MODEL CAR JUDGES MAKE DECISION

DETROIT, MICH.—Judging gets under way in Detroit to select winners in 1950 Fisher Body Craftsman's Guild competition. Shown here, left to right, are Paul Gillan, GM Styling expert, Claude Reagan, Guild Technical Director, and Frank Reiss, vocational arts instructor, Western High School, Detroit, carefully checking a model automobile, one of the many hundreds competing for the \$65,000 in awards which include university scholarships.

The Atlantic and East Carolina Railroad (Mullet Line) board of directors will meet in Morehead City August 11, with the governor, members of the Council of State, and Ports Authority members meeting with them. Also present will be a Chicago financier "interested in development of the Morehead area." The railroad will play a prominent part in ports development, and coordination of efforts of the railroad and Ports Authority is the aim.

Much to the surprise of many peoples, the governor's suggestion that the State take over operation and maintenance of city streets has won the acclaim of many rural folks. Lots of the "branch-head" boys have written the governor saying they favor the proposal.

Last Rites Are Held For W. J. Talley, 55

W. J. Talley, 55, of Zebulon, Route 2, died in a Wilson hospital Monday morning following a short illness. The Rev. Albert Lamm conducted funeral services at the graveside in the Bunn Cemetery at 3 p. m. Tuesday.

Surviving are: three sisters, Mrs. Sidney Horton of Zebulon, Route 2, Mrs. Sam Britten of Rocky Mount, and Grace Talley of Rocky Mount; and one brother, J. S. Talley of Louisburg, Route 1.

MRS. THEO. B. DAVIS:

This, That, & the Other

It was not merely for my own sake that I rejoiced when cool weather replaced the unusually hot spell of last week. So many birds had sat around in our trees with their mouths open that I had reached the place of being nervous when looking at them. All this week birds have kept their mouths shut, except when feeding or singing.

A recent gift of assorted cheeses was much appreciated; but trying them out has proved that there is much in the cheese line to which I am a total stranger. Having politely refused to accept Limberger or Roquefort I had felt fair-

ly safe with the other kinds; but a trial of a crumbly kind that looked quiet and mild convinced me that it was stronger than I. It fairly leaped to bite me. Next time I unrolled a smoked variety with a long, fancy name and tried to do something with it. It refused to co-operate with toast, paying no attention to efforts to melt it down. It too, was strong and tasted smoky. Somewhat discouraged, I read directions on the package and found that particular cheese was especially recommended for cocktail and bridge parties. Since I am a stranger to both of those festivities, I gave

Emanuel Makes Report on ARC Swimming Class

Final report on swimming classes just completed at Mr. Joe Tippet's Pool in Zebulon were released by the Wake County Red Cross Tuesday. The course was begun on July 24, and classes were held daily Monday through Friday, August 4th.

Top enrollment was listed at thirty-four children, but average attendance was considerably under that figure. Red Cross officials cited the heavy tobacco activities at this time of year as the probable cause of the light attendance. This is the first swimming class held exclusively for the Zebulon area.

Praises Tippet

Zebulon persons are fortunate in having such a satisfactory swimming area so close at hand, Red Cross Water Safety Director Robert L. Emanuel stated, as compared with the grossly inadequate swimming facilities of many rural communities.

"The course recently completed was made possible through the cooperation of Mr. Lee Rhodes, Zebulon Recreation Director, and Messrs. Ferd and Barrie Davis, who furnished free transportation for the children to and from the classes," Mr. Emanuel said.

Successful Students

The following students successfully completed the Beginner's test: David Alford, Kenneth Edkins, Leary Davis, Jay Godwin, and Armenia Hocutt, all of Zebulon. Completion of the Intermediate Swimming Tests was interrupted by inclement weather the last day of the course.

Red Cross officials stated that efforts would be made to schedule a similar course again next year, but that it would be earlier in the season so as to avoid conflict with agricultural activities. Assisting in teaching these classes were: Ann Brigman, Grace Doar, Mrs. Trudy Lindsay, Wade Cooper, Tommy Womble, Bill Crisp, and David Stephenson.

Local Man to Get Wake Forest Degree

Plans have been completed for the annual summer school graduation exercises at Wake Forest College tonight. Degrees will be conferred upon 108 students by Prof. Jasper L. Memory, Jr., Director of the Summer School.

Prof. Carroll W. Weathers, the new dean of the Wake Forest Law School, will deliver the commencement address.

Included in the graduating class is Charles Frederick Corbett of Zebulon, who will receive a Bachelor of Arts degree.

Final Square Dance Planned for Tonight

The final square dance of the summer will be held tonight, Friday, August 11, at 8:30 in the high school gymnasium, Recreation Director Lee Rhodes announced yesterday. A four-piece string band will add to everyone's enjoyment.

The dancing will begin promptly at 8:30 and there is no admission charges. The community is invited to come and bring a friend or two.

ORGANIST

Charles Horton, Minister of Music at the Zebulon Baptist Church, will be presented in organ recital Sunday evening, August 13, at 8 o'clock. Numbers on program include works by many of the world's great composers for organ. Mr. Horton is playing a composition of Eisaburo Kioka which was dedicated to him by the composer. Dr. Kioka was organ recitalist at the Baptist Church earlier in the summer.

Soil Conservation Steps Are Taken

By G. L. Winchester and S. W. Holleman

Many farmers are now making preparations for seeding pastures this fall. H. M. Olive of New Hill, H. D. Copeland of Morrisville, Kidd Brewer of Raleigh, Clyde Garner of Garner, and many others have already spread lime on land to go in the pasture following the recommendations of the Soil Testing Division of the N. C. Department of Agriculture. They will also follow their recommendations for the amounts and kind of fertilizer to use.

Joe Bell of the Bethany Church Community is now making plans for seeding five meadows. Rudolph Robertson of the same community is sowing nine meadows to tall fescue and ladino clover. Lime is being applied at the present as this mixture responds to the use of lime.

L. O. Page at the State Hospital is baling sericea lespedeza hay this week. This hay was cut, and windrowed the same day, and baled the third day with a pickup baler. It was good hay. It was green and had retained most of its leaves. This is a hay crop that should not be overlooked in beef cattle production. It is growing, and will grow, on thin, poor, or sandy soils.

RUTH CURRENT:

Hints for Farm Homes

It isn't necessary to iron everything. In many homes, especially during the busy season, the ironing of sheets, dish towels and much underwear and children's clothing is considered quite unnecessary. Thorough drying and careful folding is all that's needed.

Laundry Basket Buying: You can save yourself much future ironing by wise buying of garments and household textiles. Choose such fabrics as jersey, seersucker and corduroy for children's clothes. When nylon fits the purpose, be sure to choose it. Nylon is used for many things besides hosiery and women's underwear now — children's rompers

Zebulon National Guard Battery To Go to Bragg

Plans are being made for Battery A, 113 Field Artillery Battalion, to spend a weekend at Fort Bragg in late September or early October, Capt. Barrie Davis said yesterday. The entire battery will leave on a Saturday morning and return Sunday afternoon, if the plans receive the approval of Fort Bragg officials.

The purpose of the trip will be to give the men in the battery additional training in actual firing practice.

The artillery ranges at Fort Bragg are much superior to those at Ft. Jackson, S. C., where the cannoners were never able to see their rounds hit in the target area. At Fort Bragg, the target range will be about 2,500 yards and the men will see every round burst.

Lt. William Griffin of Headquarters Battery is assisting in the training of a Fire Direction Center for the local unit. The men who compose this section will compute the firing data for the guns. Pfc. Jimmy Greene and Pfc. Robert Privette are studying the duties of the FDC personnel.

Battery A has 50 enlisted men, according to WO Clifford Gilliam. A few more men will be recruited, he said, but lack of uniforms and armory storage space will limit the strength of the battery to less than 60 men.

Col. Charles Elliott and Major Arthur Ball attended drill with the battery on Monday night. Major Ball is succeeding Col. Elliott as Regular Army Instructor for the 113th FA Battalion. He is working with Capt. Davis on preparations for the Fort Bragg trip.

Funeral Services Held For Mrs. Mary Reaves

Funeral services for Mrs. Mary Eason Reaves, 50, of Selma, who died in Woodard Herring Hospital in Wilson Sunday afternoon, were held Thursday at 3:30 p. m., from the Free Will Baptist Church at Selma, conducted by the Rev. Oscar Jones, assisted by the Rev. Wiley Ferrell. Interment was in Branch Chapel Church Cemetery on Selma, Route 1.

Surviving are her husband, Jesse M. Reaves; two sons, Odell Reaves of Ellis, Kansas and Malcolm S. Reaves of the home; two sisters, Mrs. C. P. Godwin of Lucama, and Mrs. W. Eatmon of Zebulon; one brother, Clarence Eason of Portsmouth, Va.

and men's shirts, among others. It's worth the extra cost.

Good Equipment Helps: In ironing, as in most other jobs requiring skill, it's hard to do a good job quickly and easily unless you have good equipment to help you out. A good iron, ironing board and high chair will pay for themselves over the years in terms of the time and energy saved. Give sit-down ironing a fair trial. Sitting down to iron cuts down fatigue more than you'd think. Thousands of women have taught themselves to iron sitting down — and like it — so why can't you? Your own bad habits can
