

FERTILIZER FACTS

From Farmers Cotton Oil Company

Do You Know ---

THAT

Some fertilizers create an acid condition in the soil, while others have the opposite effect.

Potash is more soluble in acid soils than in neutral soils, while Phosphorus is more soluble in neutral soils.

It requires 100 pounds Limestone or 74 pounds Hydrated Lime to neutralize the acid in 132 pounds Sulphate of Ammonia.

FARMERS COTTON OIL COMPANY, pioneered the use of Sulphate of Potash Magnesia for "TOBACCO".

THAT

FARMERS COTTON OIL COMPANY

Tobacco Fertilizers

Are Made Physiologically neutral and will not Sweeten or Sour your soil.

Money Point -----	3-8-3	Carolina Choice -----	3-8-5
