### "CAN ALL YOU CAN"

Years ago we heard something like this: A visitor, after viewing the wonderful production of fruits and vegetables grown in California, asked: "What do you do with all this stuff?" The reply was, "We eat all we can and can all we can't."

For years the editor of this paper has been a strong advocate of canning. Even his wife says he doesn't think it possible to can too much and works her 'most to death so long as there is a fruit or vegetable to put up. It may be so, we will not argue that point now.

As a test of the profitability of the canning business in this community we planted an acre some years ago, in tomatoes,

bought a small cannery and canned many gallons of tomatoes and other vegetables. From an acre, counting from the time of planting till canned, we produced in

When Ensign Frances Hall reless than three months nearly \$250. worth of canned tomatoes. Not knowing the value at that time of tomato juice we throw away gallons and gallons of juice having considerable value as a food.

All this leads us to say that the proposed community cannery for the Zebulon community is just about the best news we have heard in some time. We heartily approve of the project, and hope the whole community will support Prof. Bunn in his efforts to establish the cannery. We believe the new Farm Bureau organization is the proper one to take over and put over this matter. We are sure the Rotarians, Woman's Club, P. T. A., and all private citizens will give it their hearty approval and financial support. We understand that the community is expected to contribute one third of the necessary funds to establish the cannery. The balance will be provided from government funds.

Probably \$500, if not more will be needed to be raised by the local people. This will be a small

matter if each of us will do a reasonable part. We believe in it so much, that we would like to start.

Every family in this community should actively help in this campaign to put in a cannery for community use. It will give all the opportunity of getting all the canning needs for the home done in the most economical way and at the same time disposing of all surplus fruits and vegetables at a fair price. Whether Mr. Bunn will arrange to do public canning, let the community do it, or purchase products, will be decided later. This is a chance for each of us to make a worthwhile contribution to our community and at the same time aid materially in promoting the war efforts in a very profitable and patriotic way.

Come, Prof. Bunn, with your subscription list. We are ready to furnish the money if you will finish the job. This year, let us grow all we can, eat all we can and can all we can't.

### A PEOPLES TAX

Senator Byrd, of Virginia, recently declared: "There was a time when the Federal income tax was called a rich man's tax; the masses believed that they would benefit and that the wealth

thy would pay the bill. Today all that has changed. From now on our Federal expenditures will be traced directly to tax burdens in the lower-income brackets, it being estimated that fifty million people will now file income tax returns. The Secretary of the Treasury must have had a similar idea in mind when he stated: 'For the first time in our history the income tax is becoming a people's tax.'
