

ABIT NIX

DISTRICT CONFERENCE ROTARIANS

Hon. Abit Nix, attorney of Athens, Ga., will be the official representative of Rotary International for the 57th District Conference to be held at Pinehurst on May 9-10th. Mr. Nix is a charter member of the Rotary Club of Athens, a member of the Board of Trustees of Mercer University, and other institutions as well as National Counselor of the Boy Scouts of America.

Beginning at 7:00 o'clock P. M. Sunday, May 9th, at the Carolina Hotel, headquarters for the Conference, the meetings will be going with high interest to the end. Among the prominent speakers present will be Pres. Sylvester Green of Coker College, Monday evening; Charlie Phillips, Carolina Playmakers, Duke University Glee Club, Joel Chandler Harris, Jr., Governor Clyde R. Hoey and Pat Alderman who will see that there is plenty of good music.

Many prizes and gifts will be awarded and a good time is ahead for all Rotarians who can attend. The management of the Carolina Hotel and the Sanford Rotary Club are hosts of the Conference.

PLANT SOYBEANS AND COWPEAS DURING MAY

Soybeans, "the crop with a future," produce a better yield of hay and seed if planted in May rather than in June or July.

The many uses that are being developed for this crop are fast making it a valuable source of cash income, to say nothing of its value in soil building.

Growers who wish to have a good acreage of soil-conserving crops to qualify for payments under the soil-conservation program will find soybeans well adapted for this purpose.

For plowing or disking under soybeans, velvet beans, or cowpeas as green manure after they have attained a normal growth of at least two months, payments will be made at the rate of \$2 an acre. If they are left on the land, the payment will be \$1 an acre.

One dollar an acre will be paid for planting crotalaria, which is considered the best legume that can be grown in sandy soil areas of this state.

Velvet beans should be planted as early in May as possible, while crotalaria should be sown during the latter part of the month. Cowpeas may be sown at about the same time as soybeans.

Payments usually take care of the cost of growing these crops, but their soil-building value to a farm is worth far more than the payments.

These crops may also be used to replace cotton, tobacco, and other soil-depleting crops when farmers wish to earn the diversion payments offered for taking and out of depleting crops and putting it

Seedbed Protects Young Plants From Sun, Wind and Washing Rain

Select a Sheltered Position for the Seedbed if Possible.

Preparing a seedbed properly is a big step towards a successful garden. It tells the story of how much return in the way of plants you are likely to get from a packet of seeds and eliminates much waste.

Select a position sheltered from the full force of wind and sun if possible. Bear in mind that directly under the branches of trees is not a good location, for the drip from the branches during rainstorms is likely to wash seeds out of the ground. Spade the soil thoroughly. It is an excellent plan if the soil breaks up with difficulty to run it

through a sieve for the top layer. If the soil is heavy lighten it by working in torpedo or silver sand. Heavy soil that crusts easily is a poor medium for seed sowing. It should be easily penetrated by the tiny root striking downward and the tiny leaves pushing upward to the light and air.

It is not necessary to fertilize the seedbed. Fertility is not a requisite in producing germination. This comes in the later stages. Ordinarily good soil will do perfectly well.

If the seedbed necessarily is exposed to the full sweep of wind and sun it is an easy matter to erect a temporary fence or shelter to break the force of the wind and also an easy matter to improvise a lath screen to set over it to break the full force of the sun if hot days happen along. To break the force of driving rains which might wash seeds out of the row window screen is excellent. Burlap may be laid over the bed until the seeds start germinating to serve the same purpose and also to prevent too rapid evaporation of the moisture.

With the seedbed carefully prepared, make it a point not to sow the seed so thickly that the plants will come up in bunches. Sow thinly and in the case of seed so fine that it is difficult to handle, mix with twice or three times its bulk of fine sand to make thin sowing easier. Space the big seeds so that the plants will not touch when they germinate.

DURHAM BULLS PLAY BALL

Durham, N. C., May 5. — On Thursday evening at 8:00 o'clock the Durham Bulls will put on an after-dinner contest in the local ball park. The opposing team will be "The Twins." A fine game is expected. Another game will be played Friday night, a matinee game Saturday afternoon at 4:00 o'clock and the final game on Sunday afternoon.

BERRIES MARKETED

North Carolina's strawberry season is late this year, due to unusual weather conditions. The peak of the market has not yet been reached at Wallace where it is expected that 20,000 crates will be sold daily a little later. The price is good this year, but labor for picking is less easily secured than in recent years.

Only about one per cent of the berries grown in N. C. are sold on home markets, the rest going to points north, some as far as Boston. Klondikes, Missionaries and Blake-more are the preferred varieties.

The local crop of berries is barely beginning to ripen. The late frosts practically destroyed the first blossoming and cold weather has delayed the next blooms, but the chances are for a fair crop for home use. Very few strawberries are sold from patches near Zebulon.

STRIKE IN HOLLYWOOD

Studio workers in Hollywood, big movie city, have gone on strike for a closed shop and recognition of the Union. Neither food nor clothes depend on the movies, so if people miss a few shows because of the

SWIFT CREEK COTTON CLUB

According to an announcement from Jno. C. Anderson, County Agent, the Raleigh Kiwanis Club is sponsoring a 4-H Cotton Club among the young farmers and 4-H Club members of Swift Creek Township.

Fifteen bushels of Pedigreed Cotton seed have been obtained from the Pedigreed Seed Farms at Hartsville, S. C., and distributed among the boys who have joined 4-H Club in Swift Creek Consolidated School.

Each of these boys is planning to grow an acre or more of cotton according to State College recommendations and under the supervision of the Extension Agents.

You Risk  
Being Fooled

WHEN YOU BUY THE unknown

Why risk your good money on unknown razor blades? Probak Jr. is the product of the world's largest blade maker—a blade that "stands up" for one cool, comfortable shave after another. You'll be surprised how easily this double-edge blade removes stubborn bristles... how cool and refreshed it leaves your face. Buy a package of Probak Jr. from your dealer today.

**PROBAK JUNIOR BLADES** 4 FOR 10¢  
A PRODUCT OF THE WORLD'S LARGEST BLADE MAKERS

STOP! YOU'RE DRIVING ME CRAZY

I LOVE TO SEE THE CHILDREN HAVE A GOOD TIME

Which KIND OF MOTHER ARE YOU

Do you "fly all to pieces" when the children are noisy, or when the vegetables burn, or when the jelly won't "jell"? Some mothers are just naturally cranky. Some mothers are cross and impatient because they are nervous.

If you are a natural crank, DR. MILES NERVINE won't do much for you. If you are irritable because your nerves are overtaxed, DR. MILES NERVINE will do a lot for you.

Do you suffer from Sleeplessness, Restlessness, Nervous Irritability, Nervous Headache, or Nervous Indigestion? Do you worry over trifles, start at sudden noises? Overtaxed nerves will cause all these troubles, and DR. MILES NERVINE will help you to relax those overtaxed nerves.

Why don't you give it a trial on our guarantee of satisfaction or your money back? Your druggist can tell you about DR. MILES NERVINE. He has been selling it ever since he started clerking in a drug store. Dr. Miles Nervine comes in two forms—Liquid and Effervescent Tablets. Both equally effective in quieting overtaxed nerves. Both sell for 25¢ and \$1.00 depending on the size of the package.
