

NEWS OF THE WEEK

CHEMICAL SOCIETY MEETS

The American Chemical Association is this week holding its 93rd meeting in Chapel Hill. Bringing together noted chemists from practically all over the world, the association honors Chapel Hill and the state by its choice of a meeting place.

Reports are being made of new discoveries in the realm of chemistry and new uses for elements and compounds already known. One formula will make more than a million new chemicals from sugar. Another has to do with the extraction of metals from the earth. One report deals with the advantages of the use of "heavy water" by aged persons. To the average mind such discoveries are beyond comprehension and ordinary folk must wait for further development by those who have made such study their life work.

BIG AMUSEMENTS BOOKED STATE FAIR

Manager Dr. J. S. Dorton of the State Fair announced last Tuesday that he had booked "The World of Mirth Shows" for the State Fair, Oct. 11-16. Directors have been appointed to superintend each department of the Fair and preparations are already under way to make the next the greatest real state fair ever held.

MICE BROADCAST

Probably the latest among radio broadcasts was that by singing mice last Sunday night. Twelve mice sang in a radio hook-up. Chicago, Memphis, Seattle and Boston were the cities sponsoring the music. Mickey, Chicago mouse, carried off the honors.

Many persons still refuse to believe that ordinary mice can sing. The sound is a warble or trill, closely resembling that of a bird.

COX'S PROLIFIC SEED CORN

W. H. Chamblee has been growing Hunt's Prolific corn for more than 20 years. He got the seed from R. P. Hunt who came to Wake from Granville county. Mr. Hunt had been growing this corn for nearly a third of a century. A bushel of this corn will often weigh six pounds more than ordinary corn owing to its hardness of grain. It is a prolific sound hard grain corn and seldom may a barren stalk be found in a field.

BIG FIRE IN CHARLOTTE

Last Saturday fire destroyed Charlotte's bus terminal, causing a loss of \$75,000. The fire is believed to have started from a gasoline leak in a bus.

DUFFEL BAG

Recently we read of a man who "took off his Sunday clothes, put on his thinking cap, and went to work". At that, he was but following the lines of Rodin's Thinker.

Marketing of tobacco in Winston-Salem began in 1872, when two farmers and three prospective buyers met in a barn for the transaction.

Albrighi - Segati, Italian, has been sentenced to five years in exile because he said he loved his dog better than Mussolini.

A Korean bride has her eyes glued together so that she never really sees her husband until the second day after the marriage. Over here some wives fail to see their husbands plainly after a much longer time.

A man who had lost his way finally found himself near a home. Pounding on the door, he awakened the owner and said, "I want to stay here all night". "All right, stay there", was the reply, as the householder lowered the window and went back to bed. This was told on Daniel Webster.

Uncle Jim Says

Stable farm production year after erosion sets in.

ter year helps keep food prices at an even level, fair to the farmer and the consumer. Fat and lean years hurt both farmers and consumers in the long run.

When erosion has gullied your fields and washed away your topsoil, you just can't make a decent living, no matter how hard you work.

It takes nature 500 years or more to make an inch of topsoil. What a shame some folks don't realize how fast land goes when
