Elyria, Ohio, March 22.
To Whom This May Concern:
In relation to the Wood Fiber Plaster will say that I have had occasion to test its merits, and I have no hesitation in saying that I consider it the best plaster now on the market.
I have seen it on the walls and have talked with the merchants who have used it, and without exception they endorse it in the highest terms.
With qualities that defy competition it is bound to elbow its way into general use. Perhaps it will be proper to say that I have not a dollar's interest, and never had, in the sale of this commodity. My sole reason for looking up its merits was due to the fact that I am building fifteen houses and wanted the best plaster within reach.

On the Way To Town
Nothing sells goods as quick as an attractive sign board. It attracts the man with the "dough" on his way to market, and by placing a few boards on the main roads you have a customer by the time the party reaches the city. My hand-painted signs in rich, attractive colors do the work. Any design you want. My prices are reasonable.

TO REACH MASSES

(Continued from page one)

self to meet the requirements of the changed social and economic conditions. Adjustment has taken place in many lines of human action. Production by labor has changed and man has adjusted himself to meet that change. He has become the machine of a machine. Philosophy and science thought in many cases has been reconstructed as a result of new discoveries. Theologic thought is undergoing a change, for creed is no longer the primary idea but the teachings and principles of the Man of Nazareth. But when we examine our church polity we find that we are working along the lines that were largely in vogue fifty years ago.

At that time the population was largely rural, and there was but one problem, which consisted only in finding ministers enough to preach the Word of God to them. The people attended church on the Sunday. There were no things to tempt them to stay away. They met their friends at the meeting house and the church was the center of social attractions. Most every one was socially the equal of others. There were no problems to solve such as face us today. Today the population is largely urban. The laborers of the mills and factories have congested in certain districts of every city. Most of them being coming to the city were members of some church and were good attendants. When they come to the city, sometimes a shrinking timidity causes them to keep away from the church. It often non-attendance is caused by fear that their clothing is not stylish enough. Various other causes contribute. Perhaps no Christian man of woman gives them any encouragement.

A minister may drop in to see them and invite them to attend his church, but if they fail to make an appearance at an early date he may never call again until perhaps he is summoned of uplift and inspiration to the tolling millions of laboring men and women of our country.

The principles of the Nazarene are sane and practical and the church must do more practical work in order to save the souls of men. We want a new church at Burkhead. Do we want it to gratify our own ambition or do we want it in order to better advance the cause of Christ in our midst by putting into the lives of the poor people around us more of gladness and sunshine? Yes, let us build the church, but let us change our methods of work.

Let us confer real blessings upon the people in our community. Here Mr. Williamson said conditions are such in North Winston as to require more than pastoral visiting and Sunday preaching. Work on humanitarian lines is needed. A day-nursery in North Winston at present would be a God-sent blessing to many poor women who have to work in the factories to get bread to fill the mouths of their children. We need a church in this part of the city with many features of the institutional church. Every church member needs to do some specific work in the church to help make better the conditions of the people around us. We need a church with bath rooms, reading and recreation rooms, etc. We need employment bureaus and all the adjuncts of human associations so as to help lift up the lives of these people.

MR. E. P. ALBEA WINS OUT.
Judgment in Slander Suit Brought by Citizen of Raleigh.

The Raleigh correspondent of the Greensboro News says: A judgment was signed in the slander suit brought by George L. Tannofski, deputy clerk of the United States court here, against Eugene P. Albea, of Winston-Salem. The judgment is in favor of the defendant and taxes Tannofski with the costs. Judge Council held that the facts in the complaint did not constitute a cause of action. Messrs. Busbee and Busbee, counsel for Albea, claimed that Albea's utterances about Tannofski were privileged communication and could not be a basis for a slander suit. Tannofski did not have a lawyer in the case. The suit he brought grew out of reports that Albea made assertions or slanders on Tannofski while in the hotel at Durham in 1904 attending the grand lodge of Odd Fellows.

Stranger Attacks a Girl.
A short heavy-built, swarthy foreigner, with black hair and stubby mustache, and wearing a grey coat, a black coat and light trousers, went to the home of "Squire" D. A. McCord, in Paw Creek township, Mecklenburg county, Sunday morning and attacked Miss Mollie McCord, the 22-year-old daughter of "Squire" and Mrs. McCord, knocking her down, choking her, tying a handkerchief around her neck and chloroforming her until she was unconscious. The Charlotte Observer says: As the fellow beat the young woman in the face, he kept telling her that it was money that he wanted, but he left the house without having searched for any. He did not originally assault his victim and the mystery is what his purpose could have been.

Company No. 2 Wants to Go.
At a meeting of Winston Steam Co. No. 2 a few nights ago the company decided to attend the State Firemen's convention at Asheville in a body provided the aldermen will consent to let them go. The company will not take any of its apparatus but go to have a general good time.

Choose Your Paint Yourself

A man should take such precautions as he can to safeguard any investment he makes. A house owner's expense for painting is very often larger than it would be if he personally looked after the material put upon it. There is often a difference of three years in the wearing of two different paints. Certainly, in this case, time is money. If you will see that Pure White Lead mixed with Pure Linseed Oil is used on your house, you will place your painting bills on a reasonable basis. You can tell the pure lead from the adulterated kind by the brand—

LEWIS
Pure White Lead
(Made by the Old Dutch Process)

Manufactured for years and, as any experienced painter will tell you, the standard by which others are judged.

Send for a booklet containing several handsome reproductions of actual houses, offering valuable suggestions for a color scheme in painting your house. A test for paint purity is also given.

SCIENCE PREVENTS BALDNESS.
The Fatal Germ and Its Remedy Now Facts of Science.
It is the rarest thing in the world for a man to be necessarily bald. No man whose hair is not dead at the roots, need be bald if he will use Newbro's Herpicide, the new scalp antiseptic. Herpicide destroys the germ that cuts the hair off at the root; and cleans the scalp of dandruff and leaves it in a perfectly healthy condition. Mr. Mannett, in the Maryland Block, Butte, Mont., was entirely bald. In less than a month Herpicide had removed the enemies of hair growth, and nature did its work by covering his head with thick hair an inch long, and in six weeks he had a normal suit of hair. Sold by leading druggists. Send 10c. in stamps for sample to The Herpicide Co., Detroit, Mich.
