It is a well-known fact.

That food cooked by steam is more palatable, easier to digest and more nourishing than any other method.

Vegetables, that always lose much of their flavor and become watery, soggy and indigestible by boiling, are made dry, light and healthy.

Meats and Poultry, no matter how tough, are made tender and palatable. Most of the usual shrinkage is saved, (about 1/3) and all the health-giving properties preserved.

Puddings, Custards, Fruits, Fish and Oysters are cooked preserving all the flavor and juices.
