"Each cure better than 80% first grade!"

Says Mr. E. T. Forbes, Jr., of Smithfield, North Carolina

Read what Mr. Forbes says about the EVERWEAR All-Aluminum Tobacco Barn:

"All the cures I have made using the EVERWEAR Aluminum Barn have cured better than 80% first grade. The barn yellows tobacco uniformly all over the barn better than I have ever seen. The tobacco comes in order much quicker and stays in order during the day—doesn't dry out.

"We found that an aluminum barn kills out in 1/4 less time than a good wood barn. It yellows five or six hours quicker, and we cut our ordering time eight hours. Fuel consumption was at least 30% less than for our wood barns. I found also that you can hang the barn easily at night simply by shining the tractor or car lights in the door—the whole inside of the barn lights up because of the reflection."

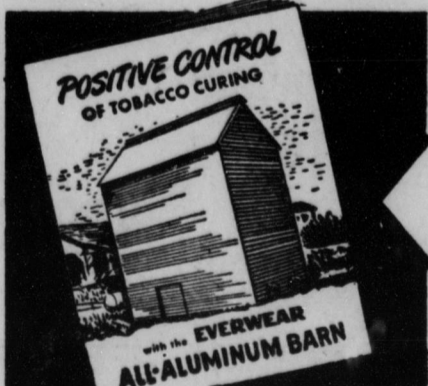

The EVERWEAR All-Aluminum Tobacco

Barn answers perfectly the curing problems of growers everywhere. Now for the first time, the EVERWEAR barn, with its double-aluminum walls, makes possible accurate control of temperature . . . accurate control of humidity . . . so that you can cure higher-grade tobacco every time—with less effort—at less cost.

We'll be glad to send you all the facts about the EVERWEAR All-Aluminum Tobacco Barn, and explain how it can give you faster, better curing . . . and extra tobacco-profits. Just fill out and mail the coupon, and your copy of the free, illustrated booklet shown below will be rushed to you. There's no obligation.
