### Favors Sheep Protection Association presents ma

Mr. Editor:

It seems to me the farmers who ar raising sheep in our county would gebetter results from the industry, which seems to be taking on new life again, if an organization could be formed for the purpose of marketing their products: woll, lambs and su plus stock in wholesale shipments and in buying new stock for breeding purposed, etc. Their would be no danger then of local markets being glu ted with lamb and mutton and thus causing the produces to loose mone and interest in the business.

On the other hand, if good price can be realized and reliable markets found more farmers can raise flocks -small or large-with profit and

pleasure. Sometime ago some farmers Hyde county organized and shipped their surplus hogs to market in ca lots and realized more than five thous

and dollars more than the local mar kets would have paid. I am sure that the hog business is that county will get lots of new life since the farmers realize how muc's

more they can make by co-operation and organization.

What are we going to do about it? SUBSCRIBER.

#### THE SHOT GUN

Trouble with some people seems to be a patriotic affiliction. It makes feelings blue.

Don't think that a bluff is a good substitute for an education.

The man who points out our faults may be a true friend, but we feel like kicking them just the same.

It isn't every man who can rise in the world without getting up in the air about it.

Some persons cannot see what pleasure those who mind their own business find in life.
