Greece Must Pay Cash For Wheat

WASHINGTON, March 30.—If the government of Greece wants to buy 7,000,000 bushels of wheat from the Farm Board it will have to pay cash.

Indications that such a deal is imminent found no strong foundation in Washington. At the Farm Board the only comment was: "Cash, no credit."

The Greek Ministry said it has not presented an offer to the board since last December. At that time 1,000,000 bushels figured in the discussions. Cop, Disguised As Woman, Is Kissed

AURORA, Ill., March 31.—No body can steal a kiss from Policeman Donald F. Curran and get away with it.

Having tossed aside his cigar, he garbed himself in a woman's long cloak and sauntered down one of the city's shadowed streets. On his head was a saucy new spring hat. From his hand swang a woman's handbag. He vowed he'd capture the man believed responsible for snatching thirty purses in 30 days or know why.

Suddenly as he passed a tree, someone leaped upon him—a huge man, so powerful that he slowly but surely began to overcome Policeman Curran.

Policeman Curran yelled for help. Then he was horror stricken. He felt the imprint of lips upon his cheek. His disguise was so good his assailant had stolen a kiss which made him so angry he gained new strength, seized his opponent and dashed him to the ground.

When Policeman Frank Carroll, responding to the cry for help reached the scene, Curran was sitting triumphantly upon the alleged purse snatcher's head.

The prisoner, a deaf mute, wrote his name as Lawrence Pannell, 40. He refused to give any address.

Transparent Flea Has No Secrets

PHILADELPHIA, March 30.—"Daphnia" is a new martyr to science—a transparent flea that has no secrets.

He is the property of the Philadelphia College of Pharmacy and Science, and when placed under a microscope he can be seen through.

The goldfish compared to "Daphnia" is a sheltered recluse, and the goldfish once held the sympathy of the world because of his lack of privacy.

"Daphnia's" innermost secrets are bared for the welfare of mankind.

Under the microscope you not only watch the little flea eat, but you may follow the digestive process. You may watch his heart go pit-a-pat and detect the slightest sneeze.

"Daphnia" is used as a model for drugs, digitalis, the heart medicine, being one of his specialties. His reactions are noted and charted as a guide to human reaction.
