Newfoundland Fisheries Dispute.
 (Special to The Sentinel.)
 ST. JOHNS, Newfoundland, Nov. 2.—The Salt Act, which forbids Newfoundlanders to fish on board foreign vessels within colonial waters, is causing considerable trouble here. Prosecutions of a number of fishermen who have been shipped by Americans outside the three mile limit are pending. The government's action is evidently intended to deter Canadians from going beyond the marine boundary to join the American vessels and thus be the means of preventing American vessels from manning their boats during the fishing season.

Kansas Farmers' Institute.
 (Special to The Sentinel.)
 ABILENE, Kan., Nov. 2.—Professor A. M. Ten Eyck of the Kansas State Agricultural College, who is accredited with being able to produce an enormous crop on land not even classed as arable was the principal speaker at the annual meeting of the Kansas Farmers' Institute today. His address was of great importance to farmers and the public generally, as he showed how practically valueless land could be made highly productive. Another interesting feature in connection with the conference was the address of Mrs. Henrietta Catein, an acknowledged efficient teacher of domestic science.

They were met at the boat by 22 Americans and were escorted to an institution where they will remain some time and study the Japanese language. There are six other missionaries undergoing training at the institution and all are well pleased with their surroundings.

The "Piano & Organ Purchasers Guide,"
 of New York, Has the Following to Say About the Harvard Piano:

"The Harvard piano has been before the musical public for many years and enjoys an enviable reputation as instrument of the better grade. As a piano of high musical quality the Harvard is popular with musicians, while its remarkable durability makes it a favorite with dealers throughout the country. Much has been added to the reputation of the Harvard through new scales created in 1901 and new and beautiful case designs which have recently made their appearance on the market. In tone quality the Harvard ranks high. Its action, manufactured expressly for the Harvard is of high excellence and is well adapted to the use of both musician and student. The durability of the Harvard is insured by the use of an unusually fine class of material and the employment of skilled labor. The reputation of the Harvard and its position in the estimation of musician and dealer is advancing rapidly. Capacity of factory, 2,500 pianos per annum, incorporated in 1887."

No comment on the above is necessary. We have a very complete stock and our prices are always lowest.

PINNACLE BEER

is a promoter of genuine temperance. It is a food as well as a drink, and is made from pure mountain water. It is heavy in malt and extremely light in alcohol; well aged, mellowed and thoroughly sterilized.

Convince yourself of the fact that Pinnacle Beer is a temperance food-beverage

Dr. Joseph Zeisler, of Northwestern University, Chicago, says: "The chief point in favor of beer compared to alcoholic beverages lies in the small percentage of alcohol contained, and the fact that it is responsible for few drunkenness cases."

All these good qualities are brought to the highest perfection in Pinnacle Beer.
