## POLISHES CAR IN TWENTY MINUTES

Mrs. America—San Diego's Mrs. Francis Cloyd—shines her own car the new, easy way.

Science does it again. Any woman, anywhere in the world, can now make the family car bright as a mirror in about twenty minutes. It's quick and simple. The reason? Silicones! They were developed during the war. Most everything such as airplane ignition systems, and other motor equipment was protected from weather, rust and salt air corrosion by a coating containing silicones. They are anti-social. They hate dirt, grease, etc., and won't allow any of it to become a part of them. They're tough—heat and cold don't affect them. After many years of research, silicones have been successfully made into an automobile polish called Autobrite which is tougher than any car wax. The polish is just spread on and wiped off and the car stays brilliant for six months, needing only cold water sponging. The 4% solution of silicones in Autobrite is the perfect solution, according to scientists. In a single operation it cleans, polishes and protects.

## RUTH CURRENT:

### Farm Home Hints

Onions for flavor: Food specialists say the onion is a most important vegetable in giving zest to a wide variety of dishes. No other vegetable can be used in so many ways. Think of the many sauces, stuffings for meat, poultry or fish, salads and salad dressings, relishes, main dishes and vegetable dishes which need onions for their savor!

Heating chopped or sliced onion in a little fat helps draw out and distribute the onion flavor in stews and stuffings. Many good cooks let sliced onion stand in French dressing awhile before mixing the salad, as a means of stretching flavor.

Raw slices of the big, mild, sweet onions have always been favorites for sandwiches, both hot or cold. The big pale rings are attractive, tender in texture, and not too pungent to combine with salad greens.

As a cooked vegetable onions are popular creamed, au gratin, or cooked with tomatoes. Baked onions are an easy addition to an

oven dinner. Peel medium-size sweet onions. Cut in half crosswise. Place in a baking dish. Sprinkle with salt and pepper and dot with table fat. Add enough water to cover the bottom of the dish. Cover and bake in a moderate oven about 30 minutes. Top with crumbs. Cook until brown on top.

Many homemakers may feel that they do not have the right container to use for flower arrangements. Here are a few suggestions that you may not have thought of, for the containers that really interest the flower lover, are very often those not originally intended for that purpose: tea pots, cream pitchers, vegetable dishes, gravy boats, many types of antique spoon holders, large cups and saucers are unique containers. Should your home be early American old pewter pie plates and candle molds would be ideal. These suggestions will fit modern homes, too.

## EXTENSION SERVICE

### Lists Dairy Show Dates

Dates for the 1950 series of district junior dairy shows in North Carolina were announced this week by John A. Arey, in charge of extension dairy work at State College.

The series will be held about a month earlier than usual, Arey said. The first will be held in Asheville on August 15 under sponsorship of the Asheville Merchants Association. The Belk Stores will sponsor one in Statesville on August 17 and another in

Wilson on August 29. The show at Lexington, to be held August 18, will be sponsored by Coble Dairy Products Company.

Ed Ellington hopes to have students from Wakelon School to participate in the Wilson show.

Purpose of the shows is to interest and train young people in the proper methods of handling dairy cattle. The first show was held at Statesville in 1941, when about 200 animals were exhibited. Last year, 709 animals were exhibited in the four district events.

## High Temperature Increases Danger Of Heat Sickness

High temperatures and the rush of summer work make it easy to be overcome by any of several forms of heat illness, Wake County farmers were warned this week by Assistant County Agent Bruce Butler of the State College Extension Service.

The county agent explained that sunstroke follows prolonged exposure to the sun, whereas heatstroke is caused by excessive heat with or without exposure to the sun. The effects are the same and either may be fatal.

Symptoms are hot and dry skin, face red and flushed, breathing hard and loud, pupils enlarged, and, in some cases, unconsciousness.

Prevention is the best cure, Butler said, but everyone should know what to do in case heat illness does strike. Here is what the National Safety Council suggests for sunstroke or heatstroke:

1. Move patient to a cool, shady place, strip to the underclothes, lay on back with head and shoulders raised.

2. Apply ice or cold wet cloths to head, cool the body gradually with a cool bath or with a hose or wet clothes and rub limbs toward the heart.

3. After treating for several minutes, stop and observe patient. If skin becomes hot again, resume treatment.

4. If patient is conscious, give cool drinks, not ice cold. Do not give stimulants.

5. Get patient to a doctor or a hospital as soon as possible. Continue the treatment in the ambulance.

In cases of heat exhaustion, the patient's skin is cold and clammy. A simple rule may serve as a guide and prevent confusion as to treatment: If the patient is cold, make him warm; if he's hot, make him cool.

## Zebulon's N G Battery Arrives at Ft. Jackson

Thirty-nine members of Battery A, 113 Field Artillery Battalion, arrived at Fort Jackson, S. C., last night about 7:00, tired but happy after the 250-mile journey by truck from Zebulon. The unit faced 15 days of intensive training at a time of crisis in world affairs.

The National Guardsmen left from home yesterday morning at 5:45 a.m., after being issued their colorful red helmet liners and carbines.

The noon meal Sunday was served by SFC Percy Parrish and the mess section. Last night's meal was served hot by the advance party, which arrived at Fort Jackson Friday and included Sgt. Gordan Temple and Pfc. Clyde Morris.

Battery A was the third unit in the convoy made up of over 50 vehicles in the Battalion. Other units included Headquarters Battery from Louisburg, Service Battery from Youngsville, Battery B from Dunn, and Battery C from Roxboro.

## Published Early

The Zebulon Record is published one day early this issue so that rural subscribers will receive it before the July 4 holiday.

## HADACOL MAN

Did you ever wonder what the inventor of Hadacol looked like? Here he is—Senator Dudley J. LeBlanc of Lafayette, La., who once ran for governor of his state against a Huey Long candidate. He sells over 2,000,000 bottles of Hadacol a month.

## Services Are Held For Burt Peoples

Last rites were held Friday for Burt Peoples, young local man who died in a Rocky Mount hospital Wednesday night following an automobile crash on Highway 95 about seven miles east of Zebulon.

A Mercury car driven by Marvin Whitley of Route 1, Zebulon, crashed into Peoples' Chevrolet, which had apparently failed to stop at an intersection. No charges have been placed against Whitley in connection with the accident.

Peoples was employed in the local office of the Carolina Power and Light Company. He was a veteran of World War II, a member of the Zebulon Baptist Church, secretary of the Zebulon Lions Club, treasurer of the Zebulon Softball League and a member of the Zebulon Masonic Lodge.

He held the rank of Corporal in Battery A, 113 FA Bn, Zebulon's National Guard unit.

Funeral services were conducted Friday morning at 11 o'clock at the White Funeral Home in Louisburg by the Rev. Carlton Mitchell, pastor of the Baptist Church of Zebulon. Burial was in Oak Wood cemetery.

Surviving are his wife, the former Mary Frances Boone; one son, Frank of Zebulon; his parents, Mr. and Mrs. Ben F. Peoples; four brothers, Fred L. and Brantley of Louisburg, Route 3, Sgt. Avery Peoples of the U. S. Army in Korea, and Cpl. Linwood Peoples of the Air Force at San Bernardino, Calif.; two sisters, Mrs. Kay W. Ayscue of Henderson and Ray Peoples of Louisburg.

## ZEBULON ROTARY CLUB

### New Officers Installed

Willie B. Hopkins, outgoing president of the Zebulon Rotary Club, summarized the activities of the organization during the past year and told of what belonging to Rotary has meant for him in an address Friday night at the last regular meeting of the year. Following his talk, new officers were installed under the supervision of Luther Massey.

The outgoing president named Early Moser and Luther Massey as two men who meant a great deal to him while he was a student at Wakelon School. He is proud, he said, to belong to the

## Battle Is Started Against Worms On Tobacco Crops

Spurred on by prizes offered by local businessmen, Person County farmers have started an all-out war against tobacco hornworms, according to County Agent H. K. Sanders of the State College Extension Service, who predicts such a war would pay profits for Zebulon farmers.

First step in the campaign, Sanders said, is to destroy all plants remaining in tobacco beds. This practice will cut off an important source of food for all kinds of insects.

The second step is to kill tobacco moths or "tobacco flies," as they are commonly called, before they lay their eggs. "One good swat can kill a tobacco fly which might lay many, many eggs to hatch out into hornworms," the county agent asserted.

Three merchants in the county have offered a prize of \$1 each to the person bringing in the largest number of dead moths before 4 p.m. Saturday. Another merchant and the Roxboro Chamber of Commerce have offered \$10 each as season prizes.

Sanders said some farmers destroy the moths by putting poison in the blossom of "jimson weeds" and other plants to which the flies are attracted. Other "home-made remedies" used by farmers include the following:

1. Fill a bottle with kerosene oil, use a piece of rope as a wick and place this lighted "candle" in a tobacco field. The moths will be attracted to the light and burn their wings.

2. Fill a large pan or tub half full of water. Add a cup of kerosene oil. In the middle of the pan put a rock large enough to come above the water. Set a lighted lantern on the rock. Flies will strike against the lantern chimney and fall into the water, getting oil on their wings, which renders them helpless.

3. Hang an electric light between two posts. Put a tub of water, with a cup of kerosene added, under the light.

## Hail Victims Offered Free Subscriptions

Any family which lost their crops in the tragic hail storm Thursday may receive a free year's subscription to the Zebulon Record by sending their name to this newspaper.

Any classified advertising, for sale or want ads, will be published in this newspaper free of charge for these families.

## ZEBULON ROTARY CLUB

### New Officers Installed

same club with these men now. Years ago, he added, they had demonstrated the true Rotary spirit to him.

The new president of the Zebulon Rotary Club, Ed Ellington, was installed and charged with the duties of his office by Vaiden Whitley. The new vice-president, Robert Dawson, and the new secretary, Rodney McNabb, were installed by Early Moser.

Ralph Talton installed the two new directors, Norman Screws and Ben Thomas, and the sergeant at arms and his assistant, Robert Herring and Wilbur Conn.
