The police believe the plot was directed against the Young Turks and Germans.

GARDEN OF EDEN STORY IN BRAZIL

Philadelphia, April 27.—Discovery of a tribe of Indians in the mountains between Brazil and Guiana, who have a new story of the Garden of Eden is reported in a letter received from Dr. William C. Faraib, leader of the University Museum Amazon expedition.

The people came upon a great tree bearing all sorts of food. Then they said: "Here is where David gets the food. Let us come here and get it ourselves, and we will not have to offer up thanks to him."

Next day they hunted up the god and told him not to bother about fetching them food, that they could take care of themselves.

David replied that he would compel them to work for their dinners, and announced that the tree would be cut down, but he offered them the chance to cut off as many branches as they choose. All that was required was to plant the branch and water it each day. The people planted a lot of the branches, but grew tired and said they had enough varieties. This is why there were so few varieties of fruits and vegetables in the world.

SOUTHERN PROBLEMS DISCUSSED; A STRONG ADDRESS BY DR. KNAPP

Muskogee, Okla., April 27.—Self-supporting agriculture is the largest problem for the South to solve, according to Dr. Bradford Knapp, head of the farmers' cooperative demonstration division of the United States department of agriculture, who spoke before the Southern Commercial Congress here today.

"To solve it, cash markets for locally grown produce should be established," he said. "Loans should be made upon condition that the farmer will make his farm as nearly self-supporting as possible."

Dr. Knapp pointed out that it is the duty of cities to make contributions to the country surrounding them.

"The country is the important thing," he continued, "and in lending a hand to help the country to prosper, a city is helping itself to prosper."

The speaker pleaded against the one crop system and pointed out that millions of dollars worth of fruits, vegetables, hay and grain imported annually into the south could be raised as cheaply there as elsewhere.

Col. Robert Mixson, a planter of South Carolina, said "the American farmer generally is like an ostrich that sticks his head in the sand and won't see." He asserted that the farmer of today refuses to use business judgment supplying that for which there is a demand in such quantities as are needed.
