### LIVED FIVE DAYS IN WRECK

Tokio, Japan.—An investigation into a plane crash in which seven officers perished revealed that one of them lived five days in the wreckage, unable to extricate himself, kept a diary, made his will and recorded the air currents that caused his disaster, before succumbing to hunger and exposure.

### TVA INVESTIGATION PLANS

Washington, D. C.—Speedy approval is expected in the House of Representatives of the Senate resolution for a sweeping investigation of the \$400,000,000 Tennessee Valley Authority.

## Think This Over

The United States contains 6 percent of the world's area and 7 percent of its population. It normally consumes 48 percent of the world's coffee, 53 percent of its tin, 56 percent of its rubber, 21 percent of its sugar, 72 percent of its silk, 36 percent of its coal, 42 percent of its pig iron, 47 percent of its copper and 69 percent of its crude petroleum.

The United States operates 60 percent of the world's telephone and telegraph facilities, owns 80 percent of the motor cars in use, operates 33 percent of the railroads. It produces 70 percent of the oil, 60 percent of the wheat and cotton, 50 percent of the copper and pig iron and 40 percent of the lead and coal output of the globe.

The United States possesses almost \$11,000,000,000 in gold or nearly half of the world's monetary metal. It has two-thirds of civilization's banking resources. The purchasing power of the popu-

lation is greater than that of the 500,000,000 people in Europe and much larger than that of the more than a billion Asiatics.

YET WE HEAR TALK OF "DEPRESSIONS" AND "RECESSIONS."

## It Is Dangerous

It is dangerous to sell a SUBSTITUTE for 66¢ just to make three or four cents more. Customers are your best assets; lose them and you lose your business. 66¢ is worth three or four times as much as a SUBSTITUTE.

## Where's Elmer?!

Now here's his dog and here's his hat; But where is our Elmer at? Has he gone up in pieces small With only smoke to be his pall?

Nay. Dry your tears; he is not dead, But very much alive instead. That sign just made him fear delay, And last month's bill he went to pay.

## Chevrolet Going Places

In 1936 a Chevrolet Sports Sedan started on a 20,000 mile round of CCC camps in Idaho. It traveled over roads in woods, where there were no roads, and over mountains 8,000 feet high. On one road it took the car five hours to travel 11 miles, all in low gear. During the year 1,115 gallons of gas were consumed, averaging 17.93 miles per gallon. Over the best roads 21 miles were made to the gallon. The 20,000 miles were made by the CCC chaplain in his duties. The going was so satisfactory considering all the obstacles met, that even if he had not been a chaplain, no "cussing" would have been necessary. The year gave a record of performance for any car, even the most expensive ones, but for a Chevrolet—well, that is the usual record to be expected.

### CHINESE FIGHT BACK

# Join the Purol-PEP DRIVE SAFELY CRUSADE

To reduce automobile accidents on our highways and streets—accidents which are daily taking lives of Carolina citizens—Pure Oil dealers are launching a Drive Safely Crusade in which leading civic organizations are being invited to act as CO-SPONSORS.

The purpose of the crusade is to persuade motorists to apply the Golden Rule to driving and to observe "common sense" rules of safety at all times.

Everyone can lend a helping hand in this Crusade. Here is how you can do your part—
