

Today and Tomorrow

By Frank Parker Stockbridge

MONSTER Photographed At last a photograph has been made of the Loch Ness "sea-serpent." An eminent English surfer...

The pictures, though taken at long range, clearly show that the Loch Ness monster really exists and that it is neither a serpent nor a snake...

It seems to be an era of re-awakening of all sorts of ideas, including our ideas about set beasts. TAMMANY . . . still striped The district leaders of Tammany Hall, who constitute the governing body of that political organization...

I hope nobody will be fooled by Curry's dismissal into believing that the Tammany Tiger has changed any of its stripes. There has been no suggestion of cleaning up "The Hall." Its party is out of power in the city government, but everything seems set for its close affiliation with national and state governments.

It is a pity that high-minded, honorable men have to make friends with the forces of corruption and graft if they expect to gain or hold high office. It is that sort of thing that keeps most of the best and most intelligent men out of politics.

WEATHER . . . and sun spots Look for a cool, if not a cold, Summer. The popular notion that a severely cold Winter is always followed by a hot Summer is all wrong, the weather experts say. It is based upon nothing but the popular belief that there is a natural law of compensations which always works; and that is not true.

Astronomers report the largest sun-spots on record, just appearing on "our" side of the sun. It is 15,000 miles across, twice the diameter of the Earth. That means that a fair percentage of the sun's heat passing to Earth will be blocked off. It also means that there will be storms, rains, electrical disturbances and weather freaks such as are seldom experienced. And there are other sun-spots forming; indeed, from the records of the past the experts look for a series of them over the next twelve years.

CITIZEN . . . France and America Rene de Chambrun was born in France. His mother is a sister of the late Nicholas Longworth, and became a French citizen when she married the Count de Chambrun.

The young man has been brought up as a lawyer and admitted to practice in France. He applied to the authorities of New York State for permission to take the State bar examination. His request was refused on the ground that he had not been naturalized. But young Monsieur de Chambrun is a pretty good lawyer. He called the attention of the Court of Appeals to the fact that in 1784 his great-great-grandfather on his father's side was made a citizen of Maryland by an act of the General Assembly of that State, and that the citizenship was bestowed upon his male heirs forever.

The young man's great-great-grandfather was the Marquis de Lafayette; and the Court of Appeals admitted him to the bar examinations. He is a French citizen and an American citizen at the same time.

\$88 Contributed To Charity Chest During Past Month

Contributions amounting to \$88 were received during the month of April for Warren county welfare work, the financial report submitted this week by Mrs. John Kerr Jr. reveals. The report is as follows:

Receipts Methodist church, Littleton, \$3; colored people of Warrenton for specific case, \$20.80; entertainment ("Mock Trial"), one-half proceeds, \$40.20; Wise Baptist church, for specific case, \$6; Wise Community Club, \$7.00; Mrs. Dawn Shearin, for specific case, \$1; Mr. Dal Riggan, for specific case, \$5; J. William Limer, for specific case, \$1; Young Peoples' Service League of Warrenton for specific case, \$1; V. L. Pendleton Circle of the Missionary Society of the Warrenton Baptist church, for specific case, \$1; Mrs. John Tarwater, for specific case, \$1; total receipts during April \$88.00. Balance on hand April 1, 1934, \$95.86. Total on hand during April \$183.86. Total disbursements, \$36.79. Balance on hand May 1, 1934, \$147.07.

Further relief work reported to the County Council of Social Agencies: W. E. Turner, for specific case, \$15.00.

instead of the semblance of reality. But I suppose they know their business better than I do. Personally, I think there is more real entertainment and more solid worth in the news-reels and the travel pictures than in all of the "features" put together.

Give More Attention Home Improvement

Home demonstration agents in North Carolina will devote more attention to the improvement of rural homes as a result of the knowledge secured through the recent survey of rural homes in 12 counties of the state.

"It is our purpose to begin a comprehensive plan looking to the definite improvement of our rural homes and to this end we will not only use the experience gained by home agents in past years but also the new facts developed in the survey made in 12 counties this spring," says Mrs. Janse S. McKimmon, in charge of home demonstration work at State College. "A real improvement in conditions will mean long-time planning in which our home economics specialists, farm engineers, the extension administrative staff, the home agent and the men and women householders will all have a part. I am hoping to see in the near future, the thinking of all these integrated into a progressive plan of procedure."

Mrs. McKimmon says the work will begin this week, April 30 to May 5, which is Better Homes Week in the nation. There are certain things which can be done at once to start interest in home improvement and many of these things can be done at little or no expense.

She is especially recommending that tours to beautified and well arranged homes be made at once. Inside planning and outside planting should be observed, she said. Many homes will serve as inspiring demonstrations of what can be done and discussions about what was seen will prove helpful. Home demonstration club members will be urged to clean up their premises, make small but necessary repairs to screen windows and doors, and to make other primary improvements, she said.

Farm Questions And Answers

Question: How much of the land rented under a tobacco reduction contract can be planted to food or feed crops?

Answer: The area of the rented acres planted to grazing or pasture or any other crop planted for home consumption or use on the farm shall not exceed one-half of the total rented acres. If none of the acreage is planted to crops for home consumption then all the rented acres may be grazed or pastured provided that the livestock pastured or the products from this livestock are for home consumption only.

Question: Should my entire poultry flock be vaccinated against chickenpox?

Answer: As a general rule only the young birds from 10 to 15 weeks old are vaccinated as the adult birds are apparently highly resistant to the disease. If the disease has been present in the flock at any time in the past several years or is now present in neighboring flocks the birds should be vaccinated as soon as possible. Material for vaccinating can be secured from any reliable firm and detailed instructions for applying the vaccine will be furnished upon request by the

Samuel Insull's Return

Poultry Department of State College.

Question: How can a tobacco grower get rid of mosaic in the field?

Answer: If the disease was present in the field the past year it is impossible to get rid of it this year. The virus will live over in the soil for one or more years. If the plants are to set where the disease was not present then care should be exercised to plant only mosaic free plants. The plant bed should be gone over very carefully and all diseased plants destroyed. Do not handle healthy plants after pulling out those that are diseased. After the plants are set they should again be examined and any plant showing signs of the disease should be pulled. See your Farm Agent for more detailed information.

Fight Pota Bugs Calcium Arsenate

Ordinary calcium arsenate, such as has been used for years in dusting cotton to control the boll weevil, makes an effective and economical poison for control of the Colorado Potato Beetle or potato bug.

"The calcium arsenate may be used as a dust or as a spray and in either case will give effective control," says C. H. Brannon, extension entomologist at State College. "If the calcium arsenate is used, there is no need to apply any additional poison for the material is absolutely effective and is the cheapest material we would recommend. When using it as a dust, cover the plants well. The amount to use will, of course, depend on the size of the plants."

Mr. Brannon says the dust may be applied with one of the hand dusters used in applying the calcium arsenate to cotton. There is little danger of burning the potato plants with the material but there is no reason for wasting the poison by using too much.

While the dust method of application is probably the most economical, a good spray mixture can be made by using two pounds of the

arsenate in 50 gallons of water. For tablespoonful in three gallons of water.

Whichever form is used, start the applications as soon as the potato bugs appear in numbers and continue the applications just as often as the beetles continue to infest the plants.

Western Farmers Plant Pine Trees

The nation-wide movement to reforest eroded acres is finding hearty support among landowners in western North Carolina.

During the early part of April, R. W. Graeber, extension forester at State College, held six forest planting demonstrations in Cherokee, Clay, Haywood, Jackson and Madison counties and found those with whom he worked enthusiastic about the reforestation project. Mr. Graeber used short leaf pine seedlings furnished by the Log Sabin Association from its nursery near Sylva.

As a result of the demonstration, actual planting has been done by fifteen progressive farmers in the counties. Miss Bertha Mayfield planted 1,000 seedlings on her farm in the Martin's Creek community of Cherokee County and A. F. Padgett and Jarrett Thompson of Clay County planted a thousand seedlings each. In Haywood county, Frank Leopard planted 1,000 seedlings to cover a red clay hill on his farm and said he would plant an additional 4,000 trees before the season closed.

Two communities in Jackson County have started the work and three farmers in the Ivy section of Madison have put out a number of trees on red clay soil.

Mr. Graeber is recommending that landowners also plant white pine, black locust and yellow poplar in addition to the pines. Black Walnut is being planted in rich spots in fields and in fence corners. "Some of these folks said that five years ago they would have ridiculed the idea of planting more trees in the mountains but now they are sorry that they did not made by using two pounds of the plant at that time," said Mr. Graeber.

ber. "They feel that much eroded and washed soil would have been saved by the trees and the lumber would have been an investment for the future."

Drewry Items

Education Day was observed at the Drewry school on Saturday, May 5. Mr. T. P. Gholson of Henderson delivered the address. Rev. J. S. Kennison conducted the devotionals. Several songs were given by the boys of the 5th, 6th, and 7th grades. After the program the doors of the rooms were opened for the inspection of the exhibits. Lunch was served and various contests were held in the afternoon. Palmer Springs baseball team defeated the Drewry boys in a game following the contest. Ice cream was sold by the Parent-Teacher association.

Miss Elizabeth Fleming of the W. C. of U. N. C. spent last week end with her parents, Mr. and Mrs. Floyd Fleming.

Mr. Hunter Paschall of near Morganton spent several days recently with relatives at Drewry.

Miss Alice White, member of the faculty of Denton high school, returned to her home here Tuesday. Friends of Mr. C. M. White will be glad to know he is well enough to be out again after being confined at home for several months.

Mr. and Mrs. C. M. White Jr. and Miss Irma Paschall shopped in Henderson Tuesday afternoon.

The Drewry school commencement begins Friday evening, May 11, with an operetta, "Dawn Among The Fairies," by the pupils of Miss Boyd's room, and Miss Helen Read's first and second grades will present a circus.

On Sunday evening, May 13, Rev. Frank Pulley of Louisburg will preach the commencement sermon. The choir of the community are getting up a musical program. You are cordially invited to attend our commencement exercises of the Drewry school.

On Monday evening Miss Fleming's and Mr. Wilson's pupils have their program and the 7th grade will get their diplomas.

Manson Items

Mrs. W. B. Brack and Miss Margaret Champion shopped in Henderson Friday.

Mr. and Mrs. J. W. Dowling and daughter, Martha Ann, of Warren-

ton spent Sunday here with his mother, Mrs. J. W. Dowling. Miss Lila Belle Paschall of Middleburg is spending this week with Miss Wilma Singleton.

Mr. and Mrs. W. E. Brack spent Sunday in Cokesbury community.

Mrs. L. O. Reavis Jr. and daughter, Betty Jean, are spending some time in Portsmouth with her brother, Mr. Hunter Gill.

Miss Lelia Finch of Graystone is visiting Miss Beth Dowling here this week.

Miss Jennie Dowling is attending school commencement exercises at Kittrell this week.

Miss Margaret Champion spent Sunday in Middleburg with her brother, Mr. J. R. Champion.

Mr. Thurman Kirk of Youngsville is visiting Woodrow Singleton here this week.

Mrs. L. N. Kimball and Mr. Maurice Kimball spent Sunday with Mrs. John Wilson near Palmer Springs.

Mr. John Nick Wynn of near Norlina visited his brother here a while Sunday.

Mr. John Adams spent Friday night with his mother in Durham.

Mr. Eldridge Singleton of Wake Forest College spent Sunday here with his parents, Mr. and Mrs. J. M. Singleton.

Mrs. L. N. Kimball is spending this week with friends near Palmer Springs.

Mrs. Lee Hammie spent the week

end with relatives in Ridgeway. Miss Frances Dowling of Raleigh spent Sunday here with her mother, Mrs. J. W. Dowling.

SHADY GROVE YOUNG PEOPLE ORGANIZE

Shady Grove, May 10.—The young people's division of Shady Grove Methodist church, which has been organized recently, has an enrollment of sixteen.

Our first meeting was held April 25, and officers were elected. Martha King was chosen president; William Davis, vice president; Parry Davis, secretary-treasurer; and Sadie King, publicity superintendent.

At our second meeting on May 2 we were fortunate to have Mrs. I. O. Hinson of Warrenton with us. She made a very interesting and inspiring talk. We hope she will come again soon.

In our organization we hope to give the young people of the community more social advantages, and arouse interest in real Sunday school and church work.

North Carolina farmers who have been selling their surplus hogs to unknown truck drivers cannot establish sales evidence and therefore are not signing corn-hog contracts.

Lespedeza and velvet beans will be planted as new soil improving crops in the coastal section of Hyde County this season.
