# DRIVE BY LEGION OBTAINS PLEDGES

yearly 2,000 Days Employment Promised As Result of Canvass

MORE WORK EXPECTED

With the canvass of Warrenton not quite completed and reports from Norlina, the local post of e American Legion has secured ledges of labor for 124 persons for total of 1844 days as a result of drive against unemployment ere this week as a part of the vational Organization's program to et a million men to work between

It is expected that when the final sums are in that more than 2,000 gys work will have been pledged gre and at Norlina.

While much of this labor is to selected by the employers, yet legion officials stated yesterday that they believe that sufficient adational work had been pledged to make the drive well worth wh.le. They point out that in addition to the actual work provided with its nomise of increased c.rculation of muld have a splendid psycological house on Manday afternoon.

The pledges of work will be turnwork. This is expected, according to a number of persons who have mly to provide work for a number mo outain supplies under the pre-

no have not pledged work make worked out to hold the clinic.

caused by care\_ 7.—The total amount of loans to lessness of farmers in burning tobacco beds and straw fields have been reported to District Forester

that is caused by the by

L. A. Carter, of Windsor, N. C. Every spring there are a large number of forest fires caused by negligence of careelssness on the part of farmers or others while they are burning off tobacco beds, straw fields, fence rows and in burning trash that has accumulat\_ ed on the land.

By taking proper precautions before starting to burn and then watching such fires until they are completely out. this loss, which runs into thousands of dollars in North Carolina annually, could be eliminated. In burning off straw fields and fence rows, the fire should be started next to the wood and allowed to burn from the woods instead of toward it. A calm day should be selected and no more fire started than can be controlled at all times. In burning brush piles and other trash, the material to be turned should be piled at a distance from the edge of the woods and all fires should be constantly watched until they are completely

burned out. Every woods fire means a loss for some one and the public as a whole. Everyone is urged to be careful with fire in and near forest land and to report any and all woods fires seen to the nearest forest warden as soon as possible.

By keeping fires out of the woods we can keep our forests green and growing and steadily increase the wealth of our State.
