

Over Five Thousand People Attended the Big Prize Awarding Here Last Saturday

Eagle Rock

The W. M. S. of Hephzibah church met last with Miss Pattie Lee. Due to bad weather attendance was small. Mrs. Charlie Marshbourn in charge of program was assisted by Mesdames Walter

Marshbourn, William Marshbourn, Everette Ledford, James Buchanan, and Ed Richardson. Mrs. J. P. Winston presided over the business session. Delegates were appointed to attend the state meeting in Raleigh. The hostess served grape juice and cake.

For Your Land's Sake...

USE COTTONSEED MEAL!

...Our Own Protein-rich Feed and Nitrogenous Plant Food

Restore the fertility of your acres by using Cottonseed Meal . . . it contains plant food that will give life and power to your soil. Insure maximum growth of leaves on your tobacco plants by the use of a fertilizer that contains a liberal amount of Cottonseed Meal. A leading North Carolina Agronomist says: "All fertilizer had best have some organic nitrogen. As a source of organic nitrogen nothing is better than Cottonseed Meal for all crops." Cottonseed Meal is produced from our own North Carolina cottonseed.

Get the **DOUBLE VALUE** from Cottonseed Meal by feeding it to all your farm animals and conserving the fertilizer value by using the liquid and solid manure on the land.

FEED COTTONSEED MEAL

Cottonseed Meal and hulls should form a part of the ration of your work mules, your dairy cattle and your beef cattle. A half-and-half mixture of Cottonseed Meal and fish meal is an excellent protein supplement to be fed with shelled corn for fattening hogs, to insure rapid gains at economical cost.

Call at your local oil mill for literature or write

**BEWARE OF
IMITATIONS!**

The next best tobacco fertilizer you can buy is S-D JAMACA. Thousands of satisfied users prefer it to any other tobacco goods made.

There are now many imitations of Orange. Success breeds imitation. But, there is still only *one* Orange, as every tobacco grower knows who has used it.

Over a period of many years Orange has been challenging all comers. During the past four years 37 growers have tested it against 71 competitive plots, using every well known competitive brand on the market.

What happened? Orange's 4 year average in these tests shows that it produced \$49.40 per acre *more*—nearly \$100 per ton extra!

Do you wonder that we say "beware of imitations"?

Do you wonder that we say—Orange will outgrow, outproduce, outqualify and outdo in every way any tobacco fertilizer known.

Do you wonder that we say—if you want the kind of tobacco Orange grows, you've got to buy Orange!
