If You Can't Convince 'Em - Confuse 'Em!

Farmers Home Administration Offers Loans to Promote Farm Improvement

The Wake County officers of the Farmers Home Administration have begun to work with qualified borrowers on their farming operations for 1952. Special attention and planning is being given to make the farming program of these farmers a balanced one between row crops and livestock. A written plan of work for each farmer will be developed with a view to utilizing all the labor in the family all the year-round which will result in increased income and decreased dependence on cotton and tobacco with their seasonal income. The production and conservation of home grown feed and foods are a requirement in the approval of these loans, due to the need for increased production of food and fibre to meet our war needs.

The plan also includes the use of sufficient money to adequately finance these farming operations so that maximum production can be attained. Money can be loaned to purchase small foundation herds of dairy or beef cattle, poultry or hogs, as well as money needed to meet other needs for

farm and family operating expenses.

These loans are available to small land owners or tenant farmers who can get a written long-term lease with the landlord which is designed to carry out a balanced farming program. The interest rate is 5% with a repayment plan which will match the ability of the family to make orderly retirement of their obligation.

Applications for these loans are being taken in Room 231 in the New County Building on the corner of Davie and McDowell Streets in Raleigh.

Ruth Temple Winner In Raleigh Festival

Ruth Temple, daughter of Mr. and Mrs. J. M. Temple and member of the Wakelon 4-H Club, was an honorable mention winner in the Harvest Festival held at Hudson-Belk in Raleigh last week.

Awards of \$1 each were received by Ruth for a school dress and canned tomato juice.

Blood Urgently Needed for Armed Services to Save Lives in Korea

Friday, October 25, has been set aside as Wake County Day when residents of the county can assist in meeting the urgent need for blood for the Armed Forces in Korea. The Bookmobile will be in Raleigh at the Edenton Street Methodist Church from 10 a. m. to 3 p. m. for Wake County donors.

National Defense authorities have declared that there is an urgent need for blood for the Armed Forces and together with the Red Cross is making an all-out appeal in Wake County for 600 pints of blood.

For those who cannot go Friday, arrangements have been made to have the Bloodmobile at the

same location on Wednesday from 12:30 to 5 p. m., and on Thursday at the same hours.

"A lot of people seem to have a fear about giving blood," Dr. William J. Senter, volunteer Chairman of the Blood Program, said, "but the process a blood donor goes through is as simple and harmless as a good night's sleep. The only thing to fear is the possibility that our forces in Korea won't get enough of this vital fluid. It's up to us to see that they do."

Those wishing to contribute a pint of blood to save lives in Korea can contact Ralph W. Talton, Wake County Red Cross Director, at Carolina Power & Light Company, or Philip Whitley in Wendell.

National Guard Battery Observed at Drill Last Night by Army Inspector

Colonel J. C. Salmon, Third Army Inspector General, inspected Battery A, Zebulon's National Guard unit, yesterday afternoon and last night, examining the equipment, supply, unit library, armory, and records yesterday afternoon, and the men, methods of instruction, and training last night.

The Federal Inspection is an annual event for National Guard units, and the grade received from the Inspector General plays a major factor in the rating given the battery for the year's work.

During the first hour of training last night, Colonel Salmon conducted an inspection of the men in ranks, questioning them about their duties in the battery, their knowledge of the organization of the unit, and inspecting their uniforms for neatness and fit. After the inspection, a drill period was held for the Colonel.

The second hour of training was devoted to sections training, with the chiefs of sections teaching the men under them their detailed duties. Lt. James Potter taught map reading to the cannoneers; Lt. George Hinds worked with the drivers; and Lt. Foster Finch, Jr., with the wire section.

Captain Barrie Davis, commanding officer of the battery, last week announced the promotion of Lt. Hinds to First Lieutenant. Lt. Hinds is Assistant Executive Officer of the unit.

The next regular drill is scheduled for Monday night, October 29, at 7:30 p. m.

Harvest Day to Be At Wakefield Church

Wakefield Baptist Church will hold its Annual Harvest Day Sale on Saturday, October 27th, 1951. The sale will begin at 10:00 a. m. A free lunch will be served to the public on the Church grounds promptly at 12:00 noon. Immediately following lunch the sale will continue until all articles are sold.

Be sure to be there and take advantage of these wonderful bargains. Bidders may purchase any farm produce from chickens to hay, and useful articles for the home that may be used from the kitchen through the parlor.

Wakelon Bulldogs To Play at Garner

The football game between the Wakelon Bulldogs and Jimmy Allen's Garner gridders will be played on Friday afternoon on the Garner athletic field, according to Principal W. R. Whittenton of Wakelon School.

Originally scheduled to be played here, the game site was changed to Garner when the football field there was completed recently.

Last year's game, which was supposed to be played at Garner, was played at Wakelon because the Garner field had not been completed at that time.

BLOOD NEEDED

An urgent call for blood donors for Dr. G. S. Barbee has been made. Dr. Barbee is seriously ill in Park View Hospital in Rocky Mount and must have a number of transfusions. Donors are asked to contact Dr. Chas. E. Flowers or the Park View Hospital.

Funeral Services Held Sunday for E. H. Green

Funeral services were conducted from the Wakefield Baptist Church Sunday afternoon at 3 o'clock for Early H. Green, 73, who died Saturday morning at the Doshier Memorial Hospital in Southport after a long illness.

The Rev. Kermit Combs pastor of the Wakefield Baptist Church, was in charge of the services. The body lay in state one hour prior to the rites.

Surviving are two daughters, Mrs. J. J. Howes, Supply; and Mrs. H. J. Montgomery, Florence, S. C.; four sons, Robert, Harold, Allen, and Albert, all of Zebulon; 14 grandchildren; three sisters, Mrs. S. V. T. Chamblee, Red Oak; Minda Green, Raleigh; Mrs. Percy P. Pace, Ahoskie; a brother, Norman, of Butner.

Funeral Services Held For William H. Bunn

Notice was carried in yesterday's News & Observer of the funeral rites for William Heber Bunn, 38, conducted at Mount Hope Cemetery in Boston, Mass. Mr. Bunn was accidentally drowned two weeks ago.

Surviving are two sisters, Mrs. Rachel Draughan, Zebulon, and Gertrude Bunn, Richmond, Va.; two brothers, Ralph Bunn, Zebulon, and Clellan Bunn, Boston.

Rotary Club Visits Beck's Veneer Plant; See Plywood Manufactured

The huge machines and involved processes used in converting gum logs into sheets of plywood were shown the members of the Zebulon Rotary Club last Friday night when the group visited Beck Bros. Veneer and Plywood Plant. The visit was the second in a series originated by Program Chairman Ralph Talton to acquaint the Rotarians with the business activities of the members.

Rotarian Howard Beck, assisted by his brother, Fred Beck, and the superintendent of the plywood plant, Wade Jones, was host to the club.

Beginning at the huge steam rooms where the gum logs are steamed for 24 hours, the Rotarians were shown the two large lathes which peel veneer from the logs. The veneer is cut to size and loaded on wheeled platforms,

Boll Weevil Destroys More Farm Crops Than Any Other Insect

What insect has caused the most damage on North Carolina farms this season?

There's no doubt about the answer, says George D. Jones, insect control specialist for the State College Extension Service. As in 1949 and 1950, he says, the boll weevil has caused the most damage to any crop in the State during 1951.

Boll weevil damage for the current year hasn't yet been estimated in dollars and cents, but it's expected to reach a considerable sum. Records from treated and untreated fields are now being tabulated. The data already show that farmers were well paid for knowing what the situation was from week to week and treating when necessary to control the weevil.

Some growers needed to make from six to 10 applications of poison, while others were able to get by with only two to five applications. In some cases the infestation was so low that no treatment was needed.

The second most destructive insect pest this year, according to Specialist Jones, has been the boll worm, also known as corn earworm and tomato fruit worm.

Other high-ranking pests on the list include hornworm on tobacco, tobacco flea beetle, rice weevil in

Little Sonnie Coley Is Talent Night Winner

Little Sonnie Coley, 11-year-old Knightdale singer, was first place winner in the Lions Talent Night show held in the Wakelon School auditorium Saturday night. By virtue of his victory, Sonnie will be a contestant in final night competition for the grand cash prize.

Second place was won by Nan Williams, acrobat from Fayetteville. Third place was awarded Marsh Knott and his Tub Band from Wendell.

Honorable mention was given the Hucklebucklers from Angler, Steve Creech, Mary Lee Broughton of Rolesville, and the Samaria Quartet.

Judges for last Saturday night were members of the Apex Lions Club, including the District Governor of 31-E, Lion George Rogers.

then rolled into the huge drying rooms where it stays for two to three days.

After the drying process, the veneer is ready for shipment by truck or rail, or for use in the Beck Plywood Plant.

In the manufacture of plywood, Superintendent Wade Jones explained, a special glue is used to hold pieces of veneer together. Always the plywood has an odd number of layers of veneer with the grain of the plies alternating to give tremendous strength and stability.

In the plywood plant the Rotarians were shown the large mixer for the glue, the glue spreader, and large hydraulic press which bonds the plywood together through heat and pressure, the cross-cut and rip saws with which the plywood is trimmed to size, and the large sander.
