CLOSE CALL!

Early this week, while on his mail route on highway 95 near Union Chapel, Wilson Braswell narrowly escaped a serious accident when he whipped off the highway just in time to avert a huge trailer truck which speeded by him from the rear.

Wilson, who says he drives with one eye on his rear view mirror, saw the big truck zooming up behind him. In spite of a clear road ahead, the driver made no effort to pass but continued to close on Wilson's car.

In the nick of time the popular mail carrier took to the shoulder, and the truck sailed past, its rear wheels bumping along the dirt off the highway, missing the side of Wilson's car by an inch. Its speed was estimated by witnesses at over 75 miles an hour.

Fortunately for Wilson, a crowd quickly assembled, for his automobile was precariously balanced on the narrow shoulder of the road where the fill dropped down. The outside wheels hung clear of the ground, and it required eight men to hold the car upright while it was pulled back to the pavement.

Shaw Urges Support of Crop Research Plan

R. Flake Shaw, Executive Vice-President of the North Carolina Farm Bureau called on all farmers in the State this week to support the "Nickels For Know-How," or Enabling Act Referendum, which will be held on November 3.

Shaw said that every progressive minded farmer in North Carolina should go to the poles and vote for this constructive agricultural research program.

He pointed out that the Enabling Act, which was passed by the 1951 Session of the N. C. General Assembly, gives each man, woman, and child in the State who purchases feed and fertilizer, the right to vote a five-cents per ton assessment on these two items. The proceeds from this assessment will go into the Agricultural Foundation's Research Fund to be used in work on all North Carolina farm commodities.

"We cannot hope to make any really outstanding progress in our agricultural program," Shaw said, "unless we establish a fund to promote research."

"The average farmer in the State will only pay the small sum of 50 cents per year if this assessment is voted. He will recoup many dollars which might otherwise be destroyed by crop disease and insects."
