Warren Farm Income In 1962 Was One Of Highest On Record

By FRANK V. REAMS, County Agricultural Agent... Meeting to discuss Grain Production... Jan. 30: Angus Purebred Bull Sale... Jan. 30: Agricultural Foundation Meeting... Jan. 31: Agricultural Extension Advisory Board... Feb. 4: Inez Community Club... Feb. 9: Hereford Purebred Sale... Feb. 12-13: Dairymen's Conference... Feb. 20: Golden Belt DHIA Annual Meeting.

109.98. Forestry and Livestock Livestock cash income jumped 1.2 million dollars to \$1,809,550.07. Forestry products increased about 100,000,000 to \$1,525,500.00.

Government Payments The Warren County ASC Office reports almost a 50% increase in cash payments during 1962, compared to 1961 or a 1962 total of \$247,906.46. This amount was disbursed to producers cooperating with the following programs: ACP, Feed Grain, Wheat, Barley, Wood Incentive and Conservation Reserve.

1961 and 1962 Compared Our total cash farm income for 1961 was \$10,622,144.93. Our producers increased this by \$1,597,482.09 during 1962 to a total of \$12,219,627.02.

1963 Is Here With a 5% reduction in tobacco acreage and facing unfamiliar tobacco varieties, unknown seasons, insects and diseases, we can consider ourselves lucky to maintain our 1962 total cash income during 1963.

The actual site of the garden is important but many gardeners have no choice in this respect. If you are lucky enough to have a choice of sites, choose one as near the house as possible. This is for convenience, protection and availability of water for irrigation.

Stay away from large trees for two reasons: they have extensive root systems which will compete with the vegetables for moisture and nutrients, and they produce shade. Most vegetables like full sun. Avoid soils which are poorly drained. If you have a new home, be on the lookout for mortar, brick, stumps and other debris that may have been covered while establishing a final grade.

It is a good idea to plan your garden on paper. This will give an opportunity to locate all crops, arrange for succession plantings and assure a plentiful supply of and air from its home station at Schofield Barracks to the Army's Pohakuola Training Area on Hawaii for combined mobility and firepower exercises with other divisional units.

GARDEN TIME

Now is the time to: plan your vegetable garden; plant fruit trees and grapevines; check the power mower; sharpen tools, repair hose, sprayers and dusters; examine the compost pile; order sufficient seed of adapted vegetable varieties to meet the needs of your family; and build a cold frame or hot bed. Your pruning chores should be completed.

Plant perennials along one side of the garden so they will be out of the way when you are working your annual crops. I'm speaking of such things as asparagus, rhubarb, strawberries, dewberries and raspberries.

Plant perennials along one side of the garden so they will be out of the way when you are working your annual crops. I'm speaking of such things as asparagus, rhubarb, strawberries, dewberries and raspberries.

This will give an opportunity to locate all crops, arrange for succession plantings and assure a plentiful supply of and air from its home station at Schofield Barracks to the Army's Pohakuola Training Area on Hawaii for combined mobility and firepower exercises with other divisional units.

Hardee entered the Army in July 1962, completed basic training at Fort Gordon, Ga., and arrived in Hawaii last December. He is a mechanic in the battery.

The son of Mrs. Violet G. Mitchell, Route 3, Littleton, N. C., he attended Littleton (N. C.) High School.

Live and Let Live! "What I mean is," explained the insurance salesman to a bewildered rural prospect, "how would your wife carry on if you should die?" "Well," answered the farmer reasonably, "I don't reckon that's any concern o' mine—so long as he behaves herself while I'm alive."

Say you saw it advertised in The Warren Record.

your garden area and leave it in rough fallow until time to prepare the soil for planting. Successive freezing and thawing will break up the soil particles and make the preparation of a seed bed much easier. If you do this, apply about 50 pounds of superphosphate per 1,000 square feet and turn it in when you plow.

THE STORY OF TEN LITTLE FREE WORKERS

These are the workers... Ten little free workers in this country fine and fair. But if you cherish your freedom—worker have a care! Ten little free workers—Reddy was doing fine. Until the socialists got him—then there were nine. Nine little free workers laughed at Reddy's fate. Along came federal medicine—then there were eight. Eight little free workers thought this country heaven. But the government took over the railroads, then there were seven. Seven little free workers—'till the miners got in a fix. Uncle said coal's essential and took over leaving six. Six little free workers 'till the day did arrive. The steel mills too were federalized—then there were five. Five little free workers—but the farmers are free no more. The farms have been collectivized—that leaves only four. Four little free workers till the government did decree. All must have free legal advice—then there were three. Three little free workers—the number is getting few. But with government groceries selling food—then there were two. Two little free workers—our story's almost done. With clerks at work in federal stores—that leaves only one. One little free worker—the reporter son-of-a-gun. Mustn't criticize government—so now there are none.

Ten little workers—but they are no longer free. They work when and where ordered, and at a fixed rate you see. And it all could have been prevented if they'd only seen fit to agree. And work together instead of saying "It never can happen to me!"

Yes... this could happen to you. This little story could come true unless each of us works to preserve free enterprise. What can you do? Write your Congressman and ask him to keep government out of business.

Everything piles up handsomely in a Chevy II including savings

Imagine a low-loading wagon roomy enough to handle most anything you can heft—and still trim enough to slip into cramped parking spots. We imagined it, built it and called it Chevy II. Made it as dependable as a wagon can get. And made it so it'll keep piling up savings over the years. Those show up in the way

this one goes and goes on a gallon. They grow with brakes that adjust themselves. An exhaust system that lasts longer. And a Delco-tron generator that keeps battery reserve power up. Want to hear more? How about a low price, natty interiors, Body by Fisher craftsmanship—and a talk with your Chevrolet dealer soon!

See four entirely different kinds of cars at your Chevrolet dealer's... Chevrolet, Chevy II, Corvair and Corvair.
