May Vote To Be Held On Cotton Allotment Transfers

Cotton farmers in Warren County will vote next week to decide whether, in 1970, they want to be able to sell or lease their cotton allotments outside the county, W. S. Smiley, Chairman, Agricultural Stabilization and Conservation County Committee, announced yesterday.

The referendum applies only to 1970 and will be conducted by mail during the period May 5 through May 9. Ballots may also be delivered by hand to the ASCS county office.

The only question to be decided by the balloting is whether upland cotton allotments may be transferred during the next year to other farms by sale or lease. Such transfers may be made by sale or lease for a period of time agreed on by the parties involved, Smiley said. In no case may transfers be made outside the State. An affirmative vote by at least two-thirds of the county's cotton farmers who vote will permit such transfers for the upland cotton crop during 1970.

Cotton allotment transfers were provided by the 1965 Food and Agriculture Act, and past referenda on this question have applied to growing seasons through 1969. The Congress voted to extend the Act to cover the 1970 crop year, and the current referendum will decide the question of transfers for the single year 1970.

Smiley said, "We hope all producers will vote. The vote should be fully representative of the wishes of cotton farmers in our county."

The chairman said that copies of the ballot are being sent to all cotton producers of record in the county, together with information describing the program's purpose and operation. Any cotton producer who has a question about the referendum or about who is eligible to vote, is urged to get in touch with the ASCS county office.

Mayfield Chairman Of Board Of Education

Boyd W. Mayfield, Norlina farmer and long-time member of the Warren County Board of Education, was named chairman of the board at an organizational meeting here last week.

Mayfield and the four other members of the new board took the oath of office before Mrs. Lanie Hayes, Clerk of Court, prior to their meeting.

Robert Gupton, Arcola farmer and long-term member of the board, was named vice-chairman.

Mayfield succeeds Eugene R. Davis of Inez who served 22 years on the board, 14 of which were served as chairman. Gupton succeeds Dr. Sam H. Massey as vice chairman. Dr. Massey had served eight years on the board, much of it as vice chairman. Neither Dr. Massey nor Davis were candidates for re-election.

A delegation of about 20 citizens appeared before the board to protest tuition charges for students whose parents live outside the state, and the proposed creation of a special school district for Warrenton. Chief spokesman for the group were Ernest Turner, president of the Warren County Chapter of the NAACP, and Mr. and Mrs. T. T. Clayton and John Ellis.

The group were told that the board realizes that hardships were created in some instances by the county's tuition charge but the overall result was in the best interest of the county, and would not be changed.

The group was also told that the Board of Education had nothing to do with plans to create the Town of Warrenton as a special school district.

The board awarded Seegers Defence Company a contract to erect a chain-link fence at Marlan Boyd School at a cost of \$4396.

Tungsten Mine Is Expected To Reopen

The Tungsten Mine in north Vance County, closed for a number of years, is expected to be reopened in the near future.

Rancher Exploration and Development Corporation of New Mexico has acquired the property and is now in the process of preparing to resume operation, according to George Shaffer, an official in charge of operations.

The new company has pumped out the underground shaft and is now in the process of installing new milling equipment of the most modern design for mining activity.

When the mine resumes operations its output may be the second largest in the United States, Shaffer said.

Plans for resuming operation of the mine were revealed by Shaffer at a recent meeting of the Henderson Rotary Club when he was guest speaker.

The late W. Lunsford Long of Warrenton was largely responsible for the development of the tungsten mine and for a number of years headed a group that conducted large mining operations there.

The mine was operated to capacity for a number of years but was closed several years ago when mining became unprofitable because of the sagging prices for tungsten.
