Switch an old saying around and you discover the unique advantage of *flameless* electric househeating.

Since there is no flame, there are no products of combustion such as moisture, soot or smoke. Instead, you experience a radiant, gentle warmth much like that of sunshine—clean, constant, healthful. You also gain the distinctive benefit of individual thermostat control for each room which only electric househeating provides. This permits you to select the exact temperature you prefer for bedroom, bath, den, or any living area.

At this point, you may be wondering if electric househeating compares favorably in cost with flame-type systems. You can prove to yourself that it does by asking a CP&L representative to show you case histories and operating costs from our files—no obligation of course.

Remember—only flameless electric heat provides matchless Modallion Living.
