CITY MARKET

True Temper Test

If you really want to know a man, take him on a camping trip. When the mosquitoes are biting and the fish are not, when the coffee has been lost, strayed or left behind, or should you wake up some night with a young tornado blowing and it seems to be raining harder inside of a leaky tent than out—then if your partner grins and complains not, stick to him like a burr, for a sense of humor will assure congenial companionship and level off rough trails as smooth as a sheltered pound on a windless day.

Seeing the Sights after Dark

When it is necessary to shoot in the dark, wet the top of your rifle barrel and the sights can then be seen more easily due to the moisture reflecting the light of the moon and stars.

Ship Shape

One of the strangest of salt water creatures is the sea horse which swims standing up, with his body vertical, and moves steadily and quite rapidly by means of a funny little fin on the middle of his back. This moves so swiftly

How Material Shortages and Defense Demands Affect Telephone Service

From 1931 through 1939 Southern Bell service was brought to a peak of efficiency never before attained.

During these years we had full margins of plant facilities, and most telephone workers were veterans with years of experience and training. These conditions created a situation ideal for concentration on the betterment of the speed and quality of our services.

Now the situation is reversed. Defense requirements, both military and industrial, as well as unprecedented demands for individual service, have placed exceptional burdens on our physical resources and manpower. Added to this is the tremendous increase in local and long distance calls, which combined have developed service demands without parallel in our history.

Thousands of new workers have been employed and trained, and millions of dollars have been spent to expand our facilities to meet these heavy demands.

We hope you will agree that we have so far been generally successful in meeting the demands for telephone service, great as they have been. Because of conditions beyond our control, such as the shortage of copper and other essential materials, it may be, as time goes on, that we cannot continue to meet the demands in certain congested areas with the same success. However, we pledge you that we shall continue to do our very best, with the determination to accomplish the impossible rather than trying to show why the possible can't be done.
