A letter from the Rev. Mr. Rainsford, of New York, says he is likely to be in Salisbury on next Sunday, and is willing to preach for us if he is here. In case he comes he will be expected to preach at the Episcopal Church both in the morning and at night.

There is a new republican newspaper in Watauga, called the Watauga Journal. Its editors are L. L. Green, an ex-revenue officer, and E. H. McLaughlin. The latter is well remembered here, editing first a Democratic paper, then a republican—the latter only saw one issue. Knowing him, we cannot congratulate Watauga County upon its acquisition.

We learn that the Young Men's Christian Association have been so much encouraged by large additions to their membership and by the success of similar organizations elsewhere—notably in our neighboring city of Charlotte—that they are taking active steps to secure a lot with a view of erecting a building of their own in the not far distant future. Our local organization will have to rely mainly on the financial support of the good citizens of Salisbury, and we bespeak for them such aid and encouragement as their past efforts and future purposes for good entitle them to receive. We are glad to know that they are aiming high, and wish them large success.

The Probability of a Lutheran Theological Seminary Being Established in Salisbury.

At the second Biennial Convention of the Evangelical Lutheran Church, which recently met in Savannah, Ga., the advisability of establishing a general Theological Seminary for the United Synod was discussed at some length. The following is the recommendation in the President's report:

"A theological seminary upon which all will agree, and which will be an institution supported by all and under the supervision of the board of directors duly appointed by the late General Synod, and merged with it into this body is a necessity. Having been quite frequently spoken to on the subject by both ministers and laymen, I would recommend that the board of directors of the theological seminary be instructed to inquire into what has been done at Newberry, S. C., and the same edifice in Salisbury, N. C., known as the Harrison mansion, ascertain what the citizens of Salisbury will do in aiding our church to make the purchase and purchase the same, if in its wisdom it can see its way clear to do so."

This recommendation was referred to a Committee. The Committee earnestly urged that the Synod should seriously consider the advisability of establishing such an institution at once, for the following reasons:

- 1. "Because several of our district synods in the exercise of the right of petition have concurred in urging upon you such action.
2. "Because it is an abnormal condition for a church in a settled State to depend upon outside resources for means of education.
3. "Because a seminary in our own midst would develop a greater interest in the matter of a supply of ministers from within the congregation themselves.
4. "Because our present arrangements under which some are educated at Philadelphia, some at Gettysburg, some at Conover, and some at Newbury, cannot result otherwise than in a ministry constantly becoming more unlike in certain things and impairing practical unity, and besides such a seminary would send out men more truly of one mind and spirit, more surely in sympathy in the common work before them and possessing in a greater degree an important adaptation for their field of labor."

The prevailing sentiment was that while a theological seminary is needed it is not practicable just now. Therefore a committee was appointed to report on location, etc., at the next Synodical Convention, which meets in Wilmington, N. C., Thursday before the 3rd Sunday in November, 1889.

A Babe in the House

is the source of much sunshine and joy, brightening many a dark cloud and lighting many a heavy load—but joys cannot abide only in a healthy body. The Creator with great wisdom has distributed over the earth vegetable remedies for every ill of human kind. This marvelous laboratory reveals its secrets to man only by long and searching labor. Few men have attained greater success than Dr. R. V. Pierce, nor devised for suffering humanity a greater production than his "Golden Medical Discovery," the unfailing remedy for consumption in its earlier stages, as well as for chronic nasal catarrh, scrofula, tumors and all blood disorders.

MINING NOTES.

Some fine samples of free gold ore was sent us for assay from the Trexler mine, this county.

The gold at the Lowler mine, in Stanly county is 928 fine, mint assay. 95 dwts. were sent to the Charlotte Mint this month.

Several mining men from Nevada, Colorado and New Mexico have paid our office a visit to examine the mineral resources of our different counties, the past week.

The Dunn mine in Mecklenburg county, is one of the richest mines in North Carolina. It was worked by General Wallbridge, of New York, before the war. It is thoroughly opened. For several years past the title was in dispute, but now a clean title is given to the heirs. Lately the mine was unwatered and four new veins discovered, rich in free gold. Our expert will shortly visit this mine to report on the present status.

The prospectors have made a long and deep cross-cut on the Bunnell mountain range, with what result we have not heard. As soon as a good supply of water falls from the clouds they intend testing the alluvial on the extreme north-east end of this property. The result of former working has proved this rich alluvial, and Montgomery is the county that produces the large nuggets, on the range from the Sam Christian to the Calloway mountain in Randolph county.

From the News and Observer we learn that Commissioner Robinson, who has just returned from a visit to Anson county, report that extensive improvements are to be made in the machinery for working the Wadesboro brownstone quarry. The quarry is now being worked by an Atlanta company who have decided to put in a 20-gang saw for sawing instead of drilling and blasting out the stone. The quarry is the property of Mr. J. E. Edwards, to whom the company pays a royalty of ten cents for each square of stone taken out, and the stone is said to be practically inexhaustible. About \$25,000 have already been invested in machinery for working the quarry and the proposed additions will cost about \$25,000 more.

Stanly Freehold Mines.

Our expert visited these mines last week and reports the following amount of work accomplished during the last thirty days. The two shafts, "Upcast" and "New Callivied" are worked by whim power.

er, the Osborne, or Engine, shaft with steam. The hoist has been put in operation, and all the immense work for the transmission of power from the Engine shaft to the California, 1,018 feet, and 400 feet from power to Upcast. The guys are run over iron-grooved pulleys erected on standards 18 and 20 feet in height, and connect with the pump bobs. To prevent the springing of guys the rods are twice connected from angle bobs, which also allow any deflection from the straight line. The stamp mill house and boiler and engine house are nearly completed and they expect to have 10 or 15 heads running by the 19th or 20th of this month. All the underground work is under the management of the Superintendent and Mining Capt. J. W. Jenkins. The timbering of levels is well done and will insure a safe mine for stopping. The ore taken out and on dump has proven very rich. The result on mill will give the value practically. They will have immense reserve of ore by the time the mill is ready. The ground in one of the shafts is comparatively soft, and the quartz can be stopped very inexpensively. Four levels are being run, two of which are on the course of veins, and two on the cross-cut. The 80-foot level is being driven to cut the Johnny Parker belt of metamorphic slates, where the free laminated gold is found on the clearance and lamina, showing conclusively that the gold was deposited at the same period of the slates formation. The Company's saw mill has cut and now delivered at the Yadkin river over 150,000 feet of sawn lumber for the Flume. The contractors are busy building the Flume and laying the foundations for pumps. The 12-inch wrought iron pipes are being delivered on the pipe-line and from the appearance of the work it may be completed in two months.

The office business is under the sole management of Mr. J. C. Judd a very courteous gentleman, and Col. H. Davey, the Managing Director is a model of system and business capacity, at the same time very polite and kind. The manager or superintendent, Capt. Wm. Nance attends to the manipulation around the mine and machinery. We were glad to see the vast improvements that have been made in and around this mine. When all matters are completed it will be one of the finest equipped mines in country.

"That Miss Jones is a nice-looking girl, isn't she?" "Yes, and she'd be the belle of the town if it wasn't for one thing." "What's that?" "She has catarrh so bad that it is unpleasant to be near her. She has tried a dozen things and nothing helps her. I am sorry for I like her, but that doesn't make it any less disagreeable for one to be around her." "Now if she had used Dr. Sage's Catarrh Remedy, there would have been nothing of the kind said, for it will cure catarrh every time."

There is no doubt about the honest worth of Ayer's Sarsa, arilla as a blood purifier. Thousands, who have been benefited by its use, will attest its virtues. This remedy cures liver and kidney complaint, and eradicates every trace of disease from the system.
