D. Finch hostesses, served refreshments during the social hour following the program.

Mrs. R. T. Harris of Wakefield was a visitor at the meeting.

FORUM AT WAKELON

On last Friday night the second of a series of Forums was held at Wakelon. Howard Y. Williams delivered an address on the question, "Is An Economy Of Abundance Possible?" The speaker divided his message into three main parts, viz: The passing of the depression and the problems it created; The potential capacity of production in America: The chances of progress in the next four years.

More than one hundred adults were present. In order that these forums may be continued it was necessary that at least a hundred attend. Speakers come at no cost to the community and an opportunity is given for discussing questions that may be asked.

Notice will be given of the date set for the next forum.

R. H. Brantley In Flood Area

When the editor of the Record learned that R. H. Brantley of Zebulon had recently returned from the flood area he asked for an account of the trip. While insisting that he might not be able to add much to what was already known, Mr. Brantley courteously wrote down and left for us facts given below, which we are glad to pass on to our readers.

On February 3 Mr. Brantley was instructed to proceed to Huntington, West Virginia, for emergency duty in the flood region. Practically every available medical service representative and some executives of the Sharp and Dohme organization were summoned to the various designated zones, Cincinnati, Louisville, Memphis and Huntington. Their mission was to assist in every way possible the Public Health Service and the American Red Cross in delivering antitoxin and vaccines, mainly of a preventative nature. They were also to contact druggists in the flooded areas and help in re-establishment of stocks where there were losses.

Mr. Brantley's zone extended from Huntington to New Martinsville, W. Va., on the W. Va. side of

STATE RALEIGH, N. C.

'MAID OF SALEM'

the Ohio river. Towns in this zone are comparatively small and, while property loss was enormous, loss of life was held to a minimum. There was mammoth evidence of human suffering and an inspiring demonstration of human sympathy.

Continuing, Mr. Brantley said: "In the face of the magnitude of this most terrible disaster emphasis should be laid upon the work of the Red Cross, the U. S. Public Health Service, men and women in white who volunteered privately for any service in their power, and last, but not least, the people of our country who were so prompt so generous and so truly what we love to feel is American-like in meeting the demands of the occasion.

"There was manifestation of sincere appreciation among the victims of 'Old Man River' and it

seems there is more reason than ever to believe that those who gave should be happy to have shared with those in such great need."

Arthur Guiterman writes: "Don't tell your friends about your indigestion; How are you? is a greeting, not a question."

SALE

Farming Implements For Sale
One riding cultivator, one-horse wagon, Cole fertilizer distributor, Cole Corn planter, Smoothing Harrow, and other farming tools and implements; lot of tobacco sticks. — Sold to Highest Bidder for cash.

SATURDAY, FEB. 27, at 2 p. m.
One Mile West of Zebulon on
Geo. B. Richardson Farm
W. W. WHITFIELD

"I SMOKE AS MANY CAMELS AS I WANT!"

says
SIG BUCHMAYR,
skiing wizard

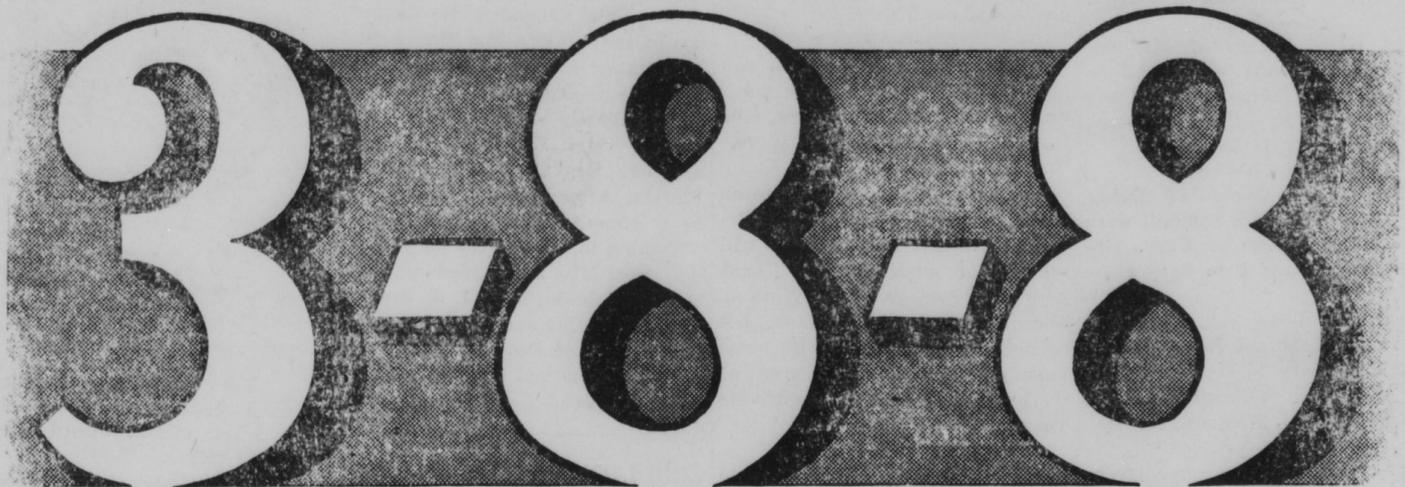

"SKIING TAKES GOOD DIGESTION," this great skiing master (above) explains. "Camels definitely help my digestion. And they don't get on my nerves."

SOCIETY HOSTESS (right), Mrs. N. Griffith Penniman III, says: "I've noticed Camels help digestion." Make it Camels and enjoy a sense of ease.

CAMELS COSTLIER TOBACCOS

HAVE YOU TRIED—

the better-balanced fertilizer for BRIGHT TOBACCO?

Some farmers never know what a fine crop of bright tobacco their land will produce because they never try using enough **NV POTASH**. Tobacco removes from the soil more potash than both nitrogen and phosphoric acid combined. Yet it very often receives the same low-potash fertilizer year after year. When yields and quality suffer, many things are blamed, when this is often simply due to potash starvation.

Are you sure your bright tobacco gets enough **NV POTASH**? Many farmers have been content with low-potash fertilizers until they tried using **3-8-8 MADE WITH NV POTASH**. They found that the small extra cost of the extra potash in **3-8-8** was their best-paying fertilizer investment, returning greatly increased yields of better quality tobacco.

Full-grained, high-quality tobacco gives more pounds than thin, tissue-paper leaf or light

trashy leaf. When you produce 1,000 pounds of tobacco per acre, an extra cent per pound due to extra quality will pay the extra cost of **3-8-8** many times over.

It costs little to try **3-8-8 TOBACCO FERTILIZER**. Usually only about six pounds of average tobacco per acre will pay the difference between 1,000 pounds of **3-8-8** and 1,000 pounds of **3-8-5**. Farmers who try **3-8-8** keep on using it because *it costs little and pays big!*

Your fertilizer man knows the importance of plenty of potash in tobacco fertilizer. That's why he has **3-8-8** on sale. Tell him you want to try using more **NV POTASH** this year. Tell him you want **3-8-8 TOBACCO FERTILIZER MADE WITH NV POTASH**—the mixture that contains so much extra-profit-producing plantfood at such low extra cost. Your tobacco will thank you with **YIELDS+QUALITY**.
