ENTERED AS SECOND-CLASS MATTER AT THE POST OFFICE IN WARRENTON, NORTH CAROLINA, UNDER THE LAWS OF CONGRESS

"Second Class Postage Paid At Warrenton, N. C."

SUBSCRIPTION RATES: One Year. \$3.00; Six Months, \$1.50

### The Real Question

For obvious reasons in a highly competitive endeavor, too much publicity is not given those in the hunt for industries, and it is only when the announcement that a new industry is coming into a community, that the days and months of planning, the hours upon hours of hard work, the trips made, the interviews held, and the money expended are learned.

Thus all that is certain that Warren County has obtained from its employment of a part-time industrial engineer is that as a result of his work that money is being raised at Littleton for a shell building and that at least one, possibly two industries, are showing a definite interest in locating at or near Warrenton.

In weighing accomplishments against its \$2,000 appropriation, a hard-pressed board of county commissioners is under some temptation to refuse to again include the appropriation in its budget. Such refusal, we feel, would fail to serve the best interest of Warren County.

For while it is true that no factory has yet been built in Warren County as a result of its expenditure, the chances are excellent that the building of a shell building at Littleton will be responsible for that town's obtaining a much needed industry. If this occurs the county will be repaid many fold for its efforts. If Warrenton and other towns keep working, the chances are good that tangible results will be obtained.

There is no guarantee that when a store spends hundreds of dollars for sales promotion that such store will reap a harvest of profits, but the chances are good that it will, and the store makes the venture. It is certain that the stores which fail to make such investments are among those which fail to make a profit. The same thing, we feel, is true of counties.

There is no guarantee that a single industry will be obtained as the result of employing a part-time or a full-time industrial engineer. But it is almost a certainty that if a do-nothing policy is adopted by the county and its town we will continue to slip backwards.

The incorporated towns of the county have already agreed to continue their appropriations for another year, when citizens of the county will have an opportunity to vote upon a tax levy for the employment of a full-time industrial engineer. For the county to fail to go along with its appropriation for another year not only would show a discouraging lack of cooperation in a county effort, but might well be the cause of losing what towns and county have already spent.

The question before the county commissioners is not whether the county can afford to appropriate \$2,000 for its part in the salary of the industrial engineer, but whether it can afford not to include the item in the budget. We feel that it cannot.

to 25 and she may need the practice before her bingo year of 23. Her chances start high and stay high till then—about 15 per cent. The quarry's possibilities, unfortunately, start low, hitting bingo at 25.

### Looking Backward Into The Record

June 6, 1958

The contract to build a Sportswear factory on the Norlina road was let this week to O. K. Tharrington, Henderson contractor.

Two hundred and seventy-one students were graduated from Warren County schools this week.

Cucumber stations for the Mount Oliver Pickle Company were opened in three sections of Warren County this week.

The county-wide Dairy Princess contest will be held in the John Graham High School auditorium tonight.

June 5, 1953

Howard Jones, III, and Al Mustian of Warrenton and John Pope Clark of Norlina have been named by the American Legion to attend Boys State at Chapel Hill June 14-20.

Carter J. Jones was appointed assistant Negro county agent by the board of county commissioners on Monday.

Heavy boll weevil infestation in the Inez community was reported this week by Frank Reams, county agent.

George Garland Allen of New York, a native of Warren County, received the honorary Doctorate of Law at Commencement Exercises at Duke University on Monday.

June 3, 1938

Charles J. Tucker, son of Mr. and Mrs. Charles A. Tucker of Warrenton, is among 151 seniors who will graduate from Culver Military Academy on June 3.

The Warrenton Boy Scouts enjoyed a hike on Monday afternoon to the Golf Course where they pitched their tents and camped overnight.

Mrs. William Davis has been elected fourth grade teacher in the John Graham faculty.

Many Warrenton people were in Oxford on Wednesday night to attend the Guy Lombardo dance which drew a crowd of 5,000 people.

### The Pastor's Paragraph

#### THE ETERNAL LIGHT

By John R. Link

"The light is still shining in the darkness; for the darkness has never put it out."—John 1:5.

And it never will put it out. All the darkness of this world and of hell combined cannot extinguish that Light. Darkness is negative and has no power over light. The smallest light shines freely in the blackest darkness. It is dark only when the light fails to shine. We need to remind ourselves of this fact in a dark world like ours. However, I am confident that the present darkness throughout the world in human relationships will soon give way to a brightness that the world has never known before. Remember there have been dark periods in history before and that "the light is still shining in the darkness; for the darkness has never put it out."

Without the light of Jesus we are in danger of distorting the facts of life, as the blind men did in the fable about their several appraisals of the elephant. We desperately need the religion of Jesus these days in order to get a whole view of life. Darkness is dangerous, and light is essential in times of stragely. When life runs smoothly one can get along with little light. For example, a family can sit in the dark and engage in pleasant conversation; but let an accident happen or one member of the family get sick then there is great need for light. When some moral crisis comes we are made to realize our need of "The Light of the World." However, it may be too late then, not that the light has been put out but because we have been dwelling in darkness and have become insensitive to the Light.

This Eternal Light must illuminate all of life before it can be satisfying and effective in any part. In describing the lives of the Christians of the second century Clement of Alexandria said: "We cultivate our fields, rejoicing; we sail the sea, hymning; in all the rest of our conversation we conduct ourselves according to rule."

#### Prayer

Light of the world, illumine this darkened earth of Thine, 'Till everything that's human be filled with what's divine; 'Till every tongue and nation, from sins' dominion free, Rise in the new creation which springs from love and Thee. Amen.

#### Graduates

Mr. Joe Dameron Davis received a degree in Pharmacy during graduation exercises held at the University of North Carolina, Chapel Hill, on Monday night.

#### Buy's Angus Bull

James C. Harris, Warrenton, recently purchased an Aberdeen-Angus bull from Earl H. and Mary Sue Wilkins, Greensboro.

### GARDEN TIME

M. E. Gardner  
N. C. State College

Hardy chrysanthemums probably give you more color than any other flowering plant you can grow. Now is the time to prepare for the late summer and early fall color parade.

You have three choices: (1) buy rooted cuttings; (2) root your own cuttings from the new growth on your plants; (3) divide the root clumps. Chrysanthemums will come back from the same location for several years, but they are usually best the first year.

Plant glad corms every two weeks for a succession of flowers during the summer. In the vegetable garden succession plantings of sweet corn and snap beans are in order for the lower Piedmont and Eastern Carolina.

Stake and mulch tomato plants. Before mulching, cultivate to destroy weeds. The mulch should be about four inches deep and can be made of clean straw or pine straw. Keep the tomatoes pruned by pinching out the tender shoots as they form in the axils of the leaves (at the base of the leaf stem. Don't let them get too long before pinching.

The iris may be considered as the constant companion of a well-planned garden. They grow well in all sections of the state and are little trouble. Rhizomes may be divided any time after the blooming period until about October in the lower Piedmont and Eastern Carolina and September in the mountains.

Be on guard for lace bugs on azalea, pyracantha, Washington hawthorne and rhododendron. Spray with Malathion, mixing with water according to instructions. Do a good job of covering leaves, especially the undersides.

This is the growing season and the time to see that vegetables, shade trees, flowering shrubs and all growing things are properly fed. Don't over-do the feeding schedule. It is better to feed lightly and often—rather than

infrequent heavy feedings. Fresh manure is good if you have it. Dehydrated manure can be purchased. Most of us use a complete fertilizer such as an 8-8-8. A special acid-forming fertilizer is best for azaleas and camellias.

Plants must be fed with care and understanding. There is no rule of thumb. Frequency and amounts of plant food applied will depend upon the kind of plant and the soil type.

### Marriage Licenses

Marion Faye Salmon, white, of Littleton to William Ray Stallings of Hickory.

Florine Towns, colored of Warrenton to Will Roy Russell of Rt. 2, Macon.

Addie Mae Youngblood, colored, of Hackensack, N. J., to Donald McLoyd Hyman of Hackensack, N. J.

Elaine Milley, white, of South Boston, Mass, to Joseph Henning Strandberg of Mus-

kegon, Michigan.

### Figures

By Chuck Mooney in The UNC Journalist

According to the 1963 World Almanac, a 15-year-old girl has 93.5 per cent chances of marriage before she dies. The same age boy has only 92.2 per cent chances of marrying. Girls, therefore, seem to be 1.3 per cent more marriageable, and if they are, there should be 1.3 per cent more married women than men. This leads to the conclusion that 1.3 per cent of the married women are living in bigamy. They must be, for if they aren't married to a man, to whom are they married?

Titled "Marriage Prospects of Single Men and Women," this statistical table also shows a girl is most marriageable in any given year up to 25. Past that her chances swoop downhill.

The peak year for marrying off daddy's dimpled darling is 23. She's got 21.3 per cent chances of wedding bells before year's end. Her 23-year-old beau will be aliberry, though; he's got 84.7 chances of escape, being only 15.3 per cent marriageable.

The guy a girl should stalk is the eligible 26 or 27-year-old, who has a peak marriage probability of 17.3 per cent both years. A near-miss could also be effective, since 25-year-old lads have 17.0 chances and 28-year-old rogues have 17.1 chances of soon plighting a troth.

Hunting season, however, opens before 23. A girl is quite marriageable from 20
