

A Cure for Toothache.

It is not at all uncommon to have toothache with perfectly sound teeth, or in teeth that have been recently filled. Without explaining the cause for this I would simply recommend a very convenient little application, which you can readily prepare yourself and keep on hand. Take a piece of cambric skin, or of fine closely woven flannel, and soak it thoroughly in a good extract of Jamaica ginger, or what is better still, in tincture of capsicum, which you can obtain from any druggist. Let this dry, and put it away until the time of need. To use it in the case of the toothache I have mentioned, with a pair of scissors cut a small piece off and place it between the gum and the lip, directly over the root of the offending tooth. This will act as a counter-irritant, and its effect is really marvelous.—*Laury McHenry in New York World.*

Visitor—Miss Devereaux is quite musical. Host—Yes, very much so. Visitor—Does she sing in English? Host—She does; and I'm very sorry she doesn't sing in Kalamazoo, or some other far away place.—*Exchange.*

Weakness.
There is no symptom of ill health more discouraging than weakness. That constant feeling of fatigue and disinclination to exert oneself. Life to such seems languid and insipid, and the invalid almost becomes reconciled to die. Do you suffer thus? Would you be cured? Do you wish your strength renewed? Try a bottle of Dr. Bull's Sarsaparilla. It will greatly assist your recovery. Soon will you then experience a feeling of new life, and returning power. No longer will the least exertion give fatigue and cause your heart to palpitate unreasonably. No more will the feeling of dizziness oppress you when you suddenly get up from your chair. No longer will indigestion and irregular disorders continue to break down your constitution. Every function will resume its natural activity and you will soon enjoy a glorious feeling of self control and confidence. No longer nervous, afraid and imaginative of gloomy disaster. Ambition will take the place of discouragement and you will be happy in health and kindly hope.—*Caldwell Post.*

If some one should discover a country where people can't remember, is there any one in the world who would not try to go there?

Many persons are broken down from over-work or household cares. Brown's Iron Tonic rebuilds the system, aids digestion, removes excess of bile, and cures indigestion. A splendid tonic for women and children.

The Pullman Palace Car Company now operates 2,050 sleeping and drawing room cars over 120,087 miles of railroad in this country.

Big Inducement for Druggists.
The druggists throughout the country are making a specialty of handling Hawkes' Crystallized Lenses. They write that they make more money, in proportion, out of the sale of these fine glasses than they do of any other goods. These lenses have been advertised extensively for many years, and have received the endorsement and approval of thousands of the best citizens of the United States. They are eagerly sought after by spectacle-wearers everywhere, and will pay dividends and general merchants to put in a stock of these goods. Exclusive sale is given to one firm in each town. The trade can be built up, and the entire spectacle business of a large section can be monopolized with these goods. Factory, Deane St., and Atlanta, Ga. For terms and prices address A. K. Hawkes, 18 Whitehall St., Atlanta.

The little crown prince of Siam has won a prize in a story competition.
The least exercise tired me out. I could not get up from my chair without feeling dizzy. My food and drink distressed me. My digestion was poor and my kidneys weak. Dr. Bull's Sarsaparilla gave me back my health and strength. I recommend it to all my friends.—*Claresse Overton, La Fayette, Ind.*

An honest man pays up. The other kind has to pay down.

A man who has practiced medicine for 40 years ought to know just from sugar read what he says.
TOLEDO, O., Jan. 10, 1887.
Messrs. F. J. Cheney & Co., Gen'l Agents—I have been in the general practice of medicine for most 40 years, and would say that in all my practice and experience I have never seen a preparation that I could prescribe with as much confidence of success as I can Hall's Catarrh Cure, manufactured by you. I have prescribed it a great many times and its effect is wonderful, and would say in conclusion that I have yet to find a case of Catarrh that it would not cure, if they would take it according to directions.

Malaria
Is believed to be caused by poisonous miasms arising from low, marshy land, or from decaying vegetable matter, and which, breathed into the lungs, enter and poison the blood. If a healthy condition of the blood is maintained by taking Hood's Sarsaparilla, the miasms are much less liable to malaria, and Hood's Sarsaparilla has cured many severe cases of this distressing affection even in the advanced stages when the terrible chills and fever prevailed. Try it.
And if you decide to take Hood's Sarsaparilla do not be induced to buy any substitute.

A Princely Donation.

The magnificent gift of Baron Hirsch to the Hebrew emigrant charity and aid fund of \$2,400,000, has created much comment and considerable interest in philanthropic circles.

The deed of the munificent gift which had been drawn up and signed by Baron Hirsch, had been laid before the trustees, as was a letter from the baron, instructing them to draw upon him for the amount on March 1. The gift is not hampered by any restrictions, whatever, and will be immediately invested in this country.

The income of the fund is expected to be \$10,000 a month, this being the sum which had been paid by the transatlantic donor in monthly remittances for over a year. Baron Hirsch merely executes part of his avowed intention of distributing that portion of his fortune which he wishes devoted to philanthropic purposes during his lifetime. The income will be devoted entirely to the relief and education of Hebrew immigrants and their children.

GIRLS do have some advantages, anyway. Of 500,000 girl babies born in Massachusetts, 384,223 reach the budding age of fifteen. Of the same number of boys, only 350,430 reach that age. In the happy land of New Jersey, where there are fewer factories and more peaches and sweet potatoes, both babies have a better chance and the figure stand 368,311 and 378,293.

LADIES needing a tonic, or children who want building up, should take Brown's Iron Tonic. It is pleasant to take, cures Malaria, Indigestion, Biliousness and Liver Complaints, makes the blood rich and pure.

"WHAT AN ASS AM I!"

The ass thought himself as fine looking as his neighbor, the horse, until he, one day, saw himself in the looking-glass, when he said "What an ass am I!"
Are there not scores of people who cannot see themselves as others see them? They have had blood, pimples, blotches, eruptions, and other kindred disfigurements. All these annoying things could be entirely eradicated, and the skin restored to "lily whiteness," if that world-famed remedy, Dr. Pierce's Golden Medical Discovery, were given a fair trial.
It cures all humors, from the ordinary blotch, pimple or eruption to the worst scrofula, or the most inveterate blood-taints, no matter what their nature, or whether they be inherited or acquired. The "Golden Medical Discovery" is the only blood-purifier guaranteed to do just what it is recommended to, or money refunded.

HOUSEHOLD AFFAIRS.

NOT COMPLEMENTARY TO OATMEAL.
It is by no means an undisputed fact that oatmeal is a wholesome food for everybody. A well-known writer on food in connection with health recommends clean, cracked wheat much more suitable for "nervous, studious or house-keeping women and children" on account of its containing the needed phosphates. The same authority says that oatmeal, especially the finer sorts in which the housekeeper delights, often passes digestion in a crude shape as masses of starch, which clog the body without nourishing it.—*New York World.*

A GLOVE PRESS.
A glove press is very useful. To make it, you take an ordinary brick, and having dried it thoroughly, you paste brown paper over it, packing it, as it were, neatly in a piece of paper well saturated with paste. Over this you stretch a piece of brightly colored cretonne or Indian silk, or, if preferred, a piece of white leather or satin, to be afterwards hand-painted. Then handles of strong ribbon are fixed. Two pieces of board of a suitable size are covered with the same material as the brick and lined with white muslin. The thing is made easily, is a useful present and finds a ready sale at fancy fairs, and if prettily painted, may command quite a high price.—*Boston Transcript.*

PROPER WAY TO BOIL.
There is no process of cooking which requires so much care and is so often neglected as boiling. This is the most extravagant method of cooking any meat if the water in which the meat is cooked is not utilized as stock. If of necessity no meat can be boiled without losing some of its nourishing qualities and enriching the water in which it is cooked. The French process for braising, by means of which meat is closely covered and slowly boiled in a stock which becomes gradually absorbed by the meat, is the only one by which the meat does not suffer actual loss. There should be a slight ebullition at the edge of the pot, nothing more. The ebullition should be kept up steadily until the meat is tender, and no longer, as nothing is more injurious to any boiled dish than to allow the boiling to stop or to cook it after it is done.—*Chicago News.*

HOMEMADE GOOD MITTENS.
Spread the fresh hide of a young calf on a floor and tack it around the edge with small nails, stretching it in all directions as you nail. Powder a lump of alum as large as an egg, mix with half a pint of salt, put it on and let it remain until perfectly dry. Get a smooth strong paper, thirteen inches long, eleven inches wide; fold the longest edges together and trim one end perfectly round. Now open the paper and make a round two-inch hole about an inch to one side of the fold for the thumb. Laid one side up it makes a right-hand pattern; turn it over and it makes the left. The piece for the thumb is made on the same principle, folding a paper and rounding the end, having it as wide at the base as at the circumference of the hole. Wash the salt off the hide, lay the pattern, mark around it with a pencil, and cut out. A good hide will make two pairs. Sew up hair side outward, softening with water, making holes with an awl and using strong silk or a cobbler's waxed end, sewing straight through with two threads, like harness work. Turn the mittens flesh side out; oil to make pliable. They will be stiff at first, but soon become fitted to the hand, and few sale mittens are so durable.—*New York Tribune.*

RECIPES.
Coffee Cake—One-half cup of sugar, one-half cup of butter, one-half cup of molasses, one-half cup of coffee, one teaspoonful of all kinds of spice, one cup of chopped raisins, one-half teaspoonful of soda. Flour to thicken.
Roll Jelly Cake—Three eggs, and one cup each of sugar and flour; add sugar, two tablespoonfuls of water and a pinch of salt; lastly, very gradually stir in the flour, in which has been sifted a heaping teaspoonful of baking powder. Light brown sugar is best for roll cake.
Cookies—Two cups of sugar, one cup of butter, three eggs, one (level) teaspoonful of saleratus dissolved in a spoonful of water. Flavor with nutmeg. Stir in sifted flour until the dough can be rolled with a rolling pin; the softer the dough is the better; then roll, stamp out in small cakes, sprinkle sugar lightly over them while in the pans. Bake quickly.
Crab-Apple Pudding—Take one quart of crab-apples, nicely cored, place over the fire with one pint of sugar and three cupfuls of cold water. Cook until clear and thick. Place in a deep pudding dish, and pour over a batter made as follows: One-third of a cupful of butter, one cupful of sweet milk, two eggs, a spoonful of baking powder, and flour to make a thin batter. Bake one hour. Serve with sweetened cream.
Molded Rice—Boil half a pound of rice in water till soft; dissolve half a pound of loaf sugar in the juice of two good lemons and a wineglass of rum; strain the rice from the water, and mix with it the lemon juice, sugar and rum, adding the rind of the lemon grated very finely; stir it all well together, and pour it into a previously wetted mold, and set it aside in a cool place till wanted when serve with a rich custard, flavored with vanilla, or other.

Cream of Pea Soup—Boil a can of peas till quite soft, then mash them through a sieve or colander. Return to the saucepan, add salt, a little cayenne pepper, the yolk of one egg, well beaten, one teaspoonful of sugar. Send one quart of milk and stir into it one tablespoonful of butter and two of flour which has been blended. When this begins to thicken, pour it on the strained peas. Boil up quickly, add at the last a tablespoonful of finely chopped parsley, and serve with blocks of bread half an inch square, which have been browned in a pan with butter.

A Milk Bath.

A milk bath means a beautiful complexion and luxury. If purses would permit the extravagance the city milkman would not. Water clear is just as beneficial as water combined with a little milk.
Here is a mock milk bath that is almost as beneficial to the skin as pure milk. Make up a dozen or more bags of cheese cloth about a foot square. Fill them with oatmeal and pure white castile soap, shaved fine—two-thirds oatmeal and one-third soap. Add a little borax and some powdered orris root and tie up the bags securely. One bag in twelve gallons of water makes a delightfully refreshing bath and the skin like velvet.—*Chicago Herald.*

Borax water is excellent for sponging either silk or wool goods that are not soiled enough to need washing. Cashmere or any wool goods may be washed with a little borax in the water and the color not be injured. They should not be rubbed on the board, but only between the hands and hung on the line to dry without wringing. If treated in this way and pressed on the wrong side as soon as dry enough they will look like new.—*Washington Star.*
