# Liver Complaint

Is more surely and speedily cured by the use of Ayer's Sarsapurilla, than by any other remedy. "I was a great sufferer from liver troubles, and never found anything that gave me permanent relief until I began taking Ayer's Sarssparilla, about two years ago. A few bottles of this medleine produced a radical cure. - Wm E. Baker, 155 W. Brookline st., Boston, Mass.

A Remarkable Cure.

Ayer's Sareaparilla has cured me of as bad a case of Abscess of the Liver as any human being could be afflicted with and live. I was confined to the house for two years, and, for the last three months of that time, was unable to leave my bed. Four physicians treated me without giving relief, and, in fact, nothing helped me,
until I tried Ayer's Sarasparille. After
using a quarter of a bottle of this medicine I began to feel better, and every
additional dose seemed to bring new
benith and strength. I used three buttles,
and am now able to attend to my business.
I walk to town—one mile distant—and
return, without difficulty. Ayer's Sarasparilla has accomplished all this for me.

## Don't Despise Onions.

A mother writes: "Once a week invariably, and it was generally when we had cold meat minced, I gave the children a dinner, which was hailed with las. delight and looked forward to; this was a dish of boiled onions. The little things knew not that they were taking the best of medicines for repelling what to relieve dropsical swellings. most children suffer from-worms. Mine were kept free by this remedy alone. Not only boiled onions for dinner, but chives also were they encouraged to eat with their bread and butter. and for this purpose they had tufts of the chives in their little gardens. It was a medical man who taught me to eat boiled onions as a specific for a cold in the chest. He did not know

## Cheap and Convenient Silos.

It is generally conceded now that the best method of preparing and keeping forage for cattle is by silos but ordinarily much expense at taches to the making of one, especially when pits are used, and the owner of only one cow cannot with profit make one of any size. gentleman of this city has, however, hit upon a plan by which he proposes to make enough ensilage to feed his cow during the winter at small expense. He has procured large number of sugar hogsheads. From about half an acre of ground he has cut and prepared a sufficient quantity of green corn, which was sown very thich, to fill the hogsheads. After filling them, he placed the heads on top, and upon the heads he placed heavy weights of rock, etc. to keep the ensilage because he is chiefly proud of this well packed. He has arranged the part of his exploit and wishes all the hogsheads in a row and built a shelter over them and says ne has a very good, inexpensive silo which will furnish as good ensilage for the winter as could be taken from a pit

Of grain crops, especially, neither the stubble above ground nor the root below is worth regarding as a fertilizer. If the straw of grain stubble can be burned, it is no waste to make this disposal of it.

# Indian Picture-Writing.

Let us see how an Indian of North America goes to work to write. Suppose a wild Indian belonging to the great cian whose members call themselves the Turtles, makes a raid on a village of hats and wigwams owned by enemies belonging to the wide-spread clan called the Bear clan. Suprose it has taken the Turtle three days of hard travel through forests and over the hills to reach the Bears. By means of their crafty spies, they find that the brave men of the Bears are away hunting moose, and that most of the square and papeoses are either in the fields of maize or in the woods, where the berries are ripe, and only a few old men and women are left behind to keep watch over some ponies and oxen. Then the Turtles, each clutching his bow, creep on the village under cover of the woods, and with a terribe yell rush at the wigwams. The old people rush into the bushes, frightened almost to death, as you can well imagine. Then the Turtles gather up all the ponies and oxen, drive them off, burn all the wigwams they can, and hurry home with the cattle. Now these savages think they have done quite a fine thing in robbing their neighbors of their cattle and plundering and burning their homes, as does one great nation in Europe, when like our Turtle chieftain, badly counseled by wicked and ambitious men, it robs another of its great province, and then forces the wretched people to obey the laws of a nation they dislike. And they wish to let other Indians know what clever robbers they have been. So the Turtle chief chooses a piece of smooth cream-colored birch bark, chews up a little tobacco to serve as ink, phicks a twig of soft-wood for a pen, and with

First comes a Turtle and it is a very big turtle, because he thinks he and his clan are very great personages indeed. Then he draws as many waving lines, to represent bows, as there are Indians in his party, and perhaps the same number of Indians with topknots; his lines bend forward to show in what direcetion the trail went. Following these a rising sun stands for daybreak, and three lines under it means that three days went by in going to the Bears. Next, he puts down as many little funny pyramids as there were Bear wigwams, and draws them upaide down to show how they were destroyed. After that he draws, as well as he can, a wee, wee bear, very small in order to show his contempt for the Bears. Finally, he draws with the greatest care as many oxen and pentes as he has captured. world of the woods to know what a great and successful robber he is. He does not tell that the Bear braves were away when he surprised the camp. and propably does not care to tell that part of the story. We may understand it from the absence of any sign for scalps.
