As the officers were out of town yesterday, full details of the robberies were not available, but it was reported that the thief stole around 200 pounds from Mr. Stegall. The quantity of tobacco Mr. Mayfield lost could not be learned, nor the full name and color of Mays-

Not To Ask Limit **Upon Farm Crops**

Washington, Nov. 12.-High New adopted a policy of watchful waiting with regard to current demands from some quarters for constitutional amendment and revival of such experiments at AAA and NRA.

They seemed determined to await future events and further crystallization of public opinion before going into action with any broad program. For example, Secretary of Agri-

culture Wallace told reporters that, despite recent demands from a group of farm organization heads that AAA crop control be revived. the administration would not ask the new Congress for control legis-

"That is a matter for Congress and the farmers," he said. Wallace left no doubt, however,

that he personally believes future events will make "just about everybody in the United States" favor 'some kind of production control' Despite the call of farm leaders for re-enactment of the invalidated AAA system of curbing production, Wallace said drought and high prices this year had led many farmers to desire unrestrained produc-

tion next year. It would be a good thing from a long range view if they got their desire, he argued, because the piledup surpluses that would result undetr normal weather conditions would depress prices and evoke new and stronger demands for Federal control.

President Roosevelt said that he has not given thought to the question of constitutional amendment to empower Congress to legislate certain social reforms.

Mr. and Mrs. H. A. Moseley, Miss Catherine Moseley, and Mrs. W. H. Wesson spent the week end in Washington, D. C.
