## Timber Resources of Yadkin County

Press Bulletin N. C. Geological and Economic Survey

(Continued from last week)

Fifty-seven per cent of Yadkin County is covered with some sort of forest, though little or no virgin timber remains. Most of this is second growth or culled forest which has never been cleared. Part of the area is covered with good timber which was left when the land was previously cut over, but the larger part has been heavily cut and the younger growth badly damaged. On twenty-five per cent of the forest area, however is old-field pine, much of the timber on which is as yet too small for sawing purposes. About one-third of the old-field area contains merchantable timber and is now furnishing a large part of the timber output of this county. Most of this is shortleaf pine, though many of the younger stands are almost pure scrub pine. This species is perhaps most in a strip a few miles wide running northeast and southwest across the center of the county. Along the western edge of the county on the higher ridges and knobs of the Brushy Mountains the mountain type of chestnut and chestnut oak is found, constituting six per cent of the forest area of the county. The greater part of the older chestnut oak has been cut for tanbark, but occasional holdings are still found where the timber has not as yet been removed. In the coves on the north and east slopes there is found excellent second-growth poplar timber which has become of merchantable size in comparatively few years. The main forest type of the region which is the mixed pine and oak type has been largely cut over. This comprises sixty-nine per cent of the forest area. Nearly half of this, however, can be classified as oak forest, all the pine having been removed or possibly none ever having been in these woods. There are yet a few small tracts of original forest timber which will cut from five to ten thousand feet per acre. The average stand of timber for the entire county is only 840 feet per acre. This amounts, however, to 100,000,000 feet for the county, nearly half of which is oak, one-third second-growth pine, and the remaining sixth chiefly old growth pine, hickory, poplar, and chestnut.

Slightly more than fifty saw-mills cut nearly 13,000,000 feet of timber in the county in 1910. Of this amount over two thirds, or 8,780 M was second-growth pine, 2,600 M was oak, 900 M forest or old growth pine, and 380 M poplar. The stumpage of timber varies according to the location of the quality of timber, and the man who sells. Back from the railroad old-field pine is frequently sold for as low as 70 cents per M, while \$1 is a fairly good price. Oak and forest pine frequently bring \$4 per M if fairly accessible. Some mills pay an average price of \$2.50 for all kinds of timber. Most of the timber is sold in a lump, however, and the owner knows nothing of the actual volume.

Forest fires fortunately are infrequent and do little damage. They are usually due to the carelessness of people clearing land or to sawmill men. One instance of a bad fire in the western part of the county is noted where the fire started from a sawmill and the millman took no pains to stop it, but is reported to have told his hands to let it go.

Every effort should be made to secure an increase in proportion of shortleaf pine in the second growth. There is a tendency to this increase in the original oak and pine forest, and if given a fair chance it will no doubt form from one-third to one-half the stand in the future forest. Seed trees of this species should be left here and there, fire kept out, and the scrub pine as well as the inferior hardwoods should be cut as close as market conditions will allow.

## Resolutions of Respect

Whereas the Teachers Institute of Yadkin Co. session 1912, now closing, having been conducted by Prof. J. S. and Mrs. E. B. Foreman, and having been enjoyed by all, therefore be it resolved,

1st That we wish to express our appreciation of their untiring efforts to raise the standard of the course of Education in our county, and believe that great efforts of the Teachers will be made to carry out their instructions.

2nd That we believe the teachers will go to their respective places of work greatly strengthened and mentally equipped for the great duties which lie before them.

3rd That we hereby tender our thanks for their kindness and courtesy throughout the entire session and we bespeak for them the success their efforts merit in any field they may enter.

4th. That a copy of these resolutions be sent to the various county Papers for publication.

Respectfully submitted,  
Mrs. J. Q. Holton  
J. C. Pinnix  
C. C. Cash  
Committee.

## Roosevelt Club Organized

The Republicans of Knobs township, Yadkin county, met at Haynes' School House last Saturday afternoon, and organized a Roosevelt club. The attendance was good considering the fact that but one days notice of the meeting had been given. A club was organized and started off with 35 members. Gentlemen were present from different sections of the township and all reported the sentiment as practically unanimous for Roosevelt.

T. B. Haynes, Esq., was chosen President of the club; R. L. Henric, Vice-President, and Sant Vestal Secretary and Treasurer.

It is the intention of the club to enroll every voter in the township who is in sympathy with Colonel Roosevelt's candidacy, and this will include practically all the Republicans of the township besides a number of Democrats.—Elkin Times.

## Tobacco Cutting Time

Editor the Ripple:—

Forty seven years ago I began the work of growing tobacco and a few years later I decided or rather discovered, that there were certain dates better than others upon which tobacco should be cut in order to cure up well and have a heavy body, all the time since I have been very attentive to the study of the nature of the weed while growing and as a result I have the way to tell the better dates from the sorry ones. To explain I'll say tobacco contains a sap, just as a tree and tobacco also contains at intervals an oily substance which is its nature possession, but when the sap (water) rises in the stalk it pushes the oil out through the pores of the leaf upon the principal that oil and water don't mix and tobacco, if cut in such a state though apparently ripe will not cure well and will sweat and turn black in the barn, this is on account of there being only sap (water) in the stalk which when cured or dried leaves a mere chaff of the stalk and leaves, but tobacco cut when full of oil will cure up nicely and will be oily and waxy. Tobacco makes these changes from oil to sap as long as it stands on the hill, thus I believe so many farmers happen to cut at the wrong time. Farmers have experienced cutting tobacco one week and excellent success and then cut off the same piece of ground a few days later and have all together different luck. I will be pleased to correspond with any one who will enclose stamps for reply.

## Mail Carriers Will Fly

This is an age of great discoveries. Progress rides on the air. Soon we may see Uncle Sam's mail carriers flying in all directions transporting mail. People take a wonderful interest in a discovery that benefits them. That's why Dr. King's New Discovery for Coughs, Colds and other throat and lung diseases is the most popular medicine in America. "It cured me of a dreadful cough," writes Mrs. J. E. Davis, Stickeys Corner, Me., "after doctor's treatment and all other remedies had failed." For coughs, colds or any other bronchial affection its unequalled. Price 50c and \$1.00. Trial bottle free at all Druggists.

If you are a housewife you cannot reasonably hope to be healthy or beautiful by washing dishes or weeping and doing housework all day, and crawling into bed dead tired at night. You must get out into the open air and sunlight. If you do this every day and keep your stomach and bowels in good order by taking Chamberlain's Tablets when needed, you should become both healthy and beautiful. For sale by all dealers.

## Executors Notice

Having qualified as executor of John Wagoner dec'd, late of Yadkin county, this is to notify all persons having claims against the estate of dec'd to exhibit them to the undersigned on or before 30th of May 1913 or this notice will be plead in bar of their recovery and all persons indebted to the estate will please make immediate payment. May 30 1912.
