reached 240. Several leaders schools were held in home furnishings subjects, — and yes, one of the projects many of us well remember — the mattress project — was begun this year. In 1940, we also organized the County federation of Home Demonstration Clubs with Mrs. R. L. Capps as our first president. We attended our first district meeting this year, too.

Nineteen forty-one found us hostess for our first district meeting with around 500 people from six counties attending.

Mattress work continued this year too, and the 1941 report shows 4062 mattresses and 2216 comforters were made in Warrenton County.

The forties found us with gas, tire and food rationing and many of our husbands and sons going in to service or in defense work. This was the time of our efforts with victory gardens, Red Cross sewing, scrap metal and waste paper drives and purchasing war bonds. All of us helped in the defense effort.

The war over, the late forties and fifties found us still busy looking toward a brighter horizon, anxious to learn more about food, home furnishings, clothing, home management, family relations and yes, a growing interest in the reading program, health activities, citizenship and international relations, music and public relations. We were all eager to learn and quite willing to help others too.

Now let us take a look at the Warren County organization as it is in 1964. We have 17 home demonstration clubs with a membership of 235 and a well developed leadership program. We think of the program now as being a total extension program not just home demonstration because we know

there are many others reached by the home economics program through special interest workshops, work with civic organizations through newspaper, home visits, radio and T. V.

During the past year, the home demonstration club program has stressed food production, selection and preparation and improvements in home furnishings.

As a result of the demonstration "Production of Green and Yellow Vegetables" 135 women reported they realize more green and yellow vegetables this year while 60 families reported they tried a new vegetable in their garden this year.

With the demonstration "Vegetables Add Variety to Meals" 110 women reported this demonstration helped them in trying new ways for serving vegetables. One hundred and five women reported they had tried at least one of the recipes given at this demonstration. The demonstration "Buying Meats" proved most helpful to at least 130 women according to reports. The meat preparation demonstration which followed was very beneficial too. We will be able to apply some of the ways of preparation when we are trying to cut our calories too.

We are always conscious of the importance of conserving foods following recommended practices. In food conservation, club women have reported canning approximately: 3700 quarts of fruits, 8200 quarts of vegetables; 300 quarts of meats; 2900 pints of pickles and relishes; 2400 pints of preserves; 2400 glasses of jelly.

Freezing has been a popular means of food conservation also. The home demonstration club women in the county have reported freezing: 6100 pints of fruits; 17,200 pints of vegetables; 15,300 pounds of meats.

This canning and freezing are a definite saving on the food

budget.

With home furnishings being the other area of major emphasis in the home demonstration club program this year, we find some outstanding results reported here.

One hundred and thirty women reported the demonstration "Care of Furniture" was helpful to them in the care of their home furnishings.

One hundred and ten women reported being helped with selecting and hanging pictures in their homes.

Sixty women reported being helped in planning and adding storage space in the home, and One hundred and ten reported being helped with the selection of accessories.

Nineteen women reported re-finishing 42 picture frames.

Thirty women reported re-finishing one or more pieces of furniture.

One hundred and fifty pairs of draperies were made by 50 women.

These are just a few of the many tangible things that club women have done during the past year. Just think how much money we have saved through the things we have learned to do in club work.

This is just a partial report of the many accomplishments made in the county. Through the past 25 years home demonstration club work has been an ever present means of helping the people of Warren County to raise their standard of living

through out-of-school education. May we continue with an ever growing home demonstration program to add to the progress of Warren County,
