

# One Killed, Two Hurt As Car Hits Abutment

An Ohio woman's first trip to North Carolina ended in tragedy last Friday morning when her one-month-old daughter was instantly killed, and when both the woman and her husband were injured when their car rammed into a bridge abutment nine miles north of here on Interstate 85.

Mrs. Tina Bostick Fodor, 22, of Toronto, Ohio, suffered a broken pelvis and lacerations when the car which her husband was driving swerved into the abutment in the southbound lane of the superhighway at 4:30 a. m.

Her daughter, Kimberly Ann Fodor, was killed in the collision which broke two steel-reinforced concrete pillars beneath the bridge and demolished the car.

Edward William Fodor, Jr., 23, of Kulpmont, Pa., an Army private first class stationed at Fort Bragg, suffered a leg injury, severe lacerations and possible internal injuries. The couple's two-year-old son, Edward W. Porter, III, was bruised in the pre-dawn accident.

According to State Trooper R. A. Clark, Fodor was to leave from the army and was

on his way back to Fort Bragg with his family. He was towing a small trailer, containing his family's possessions, behind the car.

Clark quoted Fodor as saying the trailer began zig-zagging about four miles south of the Virginia-North Carolina line, causing him to lose control of the car and strike the abutment.

Clark said damage to the bridge was listed at \$1,000. An Army helicopter transferred Fodor and his wife to a post hospital late Friday afternoon.

# Warrenton On Top In Three-County League

Warrenton landed on top of the tri-county baseball league on Saturday afternoon when Townsville beat Williamsboro, to place Warrenton in first place with a record of eight wins and five losses.

Warrenton tied for first place with Williamsboro in the won-and-lost column when it defeated Providence 4 to 3 in a game played on July 4.

Tommy Frazier was the starting pitcher in the July 4 game and was relieved by his brother, Billy Frazier, in the eighth. Billy Frazier scored the winning run in the 10th

inning to become the winning pitcher. He hit safely in three times out of five at the bat. Lumpkin was the losing pitcher.

Sunday's match was a game between the All-Stars and Williamsboro, with the All-Stars winning 5 to 2. Wenton of Providence was the winning pitcher. Roberson was the loser. The All-Stars were coached by Raymond Pettitt.

On Saturday, July 14, Warrenton will play a home game with Epsom, and on Sunday the locals will play another game here with Providence.

# Sulfur Serves Man From Crib To Grave; Important Industrial Element

WASHINGTON—The recent discovery of a layer of sulfur in the earth's atmosphere comes as no surprise to anyone familiar with the element.

In one way or another, sulfur gets into almost everything, the National Geographic Society says.

The average man's body contains about one-quarter of one per cent sulfur. He wakes to the tinkle of an alarm clock whose steel was "pickled" in sulfuric acid, a compound used only to water in industrial use. He washes with soap processed with the help of a sulfuric acid, and puts on clothes bleached by sulfur dioxide or dyed with sulfur compounds.

ers, sulfur is the classical fuel of hell.

But sulfur is also a constituent of the heavens. Dr. Christian E. Jørgen and his associates of the Air Force Circulation Laboratory at Bedford, Massachusetts, recently found that a three-mile-thick layer of sulfur-containing particles exists about 11 miles above the earth's surface. The sulfur was detected by studies in electron microscopes of air samples collected by high-altitude balloons. The air particles turned out to have sulfur as their principal ingredient.

The particles may help explain "purple light"—the conspicuous disk of red light often seen above the point of sunrise or sunset. The phenomenon has been observed for more than 100 years.

**Sulfur Protects Food Plants**

He drinks orange juice from trees protected by sulfur-containing fungicides, and eats cereals that would never have reached his table but for fertilizers made with sulfuric acid. For his coffee, he may take sugar, refined with the help of sulfur, and cream from a cow, which, like every other living thing, requires sulfur to survive.

Climbing into his car, he starts the motor with a storage battery containing sulfuric acid. A spark ignites gasoline, refined by sulfuric acid; the wheels turn on sulfur-vulcanized rubber.

He works in a building that sulfur made possible—from the explosives that dug the foundation to the last drop of paint on the interior walls.

From crib to casket, man lives in a world of sulfur-made things. Even in death, sulfur may follow him. Known as brimstone to biblical writ-

ers, sulfur is the classical fuel of hell.

But sulfur is also a constituent of the heavens. Dr. Christian E. Jørgen and his associates of the Air Force Circulation Laboratory at Bedford, Massachusetts, recently found that a three-mile-thick layer of sulfur-containing particles exists about 11 miles above the earth's surface. The sulfur was detected by studies in electron microscopes of air samples collected by high-altitude balloons. The air particles turned out to have sulfur as their principal ingredient.

The particles may help explain "purple light"—the conspicuous disk of red light often seen above the point of sunrise or sunset. The phenomenon has been observed for more than 100 years.

**Serves As Economic Barometer**

On earth, sulfuric acid, the king of chemicals, has so many uses that some economists consider its consumption a valuable economic barometer, the National Geographic notes. In the early 1950's demand for sulfur was so great that prices rose sharply. Discovery of new supplies in Mexico has since given the world ample quantities of pure sulfur.

In the Gulf of Mexico area, sulfur is obtained by forcing superheated water into deposits around salt domes. The sulfur melts and is forced to the surface by compressed air.

Elsewhere, sulfur appears as a by-product of copper smelting. Sulphur dioxide was once regarded as a noxious material resulting from the conversion of pyrite into pure copper. But copper producers eventually learned that sulfur

six months."

This means that the prophets of the Old Testament spoke to the situations of their own day.

Following the period of Israel's glory under the rule of David and Solomon, the nation became divided. The worship of God became neglected while the worship of false gods grew. The people's devotion and faith weakened. Then tragedy struck from without and Israel, the northern kingdom fell in 721 B. C. Judah continued as a nation, but suffered tragedy after tragedy and insult after insult. But worse of all, they vacillated from the worship of God under good kings to the worship of idols under bad kings. The nation became weak and divided. It became a prey to all their neighbors and was finally carried into captivity in 587 B. C.

# Minister Seeks To Form Christian Union

The Rev. Jesse Seaver of Margaretville, veteran temperance crusader and president of the Carolina Christian Union, arrived in Warren County on Monday where he will seek to arouse interest in the forming of a Christian Union unit in this county. He said that he expects to be in the county for two or three weeks.

The Carolina Christian Union is a non-denominational Christian-Temperance-Patriotic-Reform organization, with programs to solve "our various moral, social, economic and health problems—with special emphasis on the liquor problem," Mr. Seaver said. It is cooperating with over a score of large similar organizations in the state and nation.

As officers in the Christian Union, there are over sixty leaders in eight denominations, Mr. Seaver said. These include leaders of the Southern Baptist Convention in Nashville, Tenn., Methodist Bishops, District Superintendents, officials of national temperance and reform agencies, U. S. Congressmen and others. The Rev. Carson Blanton, Superintendent of the Union Mission of Roanoke Rapids, is the local secretary, and Dr. Marcus A. Garriss of Weldon is treasurer.

Several local county units have been set up, with local officers, in nearby counties. Mr. Seaver said that soon after his visitation in Warren County an area convention will be held in Roanoke Rapids, at which time a Warren Christian Union will be established, with Warren County members as officers.

REV. JESSE SEAVER

# The Pastor's Paragraph

By JOHN R. LINK

Prayer: Give unto us faithful and obedient wills, our Father, that we may glorify Thy Son, our Lord and Saviour, Jesus Christ. Amen.

When you hear the word Prophet the chances are that you think of some one who can foretell events. In this sense we speak of "weather prophets" in referring to people who claim that they can foretell what the weather is going to be six months in the future.

To foretell is one meaning of the word "prophet," but it is only a secondary meaning. The word comes from two Greek words which mean literally, "one who speaks for the Gods." This is the general usage of the word in the Bible. The prophet is God's messenger. He is one who speaks for God. His mission was to tell forth rather than to foretell. However, he did incidentally do some foretelling as to what would happen to Israel. It was based on an understanding of the present condition, much as a physician tells a patient, "if you continue eating a fat-diet or drinking alcohol, you will die in

dioxide could be turned into sulfuric acid, a sideline which at times became almost as profitable as the copper itself.

A natural source of pure sulfur was found by the soldiers of Cortes, who needed it to make gunpowder for the conquest of Mexico. They lowered themselves by rope into the smoking center of the volcano, Popocatepetl, and scooped up the sulfur in baskets.

Why Does God Let This Happen to His People? This was a far more serious question to the people of the O. T. than it is to most of us, because they had no satisfying answer in their religion. The generally held view in those days was that All Things Come From God—Both Good and Bad. They thought that God sent it all directly upon men, and nations. If a man prospered and became rich, it was a sure sign that he was a righteous man and that he had God's approval upon him. If a man lost his property or suffered, it was because he had sinned and God was punishing him. If a man or nation would be good by keeping God's law, they would prosper.

How then could they account for the suffering that had befallen God's chosen people? The only possible answer in keeping with the Old Testament theology was that God was punishing His people.

The same question confronts us today. But in seeking an answer, we have a great advantage over the people of the O. T. days. We have Jesus, His Teachings, and the New Testament.

We still believe that God is concerned about what happens to us, and that He is actively engaging in the affairs of man. We still believe that the obedient have God's blessings—But the blessings are of a different sort. The righteous do not necessarily receive material blessings, but spiritual blessings. The good man does not escape the tragedies of life because he is good; but he does have God with him to enable him to face his tragedies. God stands by him with confidence and strengthens him. Through his spiritual support God even makes it possible for his tragedies to be turned to blessing. His spiritual life is deepened; his character is refined. By bearing the troubles that are common to man as a Christian he is able to glorify his God and

witness for Him. Furthermore, he is able through his suffering to identify himself with suffering humanity.

Why Does God Let It Happen? If we become too hasty and arrive at an answer short of what Jesus and the N. T. teach, we make a serious mistake and do an injustice to the God of Jesus. Do not insult God by claiming special favor. The teachings of the N. T. must be studied in connection with this thought.

# Afton News

Joey Skaggs of Long Branch, New Jersey, was a guest of Mr. and Mrs. A. R. Frazier and Betsy for a few days last week. On Saturday Mrs. Frazier, Betsy and Joey went to Richmond, Va., and spent the weekend with Mr. and Mrs. Harold Harris and children.

Mrs. S. H. Bowden of Arlington, Va., is visiting friends and relatives here.

Mr. and Mrs. J. B. Martin, Karen and Spencer Cates, Mr. W. H. Martin and Mrs. Mina Dorth and Joseph and Mr. Jimmie Limer spent Sunday at Wrightsville Beach and Wilmington.
