★ You'll save on materials & construction costs

The barn is constructed with Koppers' 30 year "Erdalith treated" poles. Pole-type construction is fast and economical because the construction is simple—excavations and foundations are eliminated. And Koppers' poles last longer because they aren't affected by decay fungi and termites. The Koppers' 30 year skirt boards are "Wolmanized" for extra durability.

The barn is completely insulated with Kaiser "Kladlined" aluminum sheathing. This material supplies strength, moisture control and excellent insulation for uniform curing at minimum cost.

Kaiser's large 4 ft. wide by 18 ft. long Twin-Rib sheets are used for the siding. These large sheets save labor in construction. The barn is completely covered, sides and roof, with Kaiser Twin-Rib aluminum.
