Teacher of Agriculture John Graham High School, Warrenton

#### Results of the Cotton Tests Continued

Plot number 5 was not fertilized. The first picking 29 lbs., second picking 48 lbs. Fertilizer cost was of course nothing. Profit realized \$1.92.5. The tendency of this plot was for the cotton to mature late. This is not a very good practice to follow under boll weevil conditions. The price of cotton varies or fluctuates and the price or cost of fertilizer remains fairly constant. This factor caused the difference in the profit in this particular test. The price of cotton being 12c or more would make a great difference in the profit realized.

Number 6 is one of the best and also one of the greatest profit yielding. Under this plot was used the same formula as under the first five and the same per acre. 400 lbs. 4-10-4. This plot was side dressed with 32 lbs. of Nitrates. The first picking 64 lbs., second picking 63 lbs., total 127 lbs. Value of the cotton from this plot \$3.17.5, cost of fertilizer \$1.88. Profit \$1.29.5. This plot yielded almost as much as the plot that was side dressed with Potash and Nitrates. The first picking exceeded the second by one pound. This plot seems to prove that it pays to side dress with Nitrates.

Now we come to an interesting series of plots because of the fact that a fertilizer analyzing higher and a greater quantity per acre did not increase the yield materially.

Plot number 7 was fertilized with a 6-10-6 fertilizer at the rate of 800 lbs. per acre. All of this fertilizer applied under the cotton. The main and important point to consider here is the fact that this fertilizer did not injure the germination of the seed. The first picking on this plot equaled 53 pounds. The second picking the same. A total of 106 lbs. of seed cotton. Total value \$2.59. Cost of fertilizer \$2.49. Profit 10c. The higher analysis fertilizer in this case did not pay as well as the increase in the rate per acre. This test was conducted mainly to determine the action of a strong fertilizer on the germination of seed when applied in drill at time of planting. The germination was not injured to any extent in this case, but the increase in pounds per acre and the higher analysis did not pay.

Plot number 8 was fertilized at

the same rate per acre as number six e. g. 400 lbs., but the analysis was a 6-10-6. This plot showed up good and was not side dressed with anything, all of the fertilizer being applied in the drill at time of planting. The first picking yielded 49 lbs., the second 41 lbs., total 90 lbs. Value of the cotton from this plot \$2.25. Cost of fertilizer \$1.08. Profit \$1.17. This is one of the best plots from the profit standpoint. The first picking yielding 8 lbs. more than the second picking.

I will follow this with the results of the last six plots and a summary of the test.

#### In Memoriam

##### ROBERT LEE BELL

Robert Lee Bell, oldest son of William S. and Lucy Wright Bell of Warren county, was born Aug. 3, 1866, died Oct. 8, 1931. His father followed the cause of the Confederacy all through the four years of the Civil War and was known as a brave and fearless soldier, was badly wounded at two different times. Like all of those who wore the gray he adored the noble Lee. No wonder then his oldest son was named for his beloved commander, Robert E. Lee.

Being reared in an age when the South had been left destitute of almost everything save honor, Robert Lee Bell was deprived of the advantages of an education, but learned at an early age the importance of "a good name" and strived through all the years to meet every obligation, after saying "My word is my bond."

Of a genial, sunny nature, he had the faculty of making friends among all classes and his advice was often sought by black and white. He was ever loyal to his friends ever ready to help those in trouble. There were two injunctions of Scripture that he endeavored to fulfill. These were "Provide for your household" and "Given to hospitality."

Born and living in Warren county all of his life he was interested in everything that pertained to her welfare.

He suffered a stroke of paralysis in June 1930, and was never again

able to engage in active work, but could get out some, drove his car out and paid some bills the morning before he was seized with the fatal stroke in the afternoon.

He is survived by the following brothers and sisters: Mrs. W. H. Dowling, Kenbridge, Va.; S. W., William, and John Bell, Miss Lotie Bell and Mrs. Sam Weldon, all of Warrenton; five sons and two daughters by a former marriage and his widow, who was Miss Val Alston of Vance county. She together with him made a home noted for its hospitality. He was laid to rest in the cemetery at Gariners church Friday afternoon, October 9 at four o'clock. Funeral services were conducted by his pastor, Rev. Mr. E. C. Shce, Rev. Mr. J. A. Martin and Rev. Mr. Brickhouse of Warrenton.

The popularity of Mr. Bell was attested by the quantity of beautiful flowers and the concourse of people of every station assembled to pay a tribute of respect.

The sunny smile and cordial greeting of Bob Bell will be missed in his home, in his community and by friends all over the county. May God rest his noble soul and comfort the sorrowing ones.

#### PADLOCK TAKEN OFF CHURCH

BUFFALO, Oct. 27.—A padlock on a building at Bailey Ave. was ordered removed by Federal Judge John Knight when he learned the place, formerly a saloon, was being used as a church.

Judge Knight required, however, that a \$1,000 bond be posted by the Church of Nazarene to guarantee that intoxicating liquor would not be made, sold or possessed on its premises.

#### BURGLARS BOULED

CHICAGO, Oct. 28.—A suburban Police Magistrate phoned Police Headquarters.

"Help," he cried. "Burglars are shooting through my back door." Investigating officers closed in. Finding no burglars, they broke in. The Magistrate explained later that the bottles they found exploding contained nothing but grape juice.

#### TO ADDRESS SOCIETY

Dr. H. N. Walters will leave Tuesday for Raleigh where he will make a talk before the dental society of North Carolina. The subject of Dr. Walters' discussion will be "Attachments for Lower Anterior Bridge Work."

## Sports

By JIM POLK

RICH SQUARE, Oct. 23.—Disabled and weakened from the hard fight against Norlina a week ago, the Warrenton boys lost to the heavy Rich Square team today 26 to 6. Rich Square, playing on the home field, seemed to get most of the breaks of the game, while Warrenton, crippled and fighting, played them to the finish.

Gordon Halthcock scored the first touchdown of the game, receiving a long pass from Drake near the 30 yard line. Rich Square, however, came back and made a quick touchdown in this first quarter making the score 6-6. In the second quarter Rich Square scored again and the half ended 13-6.

In the second half Rich Square scored twice, while Warrenton with many substitutions, continued the fight which ended 26 to 6 in favor of Rich Square.

This game was the first defeat for Warrenton but was not so hard to lose at it does not figure in the Conference which begins in Henderson this afternoon at 3:30. So far our team has a record of 132 points while the opposing teams have 53.

This afternoon we play Henderson and we expect to win. If Warrenton does win the boys get new suits and a trip to Elizabeth City to compete against the winner of the Elizabeth City-Oxford contest. Warrenton is confident of winning and Henderson expects a real football team to play against them this afternoon. At least 200 Warrenton people should be there this afternoon and help our team win the game, the new suits and the honor of representing WARRENTON in the State Championship Conference. The game will be played

this afternoon at Lassiter Field in Henderson at 3:30 o'clock.

#### PHYSICIANS ENDORSE

(Continued from Page 1)

legra. This service, to my mind, has been a Godsend to the poor and needy of our county, and without this splendid service the death rate from pellegra among our people would have been greatly enlarged. "To go into a discussion of pellegra would require too much space, but briefly, pellegra is a nutritional disease caused chiefly by an unbalanced diet. For the poor who cannot afford an abundance of milk, eggs and fresh vegetables, yeast is splendid substitute. Of course drugs are an adjunct in treating pellegra, but a balanced diet well assimilated or digested in most cases means a cure. "G. H. MACON, M. D."

"The poor people of Warren county with nutritional diseases, particularly pellegra, have been greatly benefited by the Red Cross furnishing dried Brewer's yeast. This form of yeast is expensive and very few of the poor can afford to buy it from drug stores.

"I feel that a large number of cases of pellegra in Warren county have been prevented by education of the people as to the importance of home raised vegetables and fruit and the liberal distribution of yeast by the Red Cross to the needy. "F. P. HUNTER, M. D."

"The use of yeast in the fight to build body resistance against the ravages of Pellegra has been found to be very beneficial. The Red Cross in providing yeast free of charge to Pellegra sufferers in Warren county rendered a valuable service. "C. H. PEETE, M. D."

Dr. Charles H. Peete, member of the State Board of Medical Examiners for Nurses, has been holding an examination in Raleigh this week.

#### CARD OF THANKS

We wish to extend our thanks to our friends and neighbors for their sympathy and kindness shown us during the death of our son. Mr. and Mrs. J. D. RIGGAN and Family. Mountain View, N. C.

#### CARD OF THANKS

We wish to thank our friends for their many acts of kindness and expressions of sympathy during the recent illness and loss of our home. R. D. and Mrs. R. D. SCOTT

Walter White, Adv. Mgr.

She: "Where will you be at dinner time?"  
He: "At dinner."

"This whiskey tastes like kerosene."  
"Well, you want to get lit, don't you?"

"That's me all over," said the workman as he dropped the dynamite.

Agent: "Now there is a house without a flaw."  
Client: "My gosh, what do you walk on?"

"And did you hear of the girl who believed that policemen put on weight because of the traffic jam?"

## Maintaining a Standard Yet Meeting Its Subscribers Half Way . . . . .

The publishers of The Warren Record are sparing no efforts to supply Warren County with a live, wide-awake newspaper. This in spite of the fact that its subscription price has been cut in half temporarily in an effort to see that those who want to receive the paper each week may not be denied that opportunity.
