

*All I want for Christmas is...*

Dear Santa:  
I would like for you to bring me lots of food stamps and some aid checks if you have some to spare.

I worked hard for many years like every good American boy should but, somehow, what I saved doesn't go very far any more. There seem to be too many hands in Uncle Sam's pot these days.

Dear Santa:  
I am a little boy, three years old. I have tried to be very good this year. I share my toys with my friend, Troy.

For Christmas I want a bicycle, a "pick-up dirt" truck, and a doll baby that says, "Mommy, I don't want to go night-night."

I had a birthday party on Dec. 5, so Mommy said I could not have a lot of toys.

I will leave you some doughnuts and milk on the table. Mommy doesn't like a lot of toys in the living room, so keep them all together, please.

Love,  
JAY CARTER

Anti-Poverty Agency  
To Hold Public Meeting

HENDERSON—Franklin - Vance-Warren Opportunity, the local anti-poverty agency, will hold a public hearing on its plans and priorities for the next three years Thursday, December 17, at the Vance County Offices Building at 7:30 p. m. At this meeting the Board of Directors will act upon its plans and priorities.

The funding document prepared by the staff proposes efforts to alter the basic economic structure of the area by seeking to further industrialization. In this manner the document suggests that opportunity for upward mobility of the poor may be created.

Noting immediate needs in basic areas, the document also proposes to mobilize community, state, and Federal resources to aid the poor in the areas of nutrition, housing,

medical service, recreation and the problems of the aged. Continued efforts at community organization and development are proposed as a way communication means as well as a way community residents may work together to solve some of their own problems.

Congressman  
L. H. FOUNTAIN  
Reports  
TO THE PEOPLE

WASHINGTON, D. C. — The regulation of prescription drug advertising is important to every consumer. \$1 out of every \$3 or \$4 each of us spends for medicine goes for advertising in one form or another.

That's why the Government Operations Subcommittee on Intergovernmental Relations, which I serve as Chairman, keeps a close check on the way in which the Food and Drug Administration (FDA) is administering the law.

Unfortunately, our most recent investigation revealed that FDA's regulation of prescription drug advertising is considerably less effective than it should be. And, it isn't pleasant to have to publicize such inefficiency — Generally speaking FDA does a good job, but public exposure of bureaucratic mistakes like Congressional ones is often the only way to get corrective action.

It is imperative that drug advertising be absolutely honest and factual. The good health and even the lives of millions of people are at stake. And, it must be remembered, that prescription drug advertising is different because it is primarily directed at doctors — not those who take the drugs.

As the late Sen. Estes Kefauver put it: "He who orders does not buy; and he who buys does not order." Consequently, if our doctors are misinformed by improper drug advertising, whether intentionally or unintentionally, the results can be catastrophic.

Drug advertising is big business in America. Hundreds of millions of dollars are spent each year for ads in medical journals and magazines, direct mail, movies, samples, printed reports, symposia and for detail men, who call on doctors to promote drug brands. With so much advertising activity there are many opportunities for mistakes and sometimes exaggeration by over-enthusiastic promotion agents. The FDA must be continually on the alert.

However, our investigation revealed many inconsistent FDA actions in correcting or failing to correct misleading ads. Some times they required corrections to be run; some times they did not, even though the cases were similar. Other times they merely wrote letters asking that the offending ad not be run again and on occasion they failed to even write letters for similar offenses.

An illustration of poor handling by FDA is pointed out in a report just issued by the Subcommittee I head through our parent Government Operations Committee. It says: "A recent example... is FDA's request on Sept. 24, 1970 to Sandoz Pharmaceuticals, the manufacturer of Serenitil, that it stop advertising the drug as a treatment for alcoholism. FDA's letter alleged that the ad falsely and misleadingly represented or suggested that Serenitil "diminishes the need for drink" and is useful as a prophylaxis against or treatment for alcoholism.

"Complicating FDA's objection to the ad is the approved claim in the first paragraph of the package insert stating the drug is effective in the treatment of alcoholism (among many other conditions). Elsewhere in the "indications" insert, the claim is modified to limit use to the amelioration of anxiety, tension, depression, nausea, and vomiting in acute and chronic alcoholics."

In other words, the drug is not a specific treatment for alcoholism and, therefore, the ad was stopped. But the FDA not only failed to require that another ad be published to correct the false one, but also failed to require that the correct information be transmitted to prescribing physicians by other means. FDA did not more than this, because it had carelessly approved the false labeling claim in the first place.

This was a serious case and if, in the future, FDA takes no more effective action than this, then it's unlikely that any lasting improvement of prescription drug advertising will be achieved.

Unquestionably, FDA ought to set up clear and consistent guidelines for the benefit of our prescription drug manufacturers, who, by and large, do a commendable job. In addition, FDA enforcement policies should be justly and uniformly administered.

These and other related actions must be taken, and our subcommittee intends to maintain surveillance to see that this is done. The health and well-being of every member of every home depends upon truthful drug advertising.
