And at the Fair at the same place in 1868. the one-horse Watt Plough took the first premium awarded ploughs of that size; two sizes only being tested on this opeasion. Over 6,000 of these Ploughs are now being used by farmers and planters in twelve States of the Union with entire satisfaction, whose estimonials would fill a volume of good size, and require us only to say that if not found in every respect superior to any other plough in use, we will refund in each the amount paid for any plough sold by us, if returned after two weeks' use and trial. All have been sold on these terms, and out of this large number we have not had returned to us ten on account of bad work.

We have all sizes, both right and left hand, with east and wrought points. The one horse (No. A and B) besides being a furning plough, is adapted to all kinds of cultivation It substitutes several implements, (costing together more than three times as much as this plough with its several pieces), while its work is superior to all combined.

of its medicinal virtues. He was delighted and surprised, and after his own recovery, which soon occurred, determined, if possible, to procure the cole right to manufacture and sall it in the United States. The result of his labors was a glorious success for himself and suffering humanity, for the colebrated PLANTATION BITTERS was thus made known to the world. PLAN-TATION BIFTERS being an article of real merit, founded upon new principles, and relying wholly upon the vegetable world for its medicinal effects, worked a rapid revolution in the history of medicine, and became as a household word all over the civilized world. The cabalistic S. T .- 1960-X, was a talisman of health, and the demand for the PLANTATION BITTERS soon far exceeded the abilities of the proprietors to supply. Not withstanding the large importation of St. Croix Rum, made expressly for the com-

pounding of these Bitters, the quantity was inadequate. It therefore became necessary that arrangements upon an extensive scale abroad should at once be made, and an agent was dispatched to St. Thomas for that purpose. He was fortunate in securing and leading soveral plantations on some of the largest and most productive estates on the island. Houses, stills and presses were erected as if by magic, which utterly "astenished the natives." The services of experienced men and natives of the island were precured, and very soon the proprietors of the PLANTATION BITTERS were in a position to supply their laboratory with all the perfectly pure St. Croix Rum needed in manufacturing the GREAT DYSPEPTIC TONIC AND INVIGORATOR. The above cut represents the natives crushing the sugar-cane and otherwise preparing it for the stills and presses. As an antidate to Faver and Ague, Intermittent and Malarious Fevers, Dyspepola, and

other kindred diseases, the use of the PLANTATION BITTERS is unsurpassed in the history of the world. Over five million bottles are disposed of annually. They are adapted to old and young, male and female. They are agreeable in taste, and always produce an immediate beneficial result.
