

Plan No. 4—This Very Attractive Home Was Drawn By Architect W. C. Northup, of this City.

The house is bungalow fashion and is a type entirely new in this section. It shows a bed room on first floor and has a number of notable advantages that will appeal to those who appreciate comfort and convenience.

The Standard Building & Loan Association offers those who may not have the ready money the easiest and best proposition by which to build the house and own it in seven years' time. You are your own landlord and the rent money pays for your home. The 5th series opens April 1st, 1910. See R. S. Galloway, Treasurer.

You feel dull, poor color, heavy feeling all over, that's Winter's impurities in the system. Clean them out, drive them away with Hollister's Rocky Mountain Tea. Do it tonight. You'll be well tomorrow. E. W. O'Hanlon.

BASEBALL AT BETHANIA; A SPLENDID CONCERT.

BETHANIA, March 29.—A spirited game of baseball was played here yesterday between the West End team of Winston-Salem and Bethania with a score of 15 to 6 in favor of Bethania. A large crowd attended the game and great enthusiasm was manifested. Unfortunately for the West End team most of the crowd were "rooters" for the Bethania team. The Bethania nine say they have never played a game with a more congenial and sociable crowd of boys, as the friendly feeling existed during the entire game. The musical concert given last night in the auditorium of the high school building was attended by a large crowd. The program was of the highest order and the exercises were greatly enjoyed by everyone. A few selections were rendered by the Bethania Band. The concert was also a financial success.

MR. TAYLOR FAVORS A DEPARTMENT OF HEALTH

To the Editor:—Some time ago the Government appointed a committee of one hundred eminent specialists to look into the health of the people of this country. This committee has come to the conclusion that the Government should have a Department of Health established at the National Capital, and a bill has been introduced into the Senate the object of which is to establish a National Health Department. This bill is known as Senate bill 6043.

I think, sir, the movement a good one. You have told your readers from time to time that diseases that have been considered heretofore unavoidable, providential visitations and hence uncontrollable, have been found to be due to natural causes, and easily controlled when people just know how. This statement applies especially to diseases in our tropical possessions and portions of our tropical states. Just here allow me to quote a short extract from one of the speeches of ex-President Roosevelt regarding this subject:

"I hope there will be legislation increasing the power of the federal government to deal with certain matters concerning the health of our people everywhere; the federal authorities, for instance, should join with all the state authorities in warning against the dreadful scourge of tuberculosis. I hope to see the national government abreast of the foremost state governments."

It would be well for those in favor of the establishment of this department to write to their congressmen and both senators, asking them to support the bill, so that home folks can get the benefit of the knowledge of the diseases that infect up and be informed how to cure and prevent them; and be sure and mention the bill as given above.

J. P. TAYLOR.

SHE KNOWS

A Little Good Common Sense

Will help you select the right automobile. Now that all "factories" are springing up over night, and "dealers" on every block, all of them with the "only" car, the buyer WHO HAS COMMON SENSE should use it.

COMMON SENSE WILL TELL YOU

THAT a company who were building FINE MACHINERY 25 years before the day of automobiles should build an automobile than a plow or farm wagon factory who have just plunged into the auto business.

THAT a company who BUILT (not assembled) 2,000 automobiles in 1903 (and every one of them still doing fine work)—who have built an increasing number each year, reaching 6,000 in 1909—would seem to be on a basis than a concern who started in 1909 and claim they will turn out 15,000 or 25,000 in 1910, or more.

THAT a company offering their FIFTH MODEL 4-cylinder car, brought out in five consecutive years, building thousands of each model, each improved by the experience with the preceding, should be more likely to be free of faults than any company producing their first or second 4-cylinder car.

THAT the company who could win the Dewar trophy on a standardization test must have a wonderfully perfect organization. (If you don't understand what this means, let us explain it.)

THAT HARDENED steel gears and shafts will last longer than SOFT steel.

THAT standardization carried out to half the thickness of a hair INSURES perfect workmanship.

THAT it is tremendously important to be backed by a DEALER who has had experience and knows how to take care of your car.

THAT only the established dealer selling a large number of each model CAN keep a full stock of parts.
