating medicine. Great Bloating Ulcers rapidly heal. It eliminates its potency in curing Tetters, Eczema, Erysipelas, Boils, Carbuncles, Sore Eyes, Scrofulous Sores and Swellings, Hip-joint Diseases, "White Swellings," Gout, or Thick Neck, and Enlarged Glands. Send ten cents in stamps for a large Treatise, with colored plates, on Skin Diseases, or the same amount for a Treatise on Scrofula and its Remedies.

"FOR THE BLOOD IS THE LIFE." Thoroughly cleanse it by using Dr. Pierce's Golden Medical Discovery, and you will have a fair skin, buoyant spirits, vital strength and bodily health will be established.

CONSUMPTION, which is Scrofula of the Lungs, is arrested and cured by this remedy. It is taken in the earlier stages of the disease. From its marvelous power over every form of tubercular disease, when first offering this now world-famed remedy to the public, Dr. Pierce thought it worthy of calling it his "Consumption Cure," but abandoned that name as too restrictive for a medicine which, from its wonderful combination of tonic, or strengthening, alterative, or blood-cleansing, and invigorating, and nutritive properties, is unequalled, not only as a remedy for Consumption, but for all Chronic Diseases of the Lungs.

Liver, Blood, and Lungs. For Weak Lungs, Spitting of Blood, Shortness of Breath, Chronic Nasal Catarrh, Bronchitis, Asthma, Severe Coughs, and kindred affections, it is an efficient remedy. Sold by Druggists, at \$1.00, or Six Bottles for \$5.00.

Send ten cents in stamps for Dr. Pierce's book on Consumption. Address,
World's Dispensary Medical Association,
663 Main St., BUFFALO, N. Y.
