**SEEN AND HEARD**

The Two-party political system consists of the appointed and the disappointed, Vance Brown remarked the other day.

We stopped for a cup of coffee at a roadhouse in a neighboring county the other night, and while we sipped our java a youngster who could not have been over 15 years old came weaving into the place, his eyes and mind dazed from an obvious over dose of alcohol. It was not a pretty sight, and we experienced pity rather than disgust. The person who permitted this young boy to drink deserves a penitentiary sentence.

Occasionally we receive reports from young gentlemen from this community who are partaking of knowledge at various schools and colleges. The latest story concerns the troubles of Bill Brantley, self-professed woman-hater.

Said a coed to Bill: "Whisper those three little words that will make me walk on air."  
"Go hang yourself," Bill replied.

The laziest woman in the world is one who puts popcorn in her hot cakes so they will turn over by themselves.

Over at the armory last night, a peeved Recruit said that an acting corporal is "a double-barrelled Pfc."

**Resistant Variety Of Tobacco Urged**

Because black shank and Granville wilt are now prevalent to some extent in every major tobacco-producing county in the State, it will be more of a problem than ever for Tar Heel growers to choose the right variety of tobacco for next year.

Tobacco Specialists R. R. Bennett of the State College Extension Service and C. J. Nusbaum of the Agricultural Experiment Station say that rotation and use of resistant varieties are the two measures being used to fight these dread diseases. Rotation, they point out, helps by reducing infestation in the soil and giving support to resistant varieties.

The resistant varieties, all released by the Experiment Station a year ago, are Dixie Bright 101 and 102, which have resistance to both black shank and Granville wilt, and Dixie Bright 27, which has resistance to Granville wilt only.

**HOSIERY HINTS**

by *Airmaid Clark*

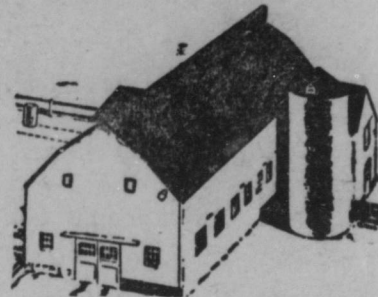

Do you know the proper way to wash stockings? It's most important to the life and looks of your nylons, so check your procedure with Airmaid's tried and true method.

Make a lather of mild soap in lukewarm water, swish your lovely Airmaid's carefully. Rinse. Squeeze gently, roll in a towel to remove excess moisture. Spread Airmaid's on a towel or hang them by their reinforced Diamond Point Toe to dry. Dry away from heat to keep Airmaid's "Flying Colors" fresh. And never, never put stockings on a radiator—nylon melts at high heat. So will your calm disposition if this happens.

Get sheer, beautiful Airmaid's at Zebulon Drug Co. Adv.
