A divorce was granted in the case of James Alfred Sandling, III vs. Kathryn Sherrod Sandling.

Honey Crystals
If honey stored in the refrigerator has granulated, place the jar in a pan of warm water until the crystals have disappeared and the honey has reliquified.

Two people were injured in this one-car accident around 9 a. m. Sunday morning on Highway 158 between Warrenton and Macon. According to Highway Patrol reports, the driver, Joseph Kearney, 57, of Baltimore, Md. lost control of the 1981 Chevrolet which was heading west when a two-year-old passenger jumped off the front seat. Kearney, in attempting to catch the child, lost control of the car, which ran off the road to the left about 212 feet, tore down a mailbox, and uprooted a tree before coming to a halt. Kearney was treated at Warren General Hospital for lacerations and transferred to Duke University Hospital, and the child, Tanya Brown, was treated and released to her parents, according to a hospital spokesperson. Trooper D. C. Day investigated the accident. (Staff Photo)

Funds For Warren Roads Are Given State Approval

RALEIGH — The North Carolina Board of Transportation, at its monthly meeting here Friday, approved \$42 million on a county-by-county basis for secondary road construction improvements. The appropriation, and possibly one million dollars more, is expected to be allocated by the 1983 General Assembly before the session ends this month.

According to State Transportation Secretary W. R. Roberson, Jr., "Without the 1981 General Assembly's passage of Governor Jim Hunt's 'Good Roads' program, the \$42 million in funding to improve our secondary roads system would not be available. We are, indeed, appreciative of the legislative decision, which guaranteed that 1 3/8 cents of the state's gas tax revenue be used for secondary road improvements. The funding will enable us to improve and maintain an all-weather secondary road network."

The amount of funding for each county is determined by a formula established by the state legislature. According to the formula, every county receives a percentage of the total funds based on the unpaved secondary roads in the county in relation to the total mileage of unpaved secondary roads in the state.

Board members have been meeting with the 100 county boards of commissioners in public meetings across the state to review and approve projects to utilize these funds.

According to Secretary Roberson, as of January 1, 1983 Warren County had 192.07 miles of unpaved secondary roads. The total unpaved secondary system statewide contains 18,486 miles.

Warren County's share of the secondary road allocation approved by the board Friday is \$438,336.00.

Roberson noted that North Carolina's secondary road system is composed of 59,598 miles. He said, "These roads, many of which were the old and narrow farm-to-market roads, have become vital home-to-work routes for our citizens."

Funds allocated Friday will be used for improvements to the secondary road system such as new paving, widening existing paved roads, improving unpaved roadways to an "all weather condition," replacing small bridges and strengthening paved roads to relieve present weight restrictions.

WHAT'S NEW

Super Padlock
The Manolex 100 padlock uses gears instead of pins making it virtually unpickable. The locking device cannot be released by drilling through the keyhole nor can a key be made by impression. From Hudson Security Products Inc., 475 Fifth Ave., Suite 511-A, New York, N.Y. 10017.

CONSUMER CHECKLIST

Firewood
Prepare and store firewood now for next winter in order to give the wood time to dry. When first cut, green wood is about half water and half wood. Green wood requires six to nine months to reach 20 percent moisture content, a more efficient heat-producing range with less soot and creosote to build up in your chimney.

Underground Burning Yields Cheaper Fuel

Recent U.S. Department of Energy (DOE) study shows that many chemical products like methanol, hydrogen, and carbon dioxide can be produced as cheaply—in some cases more cheaply—by converting coal to gas underground as by conventional means.
