Keeping Healthy

Stop A Nosebleed

Common nosebleeds, according to the Mayo Clinic Health Letter, can be stopped in minutes. To help stop a nosebleed, sit or stand up to reduce the blood pressure, and then, pinch your nose with your thumb and index finger for 5-10 minutes. The pressure point—those fragile vessels tition of cartilage separate nostrils (called the septum)—stops flow of blood.

“Thank You”

Perhaps you sang a lovely song, Or sat quietly in a chair; Perhaps you sent beautiful flowers; If so, we saw them there. Perhaps you sent or spoke kind words As a friend could say; Perhaps you were not there at all Just thought of us that day. Perhaps you prepared some tasty food, Or maybe furnished a car; Perhaps you rendered a service unseen Near at hand or from afar, Whatever you did to console the heart, We thank you so much — Whatever the part.
